# Foreword to Standard Edition

ALMOST nine years ago, in the Foreword to the 14th Edition, we expressed our expectation that "at some future date a so-called Library Standard Edition of the Decimal Classification" would be published. Now we are happy to put that long awaited volume into the hands of the library profession, and of the many other individuals who have so long found "Dewey" useful. Since in all probability there will never be a "last" edition of the DC, we earnestly request all users to give us the benefit of their criticism in order that sometime our successors may actually bring out "the perfect book."

Note was made in the 14th Edition of the committee which was created in 1937 for the purpose of making this work more responsive to the needs of librarians and other classifiers. Only three members of the original committee remain: Arthur E. Bestor died in 1944; Miss Ruth D. McCollough and Dr. Harriet D. MacPherson found it necessary to devote themselves to other duties. We are grateful to them for services rendered. The committee as it now stands is listed below:

As is more or less inevitable in an organization which has no endowment upon which it may depend, after the 1942 book was issued the editorial staff found other interests; and the wheels practically ceased to turn. Something like \$58,000 had been expended in revising and publishing the 14th Edition, and that money, for lack of a better term, was profit from the sale of the preceding edition. Under the

terms of Melvil Dewey's provision for the continuance of the DC, any profit derived from the sale of the book was to be put into revision of new editions and the promotion of the use of the system throughout the world. No dividends have ever been paid to any person or institution. Despite the fact that the above mentioned rather considerable sum had been spent on the 14th Edition, in March 1942 when the new book was published the treasury still showed a balance of \$31,000. It seemed appropriate to begin to make plans for a "Dewey" which should be completely revised to meet our understanding of the library profession's desires. (Just as matter of record, perhaps, it may not be inappropriate to note that the cost of the Standard Edition ran to more than \$100,000.)

In December 1944, Mrs. Esther P. Potter was employed as Director of a new staff which was given the difficult undertaking of modernizing the DC. During the more than five years the staff was thus engaged it has changed surprisingly little. The following professional workers were on Mrs. Potter's staff at the conclusion of the revision: Misses Sarah C. Francee and Helen L. Purdum, and Mrs. Eleanor Hungerford.

On March 1, 1949, I retired as a professional librarian and assumed the post of Editor, in addition to the chairmanship of the committee.

The Director in the course of her services has conferred with many librarians and members of other professions, she has attended many conferences, and has distributed many questionnaires—most of which came back. An attempt has been made in the brochure heretofore distributed to pay tribute to all those persons and societies so helpful in the production of the Standard Edition. It was truly a cooperative task; and if it fairly well achieves the degree of usefulness so earnestly desired, great credit will be due our colleagues and friends who because of their number must here remain unnamed.

Special mention, as a class, must be made of the American Library Association Committees whose members have interpreted for us the needs of varying kinds and sizes of libraries. Members of the Division of Cataloging and Classification Regional groups, in their criticisms

of earlier editions, furnished a realistic basis for our revisions. The Advisory Sub-committee for Dewey Classification, in its detailed criticisms of revision, has given us opportunity to correct errors of judgment.

That the subject matter contained in some of the new expansions and also in the more drastic revisions is correct and in perspective is due in large degree to the Special Libraries Association.

Our gratitude to the Librarian of Congress cannot be too strongly expressed. He has assigned us space which he himself could have used for other purposes; and his staff has unfailingly aided us in our work. Our location in the Library of Congress has enabled us to use its vast resources in books and print and to estimate approximately the volume of literature falling into any class; for it is obvious that a number without a book is wasted effort. The government offices in Washington, too, have been responsive to our call for assistance.

No attempt is herein made to praise Melvil Dewey, or to fix his place in the intellectual world. This book is his monument; he needs no further title or acclaim.

## Foreword to Edition 15 Revised

THE Standard (15th) Edition of the Decimal Classification, which appeared in March 1951, was the first completely revised edition to appear in more than 40 years. The guiding principle for this revision was adaptation to the needs of the general library collection of up to 200,000 volumes, eliminating over-detailed expansions useful only to the special library or for very large collections.

Many features of Edition 15 have been widely praised: the more pleasing format, up-to-date terminology, shorter numbers, better bal-

anced new expansions, and various lesser details. The most important negative criticisms have centered on the index.

In Edition 15 Revised, the tables remain virtually unchanged except for correction of typographic errors, a fuller table of form divisions, and revision of two divisions, 300-309 and 920-929. The index, however, has been completely reconstructed, more than doubling its size and making it a true relative index, worthy of the best traditions of the D.C. For the benefit of the more than 11,000 users of the first printing of Edition 15, this index, together with the principal revisions above noted, is being bound separately and sold at a minimum price to cover only manufacturing and handling cost.

Tribute should be paid to the members of the editorial staff, and especially to the associate editor and director of the Washington Office, Mrs. Eleanor Hungerford, for their effective work in completing the thoro revision of the Index which increased its size from around 15,000 to about 35,000 entries, before the first printing of Edition 15 should be exhausted. Acknowledgment should also be made of the helpful cooperation of the members of the Decimal Classification Section, Subject Cataloging Division, of the Library of Congress, of which Miss Julia C. Pressey is the head. By somehow finding time to examine without undue delay the original card entries for the entire index, they have given D.C. users everywhere the benefit of their unusually extensive experience.

# Introduction

## HISTORY

THE CONFUSION of the contents of the Amherst College Library in 1872 must have presented to Melvil Dewey, Student Library Assistant, the same challenge as that of his mother's pantry when, at the age of five, he rearranged it systematically. Always an enthusiastic reformer, and urged on by his hatred of waste of time, it probably did not seem to him unusual that at 20 he should try to bring order out of chaos, a situation which evidently had been of little concern to his predecessors. Ultimately, in solving the problem at Amherst, he achieved some degree of order for a vast number of libraries the world over.

After study of the classifications of knowledge as conceived by Aristotle, Bacon, Locke, and other philosophers, and the recently published library classifications of Schwartz and Harris, Dewey decided to use a scheme of arranging books by subject based upon Harris' inversion of the Baconian order of History, Poesy, and Philosophy. This decision to use a subject arrangement was a radical departure from the almost universal practice of arranging books alphabetically or by size, color, or accession.

The problem of devising a simple scheme of notation was possibly more difficult than deciding upon the plan of arrangement. None of the philosophic classifications used such a device. The Schwartz scheme was complicated by the addition of symbols for size, and the Harris notation provided only for classes, not single books. Dewey's visits to libraries in New York and New England revealed only how much need there was for an efficient system. The three existing schemes for decimal arrangement of books, du Maine's in 1583, the Glasgow, circa 1790, and the Shurtleff in 1856, evidently did not impress Dewey. All three were based upon numbering shelves rather than books. In a moment of inspiration, born of intensive study and

thought, came the solution which now seems so simple, the application of Arabic numerals used decimally as notation for books arranged by subject.

The Amherst Library Committee must have been somewhat startled to receive from a student assistant three papers proposing, not only a revolutionary classification scheme for the library, but also a carefully considered account of its merits and how it was especially adapted to the needs of the Amherst Library. They approved the proposal, and with the advice and help of others, the following three years were devoted to improving and extending the original plan and in reorganizing and classifying the library.

In 1876 "A Classification and Subject Index for Cataloguing and Arranging the Books and Pamphlets of a Library," an improved and amplified version of the original plan, was published anonymously. In the years that followed, Dewey was instrumental in establishing a number of library organizations which, in turn, contributed to the success of the new classification. Almost simultaneously with the publication of the classification, the American Library Association and an organization later to be known as the Library Bureau were founded. The "Library Journal" issued its first number in the same year. Eleven years later, the first library school was opened at Columbia. Thus, for the first time, the library profession was given a multiplicity of outlets for the expression and propagation of its increasingly liberal concept of the function of libraries and the resultant necessity for efficient library operation.

In its radical departure from the old order, the Decimal Classification was wonderfully fitted to the progressive spirit of this period of transition. It never lacked adherents, and they never lacked channels for spreading their enthusiasm. How widespread its use and popularity in the United States had become is well illustrated by the creation in 1930, because of popular demand, of a section in the Library of Congress for the purpose of assigning Decimal Classification numbers to books which libraries using the scheme might be expected to purchase. The most recent estimate of its use in the United States is taken from

statistics compiled for the American Library Directory, published in 1945. At that time 96 per cent of the public libraries, 89 per cent of the college and university libraries, and 64 per cent of the special libraries reporting used the system.

Use of the classification has spread outside the United States to Latin America, Europe, Asia, Africa, and Australia. In part, it has been translated into Chinese, Japanese, French, German, Italian, Spanish, Portuguese, Norwegian, Russian, Hungarian, and Bohemian.

Some impetus to this general acceptance was given by the Institut International de Bibliographie in 1895, when it decided to use the DC as the basis for a bibliographic classification for its international subject index. In 1905 the Institut published the "Classification Decimale," using the basic plan of the DC expanded considerably and employing supplementary use of symbols to designate subject relationships. In 1927-'29 a revision was published under a slightly different title, "Classification Decimale Universelle." Both of these are referred to interchangeably as the CD, the UDC, and the Brussels. They have been translated in abridged form from the French into Dutch, Swedish, German, and English. Differences have appeared between the DC and the CD, due principally to the more complex demands of a bibliographic classification, but the basis is still fundamentally that of Dewey.

### THE DECIMAL CLASSIFICATION

The plan of the classification has remained the same in all fourteen revisions. The Tables of classification provide an infinitely divisible scheme of organization based upon a relative grouping of like subjects numbered decimally. The Index is an alphabetical listing of subjects with reference to the class number under which they may be found in the Tables.

### THE TABLES

Subject matter is divided into nine main classes numbered by digits 1 to 9. Material too general to belong to any one of these classes is

numbered 0 and forms a tenth class which, however, is placed first. The classes are written in three figures; thus class 000 is General works; class 100 is Philosophy; 200, Religion; 300, Social sciences; 400, Linguistics; 500, Pure science; 600, Applied science; 700, Arts and Recreation, 800, Literature; and 900, History.

Each of these main classes is divided into nine divisions numbered 1 to 9, while a tenth for general material, belonging to no one of the divisions, is provided by retaining the two ciphers. Thus 720 is the number for Architecture, one of the divisions of Fine arts, which is 700.

Further subdivision may be made by amplifying each of the ten divisions in the same manner. Thus 722 is the number for Ancient architecture, which is a section of Architecture (720), in itself a division of Fine arts (700), one of the main classes. Such decimal subdivision may be repeated until there are as many subsections as are needed. An example of this principle carried to an extreme may be found in the 14th Edition, which uses 621.384115523 as the number for material on Meteorological influences on radio transmission in the tropics. Numbers of such length will not be found in the Standard Edition, which aims to provide a system of classifying books, not a detailed outline of knowledge.

Fremont Rider, in his "Melvil Dewey," has noted some of the difficulties of maintaining the practical qualities of the system. "Numbers," he says, "are fascinating things; and there have been, over the years, many would-be experts in classification who have not realized that, because a certain amount of classification is a good thing, an indefinitely larger amount of it is not necessarily better. It should have been obvious that the more detailed a classification is made, the more quickly it tends to become obsolete; that the more complex it is made, the more its original easily grasped simplicity becomes lost."

The basic plan of the Decimal Classification is a division by subject and an orderly progression from the general to the specific. Three of the main classes, however, show variations from the plan of subject subdivision. Class 400, Language, and Class 800, Literature, are di-

vided linguistically; e.g. 450 is Italian language; 850 is Italian literature. The primary division of 900, History, is a topographical one, first by continent, then by countries, e.g. 945, Italian history, the figure 4 meaning Europe, and 5 meaning Italy. The repeated meaning of the figure 5 in 450, 850, and 945 indicates that the number for Italy is always 5.

Two provisions have been made for arrangement where consideration of the form or style in which the book is written, as well as the subject, is important, e.g. for dictionaries, poetry. A method of subdividing has been provided which is applicable to any class, division, section, or subsection in which there is sufficient material to make such division desirable, e.g. History of Italian drama 852.09. These are as follows:

- |                                |                               |
|--------------------------------|-------------------------------|
| 01 Philosophy, theory          | 06 Societies, transactions    |
| 02 Compends, outlines          | 07 Study, teaching, education |
| 03 Dictionaries, encyclopedias | 08 Collections                |
| 04 Essays, lectures            | 09 History                    |
| 05 Periodicals                 |                               |

If the number to which these form divisions are to be added ends in 0, one zero should be dropped before the form number is added, e.g. a zoological magazine is 590.5, not 590.05. If the number resulting from the addition of the form division has been assigned another meaning in the Tables, an extra 0 is added, e.g. a periodical on English history is 942.005, not 942.05, which the Tables give as the number for England in the time of the Tudors.

The second provision for arrangement by style of writing is a series of numbers which may be applied to any piece of literary material. These are as follows:

- |           |                    |
|-----------|--------------------|
| 1 Poetry  | 5 Oratory          |
| 2 Drama   | 6 Letters          |
| 3 Fiction | 7 Satire and humor |
| 4 Essays  | 8 Miscellany       |

851 is Italian poetry, the figure 8 meaning Literature, 5 meaning Italy, and 1 meaning poetry. This example illustrates, not only the use of the form division, but also the linguistic division for literature.

While the linguistic and topographic form divisions are helpful in quick classifying because of their mnemonic features, they are aids and not regular methods. While Italy or Italian is always 5, the number 5 is not always Italy or Italian, as it is also used for periodicals, oratory, or any other subject the practical development of the tables demands. The mnemonic devices occur in several hundred places in the classification and allow for close classification with a minimum expenditure of time and effort.

## THE INDEX

Each item in the Index is followed by a number which refers the user to the location of that subject in the Tables. The terminology of the Index is in terms both of current popular usage and of the subject specialist. Synonymous wording is used wherever it seems practicable.

The Tables are followed by an alphabetically arranged Index in which reference by class number is made to the exact location of a subject in the Tables. As subjects are seldom thought of in exactly identical terminology, the entries are in terms of current usage or those which belong to the terminology of the subject. It is not safe to assume that the Index, which is planned only as a key to the Tables, furnishes the final answer to any classification problem. The Tables must be consulted after the clue has been supplied by the Index.

## SUGGESTIONS TO THE USER

### HOW TO USE THE TABLES AND INDEX

It is wise to learn the ten main classes. Knowledge of the hundred divisions and numerous sections and subsections should follow grad-

ually from use, without the necessity of special study, and will result more quickly if the Tables are used rather than the Index. Locating the subject of a book within the scope of its main class brings familiarity with the class as a whole. When the Tables are used in this way, the Index should be checked to verify the result obtained.

### HOW TO DETERMINE THE SUBJECT OF A BOOK

There are several methods of deciding upon the subject of a book. These may be used in varying combinations where the subject is obscure.

Title—The title often indicates what the book is about. However, it is sometimes misleading; in consequence, some further method should be used as a check.

Table of contents—This is usually an excellent guide to the subject of a book.

Chapter headings—If there is no table of contents, chapter headings or marginal notes are likely to give a good indication of the contents.

Preface—It is always wise to scan the preface for the author's point of view, even if it merely verifies your decision already based upon some other aid.

Reference books—Information regarding the subject of the book may be obtained from bibliographies, catalogs, biographical dictionaries, histories of literature, encyclopedias, reviews.

Subject matter—An exhaustive examination of the subject matter of the book itself will probably solve the problem.

Specialists—Experts should be consulted when all other methods fail, and sometimes for verification of a tentative decision.

### HOW TO ASSIGN THE CLASS NUMBER

When the subject of the book has been decided upon, its number may be found in the Tables either by using them directly or by means

of the Index. Even if one is quite familiar with the classification, decisions based upon direct use of the Tables should be checked with the Index. It shows relationship and subordination, and often presents a choice of points of view. This method makes possible a much more accurate classification of the book than when only one portion of the Tables is used.

The basic principle involved in the assignment of the class number is that of usefulness. As libraries differ and the people using them are never alike, the decision as to where a book will be of the greatest value must be the responsibility of the individual classifier. The majority of books present no very complicated problem. There can be only a remote possibility that an elementary physics book could be more useful in some other class than Physics. But, would a bibliography of physics be of more use in the Bibliography section or with the Physics books? The decision must be based upon an accurate knowledge of the aims of the individual library, and that can be gained only by the classifier's own experience, not by rules set down here.

The contents of the book, not its form or wording of the title, should usually determine its number. The content of a History of art is primarily Art, not History, and such a book would be most useful in the Art section.

Each library should formulate a general policy concerning the length of numbers it will use, based not only upon the present size and type of its collection, but also upon an estimate of what its collection will be in the future. This policy should, however, be flexible so that the most useful numbers may be utilized even if they violate the policy. There has been much controversy about broad versus close classification, but the present trend in libraries is to limit the number wherever it is feasible to five or six digits. The class number chosen should be the most specific, which will contain the subject of the book and yet remain reasonably within the library's length-of-number policy. A library with a five-digit policy would probably choose as "the most specific number" 671.52 for a book on Electric arc welding. A larger

or more specialized library with a six-digit policy might use 671.521 or even 671.5211 as "the most specific number." In either case, the main heading, 671 Metal Manufactures, or 671.5 Joining and Cutting, is not sufficiently specific.

When a book treats of two or three subjects, assign it to the class in which it will be most valuable. The other subject or subjects may be taken care of in the catalog by means of added entry cards. If a decision regarding this type of book cannot be based on the principle of use, assign the class number to the first subject treated in the book.

When a book treats about equally four or more sections of a division, give it the division number, e.g. a book discussing light, heat, sound, mechanics would be given the division number of 530.

Unless the library's policy prevents, separate and classify as separate items: libraries, special collections, sets.

Translations, reviews, keys, analyses, and other works about specific books should be assigned the class number of the original book.

The classifier may save much time by consulting the number which may already have been assigned to the book. DC numbers may be found on Library of Congress cards, Wilson cards, in A. L. A. Book List, Book Review Digest, Standard Catalog series, Children's Catalog.

A record of all difficulties and decisions should be made for the sake of uniformity and future efficiency. These notes should be written in the Tables, in an interleaved copy, or arranged by class number in a file.

## BOOK NUMBERS

In many libraries the call number, by which the book is arranged on the shelves and called for, includes a book number in addition to the class number. While the class number distinguishes books on one subject from those on another, the book number distinguishes each book from all others in the same class.

Probably the most widely used system of book numbers is the Cutter Sanborn. In these tables the author's name is represented by

its initial with the remaining letters translated into numbers, e.g. Freeman, F 85. Books on the same subject are arranged alphabetically under the class usually by author heading or, as in the case of Biography, alphabetically by the subject of the biography. Other book number schemes were included in the 11, 12, 13 Editions of the Decimal Classification. One was a table of numbers for certain well-known authors, and the other, a translation system of dates so that books in the sciences, where date of publication is of importance, may be arranged chronologically by date of first publication.

The Borden book number scheme is also widely used.

#### VARIATIONS FROM THE PUBLISHED TABLES

The Tables, as they are developed in this edition, represent the Editorial Office's concept of what a medium-size general library might need to classify its collection. Obviously, it will be too minutely subdivided for many small and some medium-size libraries, and some very large or highly specialized libraries may not find it sufficiently minute.

It remains, then, for each library to consider carefully whether the printed Tables may be used successfully to classify its collection. This decision will be easier if the fundamental purpose of book classification is constantly kept in mind. Book classification is essentially functional, a medium of location, not a philosophical system. It may also be helpful to remember that specialists seldom agree regarding the organization of their subject. A decision regarding the necessity of expansion should result in a request to the Editorial Office for an official expansion. If one is not immediately available, the broad classification should be made to serve until the official expansion is ready. A good expansion takes a great amount of time and expense for study, research, interviewing, and correspondence, and necessitates a broad and dispassionate over-all approach. Such a project is generally of too great magnitude for the majority of librarians with their multiplicity of other duties. If, after considering these points, the Tables seem

unsatisfactory, and the temptation to make changes or expansions is great, remember that once the change is made, whether good or bad, the library, because of the expense of reclassifying, will be saddled with it indefinitely, unable to make use of official expansions and improvements in successive editions.

There are ways of simplifying the Tables, which the Editorial Office not only suggests but recommends, as sensible time-saving devices especially for small libraries. Certain of these, such as the combining of subjects, the substitution of B for the class number for Biography, the use of book numbers or letters instead of long numerical divisions, and the omission of a class number in the case of Fiction, may be found at the beginning of specific subjects.

Two other recommended modifications follow: Children's books may be distinguished from the adult collection by the use of J for fiction and J plus the class number for nonfiction, e.g. J 942 Child's history of England.

In order that reference books may be easily distinguished from those which circulate, R usually precedes the call number or stands above it.

## USES

It is quite feasible by using only the main classes, divisions, and sections, to classify very adequately small collections, whether in private, or in public, school, or college libraries. It is also equally possible for large or special libraries to use the Tables. Acceptance by these libraries, many of which have felt the necessity of finely developed classification schemes, involves the concept of classification as a means of grouping material in as close relationship as is efficient, leaving to a catalog the function of minute description of the book and analysis of its contents. The Editorial Office feels very strongly that in a rapidly changing world such as ours it is unwise to do more than group broadly, particularly in the Social, Pure, and Applied sciences. It is comparatively simple to correct a subject heading on a catalog card when further investigation proves that the Hottentot and

Bushmen's languages belong to the same rather than two separate families, or when changing emphasis, such as Electronics as an inclusive term for communication, throws out all the subdivisions under the old concept of Radio. To change the numbers on all of the books or documents, with all of their attendant book and catalog cards, is not a simple matter.

With the passing years a much wider use of the classification has come about than was originally conceived. Book stores and book exhibitors have found it a convenient and profitable way of arranging their stock. Business and industrial concerns and government offices have found in it a good solution to the problem posed by correspondence files which have become too large and unwieldy for straight alphabetic arrangement. In fact, any file, whether it is composed of pamphlets, documents, monographs, clippings, photographs, slides, or films, may well be organized by the Decimal Classification.

### THE STANDARD EDITION

In point of chronological sequence, this edition is the fifteenth. To name it the fifteenth, however, would imply that it is but another in the long succession of revisions which only partially satisfied the demands created by constantly increasing knowledge. More truly descriptive is the name Standard Library Edition.

In 1945 the pattern of the new revision was furnished by instructors in library schools and by librarians in a variety of libraries in North and South America and Great Britain. In accordance with their advice, the new edition is a complete revision, each schedule having been studied and rewritten in the light of new information, changing concepts and terminology, and Simplified spelling has been abandoned, except for the twelve words adopted by the N. E. A.

The revision is designed to meet the needs of the greatest number of libraries. As the "greatest number" ranges from small to moderately large general libraries, the tables are evenly and broadly expanded. Overelaboration, which too often appeared in parts of previous edi-

tions, has been avoided. Numbers for which no book can be found have been omitted. To insure its fitness for classifying books in such libraries, each table has been scrutinized before its incorporation in this edition, not only by subject experts, but by librarians in public and university libraries of varying sizes.

In order that the reference value contained in the bibliographic fulness of some of the older editions may not be lost in less detailed expansions, liberal use has been made of definitions and scope notes in the Standard. So that its use may be simplified, definite recommendations are made when the possibility of alternative numbers arises. As reclassification is both a physical and financial impossibility for most libraries, no very drastic changes appear in the Standard. When it has seemed necessary for reasons of correction to use a number other than the original, the new classification is built upon a hitherto unused number. The old number is retained, but with the advice that use of the new classification is recommended.

### 011-016

#### BIBLIOGRAPHIC WORKS

Lists of works Catalogs of books Indexes Collections of brief abstracts

Previous editions have provided 017-019 for catalogs, but as most libraries make no distinction between bibliographies and catalogs, these numbers have been omitted in this edition

## 011 UNIVERSAL AND GENERAL BIBLIOGRAPHIES

Author arrangement of bibliographies not limited to any particular subject, time, or locale, e.g. Brunet's *Manuel de Libraire et de l'Amateur de Livres*

**012 , BIBLIOGRAPHIES OF INDIVIDUALS**

Bibliography of works by or about an individual or both. Use of this number is limited to works of individuals whose major importance does not lie in specific subject fields or whose works are too general to fit any specific subject

*For Bibliographies of individuals closely related to specific subjects, see 016*

**013 BIBLIOGRAPHIES OF SPECIAL CLASSES  
OF WRITERS**

Bibliography of works whose chief value lies in authors' having some common characteristic, e.g. alumni of college, members of religious organization

**014 BIBLIOGRAPHIES OF ANONYMOUS AND  
PSEUDONYMOUS WORKS**

May be divided like 030

**015 NATIONAL BIBLIOGRAPHIES**

Bibliography of works published in same place, whether country, city, or publishing house "Press books" Lists and indexes of government publications

May be divided like 940-999, e.g. Books published in Belgium, 015.493

*For Bibliographies of works about a place, see 016*

**016 SUBJECT BIBLIOGRAPHIES**

Bibliographies of works devoted to a single subject or bibliographies arranged by subject "Best books" Brief abstracts

May be divided like whole classification, e.g. Bibliography of travel in England, 016.9142; with exception of Bibliographies of music itself, 781.97; Children's books, 028.5

Where interest in subject bibliography lies with specific subject rather than in bibliography, class in general number for subject. It is recommended in this case that bibliography be separated from rest of general material on subject by a symbol, e.g. Bibliography of organic chemistry, \*547

- .6      **Jewish Institutions and Activities**  
              Includes polity, Temple, tabernacle, synagogue, Rabbi's work,  
              administration of synagogue activities, organizations including  
              individual societies, religious education, e.g. Y.M.H.A. and  
              Y.W.H.A.
- 297      **MOHAMMEDANISM**  
              Includes Sacred Book (Koran)
- .8      **Bahaism**
- 299      **SEMITIC AND OTHER NON-CHRISTIAN  
                                  RELIGIONS**  
              May be divided like 491-499, e.g. Babylonian, 299.219; Con-  
              fucianism, Taoism, 299.51; Celtic, 299.16; except as provided  
              above, e.g. Chinese Buddhism, 294.32; Judaism, 296; Moham-  
              medanism, 297

# 300 Social Sciences

---

Sciences which deal with social conditions, relations and institutions which are involved in man's existence and well being as a member of an organized community

*For Form divisions 2-8, see p. lv; exceptions 1 and 9 follow:*

## 301 SOCIOLOGY

Study of man in the community; of group life, habits, traditions, institutions, and ways of thinking and living

### .01 Sociological Theory and Method

Includes history, concepts, methodology

### .1 Social Psychology

Study of interaction: of individuals with each other, of individual and his group, and of groups with each other

*For Psychology, see 150*

### .12 Socialization and Personality

Place of social and cultural conditioning in development and operation of personality

*For Psychological foundation of personality, see 136-137*

### .15 Collective Behavior

Analysis of conditions under which uniform action, usually in conformance with the conventions, takes place and the forms in which collective behavior commonly manifests itself

*For Organized forms of collective behavior, see specific subject, e.g. Customs, 390; Conventions, 301.152; Group behavior, 301.158; Institutions and social organization, 301.4*

301.152

**Social Control**

Use of overt means (rewards, censure, ridicule, ostracism, censorship, force) and symbolic media (propaganda, indoctrination, publicity, insignia, satire) to enforce conformity

Includes informal controls of conventions, mores, and public opinion (formerly classified in 301.154)

*For Formal controls, see subject, e.g. Regulation of transportation, 385; Controls within labor groups, 331.88-.89; Controls in economic production, 338; Controls within professions, the professions*

.153

**Social Movements**

Concerted action to bring about desired change motivated both by dissatisfaction and hope for improvement

*For Reform movements, see subject, e.g. Emancipation movements, 326; Suffrage reform, 324; Coups d'état and revolutions, 323.2; Peace movements, 341.1*

.1532-.1535

It is recommended that **Conflict, Compromise, Assimilation, Socialization** be classified in 301.23; **Progress**, 301.24

.1536

It is recommended that **Disintegration, Decadence, Degeneration, Reversion** be classified in 301.24

.154

It is recommended that **Public Opinion** be classified in 301.152

.155

**Leadership**

## 301.158

## Elementary Collective Groupings

Formation	Characteristics	Behavior
-----------	-----------------	----------

Includes the public; crowds, mobs, gangs, cliques, their organization and behavior; rumor and popular delusions

## .2

## Culture

Culture is totality of man's techniques, habits, traditions, institutions, values, and ways of interpreting world of nature and man

Includes cultural traits, patterns, and larger composites such as national cultures or civilizations; variability because of geographic position; varied adjustments to different kinds of climate, topography and resources, and to crises such as flood, fire, epidemic, war

*For Cultural anthropology, see 572.7; Ethnopsychology, 136.4*

## .23

## Cultural Processes

The continuous transition of social phenomena from one condition to another

Includes contact, competition, conflict, cooperation, differentiation, accommodation and acculturation

These processes were formerly classified in 301.1532-4

## .24

## Social Change

Processes by which the social structure is profoundly modified either constructively or destructively

Includes theories of cyclic change, decadence, progress  
These processes were formerly classified in 301.1535-6

*For Social planning see 309.2*

301.243

**Means of Social Change**

Invention fusion	Discovery	Accumulation	Dif- fusion
---------------------	-----------	--------------	----------------

Includes effects of technology, mass communication  
on culture

.3

**Human Ecology**

Analysis of human spatial relationships and the effect of  
physical or social environment upon them

Includes ecological processes of concentration, centraliza-  
tion, specialization, invasion, succession

*For Demography, see 312; Anthropogeography, 572.9;  
Human geography, 911; Migration, 325*

.32

**Population**

Number of inhabitants and changes resulting from popu-  
lation growth, decline and movement

Population theories (formerly classified in 312.1)

*For Population statistics, see 312; Political aspect of  
migration and colonization, 325*

.323

**Composition of Population**

Includes problems of an aging population, differentials  
in birth and death rates, selection and quality of popu-  
lation by means of negative eugenics (elimination of  
unfit by segregation, sterilization, contraception) and  
positive eugenics (reproduction by superior stock)

Eugenics was formerly classified in 575.1

*For Human genetics, see 613.9; Vital statistics, 312*

**301.35-301.37 ECOLOGICAL ORGANIZATION**

.35

**Rural Community**

Analysis of rural society and culture

Includes open country, village or towncentered, agricul-  
tural village and plantation types of community; changes  
due to commercialization and mechanization of farming;  
interaction; differences between rural and urban life

- 
- 301.36**      **Urban Community**  
Organization, institutions, and distinctive interactional features; trends of the modern city  
Includes suburbs, satellite communities, urbanized areas
- .37**          **Regions**  
Includes metropolitan districts, intranational regions (geographical, political, economic)  
*For Regional planning, see 309.24*
- .4**          **Social Organization and Institutions**  
Includes sociological studies of political, economic, and religious institutions  
*For Anthropology, see 572; Educational sociology, 370.19; Christian sociology, 261*
- .42**          **Family**
- .422**          **Nature and Forms of Marriage**  
Includes monogamy, polygamy, polyandry; marriage prohibitions
- .423**          **Family and Social Order**  
Includes effects of industrialization, urbanization, war upon family
- .424**          **The Sexes**  
Studies of the sexes in society  
Includes variations in sex life, e.g. celibacy, premarital relations, prostitution, homosexuality
- .425**          **Courtship Behavior and Mate Selection**  
*For Human genetics, see 613.9*
- .426**          **Husband-Wife Relationship**  
Includes preparation for marriage; elements of successful marriage; marriage counseling; planned parenthood  
*For Sex instruction, see 612.6; Birth control, 612.63*

- 
- 301.427      **Parent-Child Relationship**  
              *For Child care, see 649.1; Child psychology, 136.7*
- .428          **Family Dissolution**  
              Includes divorce
- .43          **Special Groups**  
              Includes age groups, special interest groups
- .44          **Social Stratification and Social Status**  
              Includes socio-economic groups, e.g. aristocracy, bourgeoisie, proletariat
- .45          **Ethnic Groups**  
              Social units and minority groups within a nation  
              *For Anthropology, see 572; Political problems of minorities, 323.1; Aliens, 323.62; Immigrants, 325; Intercultural education, 370.19*
- .451         **Racial Groups**  
              Includes Negroes, Indians
- .452         **Socio-Religious Groups**  
              Includes Jews
- .46          **Social Disorganization**  
              Studies of maladjustment during periods of rapid change and the problems resulting from institutional breakdown. While social equilibrium is disturbed, change is less complete than in the processes of decay and decadence, and the basic structure of society remains unchanged  
              *For Specific social problem, see subject, e.g. Population maladjustment, 301.32; Economic maladjustment, 330; Family disorganization, 301.428; Child welfare, 362.7; Crime, 364; Juvenile delinquency, 364.3; Racial conflict, 301.45; Poverty, dependency, and vagrancy, 339.1; Suicide, 364.15*

---

309      **HISTORY OF SOCIAL SCIENCES****.1      Social Surveys**

May be divided like 930-999, e.g. Survey of social conditions in France, 390.144

**.2      Planning**

Includes comprehensive works on social planning

*For Planning in specific fields, see subjects, e.g. City planning, 711; Social security, 368.4; Conservation of natural resources, 333.72; Agricultural production planning, 338.1; Economic policy planning, 338.9*

**.22      International Coordination and Planning**

*For International cooperation, see 341; International relations 327*

**.23      National Planning****.24      Regional Planning****.25      State Planning**

## 310 STATISTICS

Classification and frequency of occurrence of different kinds of things or different attributes of things as basis for induction and inference

*For Application to specific subjects (except population), see subjects, e.g. Social surveys, 309.1; Vital statistics, 312; Statistics of specific countries, 314-319; Form divisions .1-9, p. lv*

### 311 STATISTICAL METHOD

Includes preparation of schedules, survey methods, tabulation, presentation (graphs, charts)

*For Statistical method for specific subjects (except population), see subjects, e.g. Tabulation of statistical data in educational research, 370.78*

#### .2 Mathematical Statistics

Includes design of experiment, sampling design, statistical control of quality

Where interest in mathematical statistics lies chiefly in mathematics, class in 519.9

### 312 DEMOGRAPHY

Statistical study and analysis of state and movement of human population inclusive of census enumeration, registration of vital processes and of whatever quantitative statistical analysis can be made on these bases

*For Migration and settlement, see 325; Population theories and problems, 301.3*

#### .1 Births and Birth Rates

Statistics and analyses of reported births

Includes registration of births; differentials in fertility and birth rates as shown in census reports and vital statistics

It is recommended that Limitation of birth rate, Malthusian theory be classified in 301.32

#### .2 Deaths and Death Rates

Statistics and analyses of deaths

Includes statistics of death due to specific causes

*For Mortality and survival tables, see 368.3*

---

**312.5 Marriage and Divorce Statistics and Rates**

Statistics and analyses

**.8 Population Mobility**

Statistics and analyses of increase, decrease, movement of population

*For Problems of increase or decrease of population, see 301.32*

**.9 Distribution and Characteristics of Population**

Statistics and analyses of population by age, sex, nationality, race, religion, education

**314-319 GEOGRAPHICAL STATISTICS**

May be divided like 940-999

Includes only statistics too general to be classified with their subjects, e.g. Statistics of New York, 317.47

*For Geographical statistics applied to specific subject, see subject, e.g. Medical statistics of New York, 614*

## 320 POLITICAL SCIENCE

### Theory      Organization

State is politically organized body of people possessing both external and internal sovereignty, expressing its will by means of the agency of government

Includes politics

*For Law, see 340; Public administration, 350; Political history, 900; Judicial branch of government, 347.9; Executive-branch of government, 353; Political sociology, 301.4; Form divisions .2-.8, p. lv, exceptions in .1 and .9 follow:*

### 320.1      Political Theory

Theory of origin, form, behavior and purpose of state  
Includes distribution of peoples, ethnical unity; size, position and geographical unity of territory; frontiers and boundaries; acquisition and loss of territory; geo-politics

It is recommended that Nationalism be classified in 321.8  
*For Functions of government, see 322; Demography, 312*

### .15      Origin and Nature of State

Theories of origin, e.g. divine right, juridical, organismic, social contract, historical or evolutionary

### .157      Sovereignty

#### Nature      Location

Power of state: state is independent of compulsion or interference from other states, and absolute in authority over all individuals or associations of individuals within state

### .158      Unity

Includes allegiance, loyalty, patriotism

*For Group unity, see 301.15; Symbols of patriotism, 929.8-.9*

- 320.9 History of Political Science and Theory**  
 Includes comparative government and descriptions of specific governments; civics  
 May be divided like 930-999, e.g. U. S. Government, 320.973  
*For Government of United Nations, see 341.13; Local government, 352; Political history, 900; Executive government, 353-354*
- 321 FORM OF STATE AND GOVERNMENT**  
 Includes development of national state, e.g. patriarchal family, gens, clans, Oriental empire, Greek city state, Roman world empire, feudal state  
 It is recommended that Political uprisings be classified in 323.2; Non-selfgoverning territories, 325.3; Forms of government for colonies, 325.31; Forms of international organization, 341.1  
*For Comparative government and descriptions of individual governments, see 320.9; Political history, 900; Anthropological studies of primitive organizations, 572.7*
- .01 Representative and Non-representative Government**  
 Includes relationship between executive, legislative and judicial branches; separation of powers between branches (formerly classified in 353-354)  
*For Legislative branch, see 328.3; Judicial branch, 347.9; Executive branch, 353-354*
- .02 Unitary and Federal Government**  
 Includes powers distributed between national government and various degrees of local government; centralization and decentralization of powers  
*For Administration of local government, see 352*
- .021 Federal State**  
 Form of state in which separate units, retaining their government and control over certain internal interests, relinquish or lose sovereignty and exist as component units of a single state  
 Includes federal-commonwealth relations; admission of commonwealth to union; doctrine of "state rights"  
*For Admission of commonwealth to United States, see 973*
- .03 Empire Imperialism**

- 321.04      **World State**
- .07      **Ideal State**  
            Utopias  
            *For Economic aspects of utopias, see 335*
- .09      **Change of Form of State**  
            It is recommended that Coups d'état and revolutions be  
            classified in 323.2
- .3        **Feudalism**
- .6        **Absolutism**  
            Includes national states not based on support of people, e.g.  
            dictatorship, absolute monarchy  
            It is recommended that Modern dictatorship be classified in  
            321.85
- .7        **Constitutional Monarchy**
- .8        **National State**  
            Includes national states based on support of people; nation-  
            alism
- .82      **Democracy**  
            Representative democracy      Republic
- .83      **Socialism**  
            *For Economic aspects of socialism, see 335; Utopias, 321.07;*  
            *Socialist parties, 329.8-9*
- .84      **Communism**  
            *For Economic aspects of communism, see 335.4; Commu-*  
            *nist parties, 329.8-9*
- .85      **Fascism**  
            Includes Nazism, Falangism  
            Fascism was formerly classified in 321.6  
            *For Economic aspects of Fascism, see 335.6*

## 322 PROVINCE AND FUNCTION OF STATE AND GOVERNMENT

Includes trends in separation of politics from some institutions and increasing governmental responsibility in others; functions not interfering with private enterprise; functions competing with private enterprise

Use as inclusive number for 322 and 323

*For Diplomatic functions, see 327; Military functions, 355; State and education, 379; Taxation, 336.2; Social planning, 309.2; State and business, 338.9*

### .1 Church and State

*For Attitude and effect of church on political order, see 261.7*

## 323 RELATIONS OF STATE TO INDIVIDUALS OR GROUPS

Protection of individuals and groups against encroachment on part of state government; and by state government, against encroachment by other individuals or groups

*For Political liberty, see 323.4; Political parties, 329; Crimes against state, 364.13*

### .1 Nationalities, Races, and Religious Groups

Political problems based on social and cultural interests involving groups

*For International migration and colonization, see 325; Public policy toward aliens, 325.1; Sociological aspects of minority groups, 301.45; Nationalism, 321.8*

### .2 Political Struggles

Includes revolutions, revolts, riots, subversive activities

Coups d'état and revolutions were formerly classified in 321

*For International law of civil war, see 341.39; Crimes against state, 364.13; Martial law, 355.9*

### .3 Hereditary and Economic Classes

Problems involving recognition of rights within state

Includes nobility, aristocracy, upper middle, lower middle class, bourgeois, laborers, proletariat, peasantry

*For Economic problems of laborers, see 331*

323.35

**Communities**

Includes urban, suburban and rural

*For Local government, see 352; Sociological aspects of communities, 301.35-.37; City planning, 711*

.4

**State and Individual**

Includes doctrine of natural rights or legal immunities of individuals which in a democratic state the state protects against interference, e.g. life, equality, pursuit of happiness, freedom from want, rights of assembly and of petition, property; limitation and suspension of civil liberties

.44

**Liberty**

Includes freedom of speech, religion, press, conscience, drama, art, academic freedom

*For National liberty, or external sovereignty, see 320.157; Freedom and censorship of specific activities, the subject, e.g. Press, 070.13; Movies and radio, 792.93-.95*

.6

**Citizenship**

*For Civics, see 320.9; Political liberty, 323.4; Dual citizenship in international law, 341.51*

.61

**Laws**

May be divided by country like 930-999, e.g. citizenship laws of Brazil, 323.6181

.62

**Naturalization**

.67

**Alien Privileges**

Includes passports

*For Aliens in international law, see 341.51; Regulation and control of aliens, 325.1*

324

**ELECTIONS AND SUFFRAGE**

Includes electorate as branch of government, e.g. powers demonstrated in party platforms, policies determined in initiative and referendum

*For Public opinion polls, see 301.152; Party platforms and policies, 329; Initiative and referendum, 328*

- 324.1 Suffrage**  
Includes qualifications (age, sex, citizenship, residence, property, mental and moral, poll tax); movement for national ballots for qualified voters without permanent local residence  
*For Woman suffrage, see 324.3*
- .2 Elections**
- .21 Voting Systems**  
Includes plural (weighted or differential) and compulsory voting
- .22 Basis of Representation**  
Includes functional, minority and proportional representation  
*For Legislative bodies and basis of representation, see 328.33*
- .23 Nomination of Candidates**  
Includes party conferences, caucus, direct primary, platform
- .24 Voting Procedure**  
Includes registration; conduct and voting procedure, e.g. hours, polls, judges, clerks, secret ballot, certification of votes; absentee voting; voting procedure of electoral college
- .25 Ballot**  
Includes short ballot, Australian system, second ballot, voting machines
- .27 Corrupt Practices**  
Includes bribery, false registration and voting  
*For Corrupt practices in party politics, see 329; Contested seats in legislative bodies, 328.33; Crimes against state, 364.13*
- .3 Woman Suffrage**  
*For Woman's position, see 396; Woman suffrage party of U. S., 329.8*
- .4-.9 Suffrage and Election by Country**  
May be divided like 940-999, e.g. Suffrage and elections in India, 324.54

325

## INTERNATIONAL MIGRATION AND COLONIZATION

Transference of residence from one country to another

*For Demography, see 312; Domestic population policy, 301.32; Agricultural colonization, 333.76; Mobility and distribution of labor, 331.11; Migratory labor, 331.67*

### .1 Immigration

Policies      Regulation      Administration

Entrance into country to establish permanent residence or obtain employment

Includes official organization of immigrant service, treatment of immigrants; inspection, registration, fees, policy (restriction, exclusion, selection, quota systems)

*For Immigration to special countries, see 325.4-.9; Alien privileges and passports, 323.67; Relations between state and minority groups within country, 323.1; Sociological aspects of minority groups, 301.45*

### .2 Emigration

Departure from one country or region to settle and reside in another

Includes emigration policy

### .21 Promotion and Assistance      Abuses

Includes transfer of population; displaced persons, refugees from viewpoint of immigration and emigration

*For World War II refugees, see 940.531*

### .24-.29 Emigration and Emigration Policy of Specific Countries

May be divided like 930-999, e.g. Chinese emigrants, 325.251

*For Relations between state and minority groups within nation, see 323.1; Sociological aspects of minority groups, 301.45*

325.3

**Colonization**

Occupation and permanent settlement of territory by nationals of state under political control of that state; sometimes loosely used as extension of sovereignty by imperialist power over peoples and lands of weaker countries

Includes non-selfgoverning territories, spheres of influence; colonial empire

*For Political history of empires and of specific colonies, see 930-999*

.31

**Colonial Government**

Organization      Administration

Includes international control (mandate and trusteeship control)

.33-.39

**Colonization by Specific Countries**

May be divided by nation controlling colonies like 930-999  
e.g. British Empire, 325.342

.4-.9

**Colonization of Specific Countries**

May be divided like 940-999, e.g. Immigration and colonization of Alaska, 325.798

326

**SLAVERY**

Includes serfdom, slave trade, antislavery and proslavery documents, emancipation

It is recommended that Socio-economic aspect of Negro problem be classified in 301.45

*For U. S. Civil War, see 973.7*

.9

**History of Slavery**

327

**INTERNATIONAL RELATIONS**

International relations deal with what has been done or what is proposed to be done in given situations

Includes foreign policy

May be used as inclusive number for 327 and 341

*For Diplomatic history, see 930-999, e.g. Diplomatic history of France, 944; International law (what ought to be done or not done), 341; International organization and world peace, 341.1; International law of diplomatic service, 341.7; Executive powers, 353.03; 354; Legislative powers, 328.34; Specific treaties, history of country, e.g. Treaty of Paris, 973.32*

**327.3-.9 International Relations of Specific Countries**

May be divided like 930-999

*For Diplomatic history of specific countries, see 930-999; Geopolitics, 320.1; Nationalism, 321.8*

**328 LEGISLATION**

Includes uniform laws, direct legislation (referendum, initiative)

*For Law, see 340*

**.1 Parliamentary Law****.3 Legislative Bodies**

Legislative branch of government

Includes sessions, their frequency, length and types; upper and lower chambers

*For Sessions law, see 345.1, 346, 349*

**.33 Membership**

Includes qualification, compensation, tenure, methods of selection, seating of new members, contested seats, legislative mandate or freedom of representation, apportionment of seats on geographic, functional, proportional bases, representation of minority parties, electoral districts, voting privilege, reapportionment reforms (Gerrymandering)

**.34 Powers**

Includes defined and implied powers, e.g. powers to investigate; powers to formulate statute law, to amend constitution, to control revenue and appropriations, to share responsibility in making treaties, and miscellaneous functions, e.g. power to judge elections, to investigate or punish members; privileges and immunities, prerogatives

**.36 Organization**

Includes procedure in suspension and investigation of members and in cases of impeachment, appointment and election of officers; organization of committees, subcommittees, and commissions; party officers, committees and party discipline; lobbying

*For Parliamentary law, see 328.1; Legislative manuals, 08 under 328.4-.9; Party politics, 329*

328.37

**Procedure**

Includes petitions, addresses, joint resolutions, local and private legislation, legislative reference service, bills (technique in bill drafting, readings, calendars, vote taking)

.39

**Types of Legislative Bodies**

Includes unicameral, bicameral

.4-.9

**Legislative Bodies of Countries**

May be divided like 940-999, and further divided: 01 journals 02 debates 03 abstracts 04 documents 05 rules 08 legislative manuals 09 history. An exception may be made for U. S. and its component units by omitting 0, e.g. History of U. S. congress, 328.739; N. Y. (state) legislative manual, 328.7478. For other nations 0 is in some cases needed to avoid conflicting numbers, e.g. unless 0 is used, 328.469 could mean either legislative bodies in Portugal or history of legislative bodies in Spain

329

**POLITICAL PARTIES**

Organization      Campaign methods      Conventions      Functions

Includes party politics

For Elections, see 324; Nomination of candidates, 324.23; Political history, 900

.01

**U. S. Presidential Campaign Documents of All Parties**

.02

**Political Machines**

Includes bosses

.1

**Federalist**

.3

**Democratic**

Includes Republican-Democratic or Jeffersonian Republican party

.4

**Whigs**

.5

**American or Know-nothing**

Includes Native Americanism

329.6

**Republican**

Includes liberal Republican movements, e.g. Progressive party of 1912

.8

**Other U. S. Parties and Political Clubs**

Includes Prohibition, Greenback, Woman suffrage, People's (Populist) Socialist, Labor, Communist; political societies (formerly classified in 363)

.9

**Parties in Other Countries**

May be divided like 940–999, e.g. Political parties in France, 329.944

## 330 ECONOMICS

Study of problems men face in their attempts to satisfy their wants in a world of scarcity

*For Form divisions .2-.8, see p. Iv; exceptions in .1 and .9 follow:*

### 330.1 Economic Theory

Includes capitalism and free enterprise

*For Theories of specific aspects of economics, see subject, e.g. Marginal utility in price determination, 338.522; Collectivistic systems of government, 335*

### .15 Schools of Economic Thought

Includes theories of Mercantilists, Physiocrats, Classicists (Adam Smith, Malthus), Historical school, Social economists (Marx), Socio-ethical school, American Institutionalism, Keynesian economics

### .18 Methodology of Economics

### .9 Comparative Economic Systems

Includes economic history

## 331 LABOR AND LABOR PROBLEMS

Those who work or wish to work for wages, and problems arising out of conflict between employer and employee over division and control of the product of industry

Includes government regulation of labor

*For Form divisions 01-09, see p. Iv*

### .1 Employment and Unemployment

Includes security, insecurity, discrimination

It is recommended that Collective bargaining be classified in 331.891

*For Personnel management, see 658.3*

### .11 Labor Market

Interaction of labor supply (total number of workers of various grades available) and demand (classes of jobs offered by employers)

### .112 Labor Supply

- 331.115      **Labor Demand**  
              *For Distribution of population, see 312.9; Migration, 325*

Includes programs, practices, trends
- .91 Physically Handicapped**  
Includes home, hospital, special school instruction; vocational rehabilitation (formerly classified in 331.86)  
*For Employment of physically handicapped, see 331.59*
- .911 Blind and Partially Sighted**  
Instruction in Braille and other systems of reading  
Sight-saving classes
- .912 Deaf and Hard of Hearing**  
Manual and oral instruction      Training in speech;  
speech and lip reading for deaf
- .914 Speech Defectives**  
Correction of such speech defects as stuttering, articulating defects due to malformed teeth, palate, or to injury to nerve centers, as well as oral inactivity; disorders of voice and aphasia  
Speech defectives was formerly classified in 371.927  
*For Speech training for normal voice, see 808.52*
- .916 Crippled**
- .917 Delicate**  
Includes malnourished, incipient tuberculars, cardiacs, epileptics, and others not in perfect health; open-air schools (formerly classified in 371.718)
- .92 Mentally Handicapped**  
Low I. Q.'s      Mentally retarded or subnormal
- .927 It is recommended that Education of Those With Speech Defects be classified in 371.914**

- 371.93 Socially Exceptional**  
 Those who violate accepted social codes (delinquents, truants, so-called "problem children")  
 Includes special classes and educational programs of parental, state, training schools  
*For Organization and management of educational work in correctional institutions, see 365.66*
- .95 Gifted**  
 The high I. Q., bright or superior child, child with special talents
- .96 Exceptional Because of Class Distinction**  
 Education of princes, nobility
- .97 Exceptional Because of Race**  
 Education of racial minorities who require special educational facilities or create special problems (Indian in America, Chinese in California)
- .974 Negro**
- .98 Exceptional Because of Nationality or Socio-Religious group**  
 Education of national, religious or socio-religious minorities who create special educational problems or interests (the Jew in America, the French in Canada)
- 372 ELEMENTARY EDUCATION**  
 Principles    Organization    Curricula    Methods    Evaluation  
 Includes education in both public and private schools from informal preschool education to graduation from grammar school  
 Individual schools may be classified with type which they represent  
*For Organization, methods, discussed from other than the elementary school point of view, see level of school, 373, 374 or 378 or for general discussion, 371*
- .2 Early Childhood Education**  
 Principles    Organization    Curricula    Methods  
 Teacher training

**372.21 Kindergarten**

Includes nursery-kindergarten, kindergarten-primary; materials of instruction, development of social attitudes, language, appreciation of music and rhythms; use of play; work periods, songs, stories; works of educators influential in developing kindergartens, e.g. Froebel

**.24 Primary Schools**

Includes education in public and private schools from pre-school which stresses free play, handwork, story telling, training in habits to primary or first three grades of grammar school

**.242 Grammar or Elementary Schools**

Includes intermediate grades (4, 5, 6), upper grades (7, 8) in the usual type grammar school

*For Junior high school, see 373.2*

**372.3-372.8****EDUCATIONAL PROGRAM IN ELEMENTARY SCHOOLS**

*For grades one to eight*

**.3 Science and Nature Study in Elementary Grades****.4 Reading Spelling**

Includes methods of teaching oral and silent reading of native languages, materials such as primers, first readers, diagnostic and remedial treatment of reading of elementary students

*For Elementary readers used to teach reading of foreign languages, see 400, e.g. French first reader, 448.64; Diagnostic and remedial reading for other than elementary school students, 428.4*

**.42 Spelling****.5 Creative Arts in Elementary Grades**

Includes painting, drawing with different media, modeling, printing, poster work; crafts (weaving, needlecraft, paper work)

372.51

**Handwriting****.6****Language Arts in Elementary Grades**

Oral and written

Includes vocabulary building, art of conversation, dramatics, public speaking, conduct of meetings, letter writing, accounts, creative composition, formal aspects of grammar, punctuation, capitalization

*For Elementary texts for learning foreign languages, see Specific language*

**.7****Mathematics in Elementary Grades**

Number concepts; arithmetical processes of addition, subtraction, multiplication, division, fractions; problems

Includes diagnostic and remedial arithmetic

**.8****Other Studies in Elementary Grades**

Studies not provided for elsewhere may be divided like 000–999 or arranged alphabetically by subject

**.83****Social Studies**

Citizenship, civics, safety, health, geography, history studied from viewpoint of relationship of human beings to each other and physical environment in which they live

*For Individual social studies, see 372.8, e.g. Teaching of geography in elementary schools, 372.891; Health education, 371.76*

**.9****History of Elementary Education**

History      Reports      Catalogs

Includes public and private elementary schools and education

May be divided like 930–999, e.g. History of elementary education in Germany, 372.943

**373 SECONDARY EDUCATION**

Principles      Administration      Curricula      Methods  
Evaluation

Includes senior high schools and preparatory schools for boys, for boys and girls; diagnostic and remedial teaching

*For Schools for girls only, see 376; Vocational education in secondary schools, 371.426; Guidance work in secondary schools, 371.42*

**.2 Junior High Schools****.3-.9 History of Secondary Education**

History      Reports      Catalogs

Includes public and private secondary schools and education

May be divided like 930-999, e.g. The Boston Latin School, 373.744

**374 ADULT EDUCATION**

Voluntary, purposeful efforts of mature people toward self-development without such efforts becoming major activity

*For Special aspects of adult education (education for family and rural life, citizenship, consumer, civic, health, intercultural, vocational education) see specific kind of education, e.g. Vocational education, 371.426; Agricultural extension educational programs, 630.7; College and university extension, 378.13*

**.1 Self-education for Adults**

Directed or undirected home reading and study

*For Remedial reading, see 428.4*

**.2 Techniques and Media of Adult Education**

Includes production, distribution, use of educational material suited to purposes of adult education

**.21 Adult Education by Special Interest or Natural Groups**

Includes men and women's clubs (Junto, League of Women Voters), religious associations (Y.M.C.A.), trade unions

**.22 Reading and Reading-discussion Group Technique**

Includes People's Guild, Great Books Program

- 
- 374.24 Discussion Group Technique**  
Includes panels, symposiums, town meetings, round tables, forums, training for leadership of discussion groups
- .26 Use of Radio in Adult Education**  
Includes educational programs of local, state, college, university stations; "Groups for better listening" to develop discrimination and obtain better educational programs  
*For Use of radio as aid in teaching, see 371.333*
- .27 Use of Motion Pictures and Television in Adult Education**  
Includes use of documentary films; films to effect emotional attitudes and impart factual knowledge; films in service of business, advertising, public relations; combination of film and discussion (Film forums)  
*For Use of motion pictures as aid in teaching, see 371.335*
- .4 Correspondence Instruction for Adults**  
Includes private correspondence schools, U. S. Armed Forces Institute, college and university correspondence courses  
*For Correspondence courses for specific subjects, see subject, e.g. Correspondence course in shorthand, 653*
- .8 It is recommended that Continuation Schools be classified in 374.91**
- .9 Institutional Programs of Adult Education**  
*For Work of public library in adult education, see 021.2; Museums, 069.1; Universities and colleges, 378.13*
- .91 Schools, Centers, Institutes, Workshops**  
Includes adult schools (folk school, Cheltenham school); public school continuation and evening schools for adults and their work with forums, discussion groups; institutes (Brooklyn, Burton); centers (Boston Center for Adult Education)  
*Continuation schools was formerly classified in 374.8*
- .92 Churches**

374.93      **Adult Education Councils**.94-.99      **Government Activity in Adult Education**

Local, state, federal programs of adult education

Includes emergency programs, in-service training

May be divided like 940-999

375      **CURRICULUM      COURSE OF STUDY**

Theory and principles      Construction      Evaluation and re-  
vision of curriculum

Curriculum is considered as systematic group of courses or sequence of subjects, or general over-all plan of content or materials of instruction; is differentiated from "course of study" which is considered as an official guide to aid in teaching given subjects or areas of study

*For Curriculum for specific level of school, see kind of school, e.g. Curriculum for junior high, 373.2; Curriculum of specific subject, 375.01-.9, e.g. Curriculum in the social sciences, 375.3*

.01-.9      **Curricula and Courses of Study in Specific Subjects**

May be divided like 010-999, e.g. Science in the curriculum, 375.5; Courses in English for junior high, 375.42; or arranged alphabetically by subject

*For Curricula and courses of study for elementary subjects, see 372.3-.8*

*Where interest in course of study or curriculum for specific subject area lies with subject, class with subject, e.g. "Science in education; its aim and methods" would probably be more useful in 507 than in 375.5 in a scientific library*

376      **EDUCATION OF WOMEN**

Includes private and public elementary and secondary schools for girls; question of coeducation

.8      **Colleges for Women**

Description      History      Handbooks      Bulletins      Catalogs

.9      **History of Education of Women**

May be divided like 930-999

377

**RELIGIOUS AND MORAL EDUCATION**

Includes interrelation of church, state, education; problems and activities peculiar to sectarian schools

*For Religion in curriculum or course of study, see 375.2; Catalogs, history of denominational schools, 372, 373, or 378, disregarding denomination; Education of religious workers, 207*

**.1 Problems of Religious and Bible Instruction**

Controversial material on religious and Bible instruction in public schools and non-sectarian private schools

*For Religious education, see 268 or 375.2*

**.2 Character Education**

*For Moral, ethical, or character education in curriculum, see 375.1*

**.5 Parochial Schools****.8 Christian Church and Education**

Problems, programs, evaluation of church education

May be divided like 280

*For Specific sectarian schools, see level of school, e.g. Georgetown Prep School, 373*

**.9 Non-Christian Religions and Education**

May be divided like 290

378

**COLLEGE AND UNIVERSITY EDUCATION**

Purpose      Scope      Curricula      Trends

*For Curriculum in specific areas, see 375.01-9; Students' life, 371.8; Higher education for women, 376.8; Methods of college teaching, 371.3*

**.1 Organization and Administration**

Includes public relations, finance, management

**.11 Administrative officers**

Functions of president, dean, registrar, comptroller, boards of trustees

## 378.12

**Faculty**

Includes exchange, academic freedom, other problems peculiar to college and university faculties

*For Problems of teaching personnel, e.g. pensions, salary, tenure, teaching load, see 371.1*

## .13

**University Extension**

Includes academic and professional programs and courses offered on or off campus, lecture series, services of lecturers to groups, alumni education

*For University and college correspondence courses, see 374.4*

## .15

**Types or Levels of Higher Education**

Includes junior college, undergraduate and graduate work

*For Specific institutions of higher learning, see 378.4-.9*

## .2

**Academic Degrees**

Includes requirements for degrees (subjects, residence, examinations, dissertations), honors, academic costume

## .3

**Encouragement of Advanced Study and Research**

Includes endowments, foundations, fellowships, scholarships (Carnegie Corporation, Nobel Foundation)

## .36

**Student Aid**

Includes loan funds, student aid associations, assistance in finding jobs for self-support

*For Placement advice for alumni, see 371.427*

## .4-.9

**Higher Education in Specific Countries or Institutions**

History      Reports      Catalogs

May be divided like 940-998, or arranged alphabetically by name of institution

*For Women's colleges, see 376.8-.9*

## .99

**Professional and Technical Education in Institutions of Higher Learning**

May be divided like classification 010-999

Where interest in professional or technical education lies chiefly in subject field, class with subject

---

379      **EDUCATION AND THE STATE****.1      Public Education**

All tax-supported education as contrasted with private and parochial education

**.11      Financial Administration of Public Education**

Expenditures      Fiscal policies      Costs      Accounting  
School funds      Debt      Budgetary practice

**.12      Federal and State Aid to Public Education**

Includes exemption from taxation, allocation of funds, subsidies, land grants

**.13      Local Support of Public Education**

Includes taxation, endowments, non-resident tuition, bond issues

**.14      Public Education Laws and Legislation**

May be divided like 930-999

**.15      Organization and Administration of Public Education**

Includes setting of standards, accrediting, question of centralization or decentralization of control

**.151      Federal Supervision and Control****.152      State Organization and Administration of Public Education**

Includes activities of state boards of education, state superintendents

**.153      Local Organization and Administration of Public Education**

Functions      Powers      Duties

Includes elected or appointed county, city, district boards of education; trustees

*For Superintendents, principals, supervisors employed locally, see 371.1*

**.156      Control of Textbooks Used in Public Education**

State or local regulation of selection, publication, provision, price of text books used by public education institutions

- 
- 379.16      **Public Institutions of Higher Learning**  
Discussion of tax supported colleges and universities  
For Specific institutions, see 378.4-.9
- .17      **Public Secondary and Elementary Education**  
Includes discussions of theory, provisions for, functions of  
tax-supported secondary and elementary education  
For Specific institutions, see level of school, e.g. Western  
High School, 373
- .173      **Public Education in Rural Areas**  
For Method, curriculum, see subject, e.g. Methods of teach-  
ing in rural grade school, 371.3
- .175      **Centralization of Public Education Facilities**  
Includes consolidated schools, transportation for students
- .2      **Illiteracy**  
Includes problems caused by illiteracy; surveys, statistics, control  
of illiteracy
- .4-.9      **History of Public Education**  
Includes reports of commissions, boards  
May be divided like 940-999  
For History of education in general, see 370.9; History of  
specific types or levels of education, type or level, e.g. His-  
tory of adult education movement, 374.09; History of ele-  
mentary education in U. S., 372.973

## 380 COMMERCE

Trade or exchange of commodities

*For Commercial law, see 347.7; Commercial geography, 911.3*

### 380.1 Commercial Theory

It is recommended that Material more properly related to Production and Economic policy be classified in 338, e.g. Business cycles, 338.54; Government corporations, 338.74; Public utilities, 338.39

### 381 DOMESTIC TRADE

Exchange of commodities within a country

Includes interstate commerce; domestic trade practices, barriers, regulations; trade associations

### 382 INTERNATIONAL TRADE

Trade between countries or between mother country and colony

Includes foreign trade practices, trading companies

*For Protection and regulation of international trade, trade agreements, see tariff policy, 337; Shipping and commercial routes, 387.5*

#### .5 Import Trade

Collection of commodities from abroad for distribution by home traders

#### .6 Export Trade

Sending commodities produced or collected in home country to countries abroad

Includes balance of trade

### 383 POSTAL COMMUNICATION

Transport of mail by rail, air, ocean facilities

#### .1 Postal Services

Includes classes of mail, mail rates, mail delivery

#### .2 Postage Stamps

#### .22 Philately

Collection and study of stamps, stamped envelopes

**383.4      Postal Systems**

Includes international mail systems

**.49      National Postal Systems**

May be divided like 930-999, e.g. Postal system of England, 383.4942

**384      COMMUNICATION**

Administration      Regulation      Finance      Facilities (com-  
panies, stations)      Services

Transmission of ideas and information

Includes telecommunication

*For Mass communication, see 301.243; Electric communication engineering, 621.38*

**.1      Telegraphy**

*For Telegraph engineering and operation, see 621.382*

**.5      Radiocommunication**

*For Radio engineering and transmitting, see 621.384*

**.55      Television Communication**

*For Television engineering and transmitting, see 621.388*

**.6      Telephony**

*For Telephone engineering and operation, see 621.385*

**385      TRANSPORTATION**

Administration      Regulation      Finance      Facilities (routes,  
vehicles, terminals)      Services

Conveyance of persons and goods

Includes traffic or business of transportation; competition between transportation systems; reports of Interstate Commerce Commission, public service commissions

*For Transportation engineering, see 625; Transportation insurance, 368.2; Architecture of transportation terminals, 725.3; Channels of Communication in city planning, 711.7*

**385.1 Railroad Transportation**

Administration Regulation Facilities (routes, trains,  
terminals) Services History

Transportation and traffic on rail routes

*For Railroad engineering, see 625.1; Street railroads, 388.4*

**.13 Railroad Finance**

Includes valuation, subsidies, taxation of railroads

**.132 Railroad Rates**

Determination and regulation of passenger, express, freight rates

**.2 Railroad Companies**

Includes trains, schedules, services, private car companies (Pullman, Express)

*For Rolling stock, see 625.2; Railroading, 625.27*

**386 INLAND WATERWAY TRANSPORTATION**

Administration Regulation Finance Facilities (routes, vessels, terminals) Services

Transportation and traffic on inland water routes (rivers, lakes, canals)

*For Inland waterway engineering, see 627.1*

**.3 River Transportation****.4 Canal Transportation****.5 Lake Transportation****.8 Inland Ports and Harbors**

*For Ocean and inland ports treated together, see 387.1; Harbor engineering, 627.2; Port engineering, 627.3*

**387 MARINE TRANSPORTATION**

Administration Regulation Finance Facilities (routes, ships, terminals) Services

Transportation and traffic on ocean routes

*For Marine engineering, see 623.87*

- 
- 387.1      **Ocean Ports and Harbors**  
            Port and terminal facilities  
            Includes inland and ocean ports treated together  
                For Inland ports, see 386.8; Harbor engineering, 627.2;  
                Port engineering, 627.3
- .11        **Port Guides**  
            Includes port regulations, charges
- .12        **Individual Ports and Harbors**  
            Includes river, bay, combination, open roadstead ports
- .13        **Free Ports and Harbors**  
            Foreign-trade zones
- .2         **Ship Registers**  
            Includes lists of vessels; their classification, rating, tonnage
- .5         **Merchant Marine**  
            Water-borne commerce  
                For Maritime law, see 347.7; Marine insurance, 368.22
- .51        **Shipping**  
            Water transport or carrying business  
            Includes shipping practice (cargo handling stowage) long-shoremen or stevedores
- .52        **Trade Routes**  
            Ocean routes and commerce
- .522       **Intercoastal Routes and Shipping**  
                For International trade, see 382
- .524       **Coastwise Routes and Shipping**  
                For Domestic trade, see 381
- .54        **Steamship Lines**  
            Includes ocean liners, schedules, services
- .55        **Salvage**  
            Includes underwater salvage operations (submarine diving)

---

**387.7 AIR TRANSPORTATION**

Administration    Regulation    Finance    Facilities (routes,  
airliners, terminals)    Services

Commercial aeronautics or transportation and traffic on air  
routes

*For Aeronautics, see 629.1*

**.72 Airways**

Aerial routes or connecting links between airports

Includes route accessories (beacons, markers)

**.73 Air Terminals**

Includes airports, landing fields

**.74 Air Lines**

Includes air liners, schedules, services

**388 HIGHWAY TRANSPORTATION**

Administration    Regulation    Finance    Facilities (routes,  
motor vehicles, terminals)    Services

*For Highway engineering, see 625.7*

**.3 Automotive Transportation**

Motor bus, taxicab, trucking companies; their motor carriers,  
schedules, services

*For Automotive engineering, see 629.2; Traffic engineering,  
625.79*

**.4 Local Transit**

Includes street railroads

**389 STANDARDIZATION**

Includes standardization of weights and measures

*For Time systems and standards, see 529.7*

## 390 CUSTOMS

Customs are habits and conventions that have become traditional  
*For Social psychology, see 301.1; Social institutions, 301.4;*

- .1      **Morphology and Inflection**
- .2      **Syntax**  
Includes arrangement of words, parts of speech
- 426      It is recommended that **PROSODY** be classified in 808.1
- 427      **PATOIS      SLANG      DIALECTOLOGY**
- .02      **Middle English (1101-1500)**  
For Old English, see 429; Modern English, 420's
- .09      **Slang**  
For American-English slang, see 427.9
- .1-.8      **Dialects**  
May be divided like 942.1-.8, e.g. Cockney dialect, 427.1
- .9      **Dialects not Provided for Above**  
Includes American-English, New Zealand-English
- 428      **TEXTS FOR LEARNING ENGLISH LANGUAGE**  
Designed primarily for use outside elementary schools for those who need the rudiments of or correction in oral or written English
- For Texts for learning other languages, see language, e.g. *Elementary French Reader for Americans*, 448.64
- .1      **Spelling Books**  
For Spelling books designed for use in elementary schools, see 372.42
- .2      **Elementary or "First" Books**  
Combined grammar, composition, vocabulary and exercises for use by those whose native language is English
- For Language arts in elementary schools, see 372.6; *Elements of English grammar*, 425; *English composition*, 808

- 
- 428.24      **"First" Books for Those Whose Mother Tongue Is Not English**
- .25      **Modifications of English**  
             Includes Basic English
- .3      **Use of Words**  
             Includes errors of speech, vulgarisms  
             For *Slang*, see 427.09; *Synonyms*, 424; *Vocabulary*, 423
- .4      **Remedial Reading**  
             Includes reading beyond "elementary"
- .6      **Elementary or "First" Readers**  
             Combined literary selections or compositions, vocabularies  
             and exercises for use by those whose native language is English  
             Includes adult education readers  
             For *English composition*, see 808; *Reading in elementary schools*, 372.4
- .64      **Readers for Those Whose Mother Tongue is Not English**
- 429      **OLD ENGLISH (ANGLO-SAXON), 500-1100 AD**

## 430 GERMAN

431-439 may be divided like 420; expansion in 437 and 439 follows:

- 437.01 Old High German to 1100
- .02 Middle High German 1101-1500
- .9 Yiddish
  - Yiddish was formerly classified in 492.49
- 439 GERMANIC LANGUAGES
  - Includes Frisian, Anglo Frisian, Old Saxon, and Gothic
  - .3 Netherlandish and Low German Dialects
  - .31 Dutch
  - .32 Flemish
  - .36 Afrikaans
  - .4 Plattdeutsch (Modern Low German)
  - .5 Scandinavian
    - .6 Old Norse Icelandic Faroese
    - .7 Swedish
    - .8 Danish Norwegian
    - .81 Danish
    - .82 Norwegian

## 440 FRENCH

*For Romance languages, see 479.1*

441–449 may be divided like 420; expansion in 447 and 449 follows:

- 447.01      Old French (to 1400)
- .02      Middle French (1401–1600)
- .03      Modern French (1601–1850)
- .9      Canadian and Creole French
- 449      PROVENÇAL
- .9      Catalan

## 450 ITALIAN

*For Romance languages, see 479.1*

451–459 may be divided like 420; expansion in 457 and 459 follows:

- 457.01      Old Italian (to 1300)
- .02      Middle Italian (1301–1600)
- .03      Modern Italian (1601–1875)
- 459      RUMANIAN
- .9      Romansch (Rhetic)

## 460 SPANISH

*For Romance languages, see 479.1*

461–469 may be divided like 420; expansion in 467 and 469 follows:

- 467.01        Old Spanish (to 1100)
- .02        Middle Spanish (1101–1600)
- .03        Modern Spanish (1601–1850)
- 469        PORTUGUESE
- .701        Old Portuguese (to 1100)
- .702        Middle Portuguese (1101–1600)
- .703        Modern Portuguese (1601–1850)
- .9        Galician

## 470 LATIN

*For Classical languages, see 489.1*

471–479 may be divided like 420; expansion in 477 and 479 follows:

- 477.01      Old Latin (to 80 BC)
- .02      Classical Latin (81 BC–117 AD)
- .03      Post-classical Latin
- .05      Vulgar Latin
- 479      OTHER ITALIC      MEDIEVAL AND MODERN  
   LATIN (CHURCH LATIN)
- .1      Romance Languages

## 480 GREEK

*For Classical languages, see 489.1*

481-489 may be divided like 420; expansion in 487 and 489 follows:

- |        |                      |              |
|--------|----------------------|--------------|
| 487.01 | Classical Period     |              |
| .02    | Hellenistic Period   |              |
| .03    | Biblical Period      |              |
| .04    | New Testament Period |              |
| .05    | Medieval Period      |              |
| 489    | HELLENIC GROUP       | MODERN GREEK |
| .1     | Classical Languages  |              |

## 490 OTHER LANGUAGES

Includes Oriental languages

491

### INDO-EUROPEAN LANGUAGES

#### INDO-HITTITE

491.54, .62, .66, .7, .81, .84, .85, .86, .92, .93 may be divided like 420

- .1       Indo-Iranian     Indic
- .2       Old Indic     Sanskrit
- .3       Prakrit     Pali
- .4       Modern Indic  
         Includes Hindi, Urdu, Bengali, Marathi, Gujarati, Hindustani, Panjabi, Sindhi, Romany (formerly classified in 397)
- .5       Iranian  
         Includes Avestan, Old Persian, Baluchi, Pamir dialects, Pashto
- .54       Armenian
- .55       Modern West Iranian (Modern Persian)
- .6       Italo-Celtic     Celtic  
         Includes Gaelic: Scotch Gaelic; Cornish, Breton, Gaulish
- .62       Irish
- .66       Welsh
- .69       It is recommended that Basque be classified in 499.9
- .7       Slavic     Russian
- .7701       Old Russian (1101-1550)
- .7702       Middle Russian (1551-1750)
- .7703       Modern Russian (1751-1920)
- .79       Ukrainian
- .8       Windish     Moravian     Slovak     Croatian     Polabian
- .81       Bulgarian
- .82       Serbian

- 491.84      **Slovene**
- .85      **Polish**
- .86      **Czech (Bohemian)**
- .9      **Baltic**  
              Includes Old Prussian, Latvian
- .92      **Lithuanian**
- .93      **Lettish**
- .99      **Other Indo-European Languages**  
              Includes Hittite and its group, e.g. Anatolian (Hittite proper, Hieroglyphic Hittite, Luwian, Lycian, Lydian); Tokharian, Kuchean
- .991      **Thracio-Illyrian**  
              Includes Albanian, Illyrian, Thracian, Phrygian  
              For Armenian, see 491.54

## 492      **SEMITIC LANGUAGES**

492.1-.9 may be divided like 420

- .1      **Aramaic**
- .19      **Assyrian      Babylonian**
- .2      **Chaldean**
- .3      **Syriac language**
- .4      **Hebrew**
- .49      It is recommended that **Yiddish** be classified in 437.9
- .5      **Samaritan**
- .6      **Phoenician      Punic      Carthaginian**
- .7      **Arabic**
- .8      **Ethiopian**  
              Includes Gez, Tigrinya, Tigré, Amharic, Gafat, Harari, Gurage  
              For Hamitic Ethiopian languages, see 493.5
- .9      **Himyaritic (Mineo-Sabean)**  
              Includes Sabean, Minean, Mahra, Soqatra, Qataban, Awsan, Libyanite, Thamudian, Safaitic

- 
- 493      **HAMITIC LANGUAGES**  
493.1-.2 may be divided like 420
- .1      **Old Egyptian**
- .2      **Coptic**
- .3      **Libyan or Berber Group**  
Includes Algerian Kabyle, Mozabi, Moorish, Touarik or Touareg
- .5      **Hamitic Ethiopian (Cushitic)**  
Includes Somali, Galla, Beja (Bedawye), Afar, Saho, Agaw (Aghagha)
- 494      **TUNGUZIC, MONGOLIC, TURKIC,  
SAMOYED, FINNO-UGRIC AND  
HYPERBOREAN LANGUAGES**
- .1      **Tunguzic**  
Includes Tungus proper, Lamut, Manchu
- .2      **Mongolic**  
Includes Kalmuk, Buryat
- .3      **Turkic**  
Includes Yakut, Uryanhay (Uigur), Kirghiz, Nogay, Turkmen, Chuvash
- .35      **Turkish Proper (Osmanli)**  
May be divided like 420
- .4      **Samoyed**  
Includes Yurak, Yenisey, Tawgi, Ostyak (Samoyed), Kamas  
For Ostyak (Ugric), see 494.5
- .5      **Finno-Ugric**  
Includes Obi-Ugric, Vogul, Ostyak (Ugric) Finnic or Volga, Mordvinian, Cheremiss, Zyrian or Komi, Votyak or Udmurt, Karilian  
494.511-.55 may be divided like 420
- .511      **Hungarian (Magyar)**

496.5      **Sudanese**

497      **NORTH AMERICAN LANGUAGES**

Based on G. L. Trager      A bibliographic classification system  
for linguistics and languages      Studies in Linguistics, v. 3 1945

.1      **Eskimoan**

.15      **Aleutian**

.2      **Na-Dene: Haida, Dene**

Includes Tlingit; Athabascan (Athapaskan); Chipewyan,  
Apachean, Navaho, Chiricahua, Mescalero, Jicarilla, Kiowa  
Apache

.3      **Algonkian-Mosan: Algonkian-Ritwan, Beothuk, Kutenai,  
Mosan**

Includes Mikmak, Abnaki, Delaware, Natick, Cree, Wiyot,  
Nootka, Kwakiutl, Salish, Kalispel

.4      **Macro-Penutian: Penutian, Azteco-Tanoan, Tunican,  
Mayoid, Totonac**

Includes Coos, Tsimshian, Mixe, Sahaptian, Nez Percé, Sho-  
shoni, Nahuatl, Taos, Maya, Yucatec, Pokonchi, Chinook,  
Klamath, Pima Alto (Papago, Piato, Himeri)

.5      **Hokan-Siouan: Hokan-Coachuiltecan, Yukian, Keresan,  
Iroquois-Caddoan, Siouan-Muskogean**

Includes Yuman, Huron, Mohawk, Seneca, Cherokee, Dakota,  
Santee, Taensa, Old and New Creek (Muskogee), Timukian,  
Choctaw (New)

.6      **Macro-Otomanguean: Otomanguean, Mixtecan, Zapotecan,  
Chinantecan**

Includes Otomi, Mazahua, Popoloca, Chocho, Mazatec,  
Chorotegan, Chiapanec, Mixtec, Chatino

.7      **Tarascan**

.8      **Miskito-Matagalpan: Miskito (Mosquito), Suman,  
Matagalpan**

Includes Mam (Miskito), Ulva, Tawahkan, Panamakan, Ku,  
Bambana, Baymunana, Cacaoopera

- 
- 498      **SOUTH AMERICAN LANGUAGES**  
Includes Chibchan, Kechuan, Aymara, Cunza-Diaguita, Al-  
lentic, Millcayac, Tucano
- 499      **AUSTRONESIAN**  
For Austro-Asiatic languages (Annamese, Munda), see 495
- .1      **Papuan**
- .2      **Indonesian**  
Includes Malagassy, Philippine languages (Tagalog), Cha-  
morro (Marianas-Saipan), Javanese, Malay
- .4      **Polynesian**  
Hawaiian, Rapanui (Easter Islands)
- .5      **Melanesian      Micronesian (Isolated Islands)**
- .6      **Australian**
- .9      **Other Languages**  
Includes Basque (formerly classified in 491.69)
- .96      It is recommended that **Caucasic Languages** be classified  
in 494.8

# 500 Pure Science

---

*For Specific subjects in Pure science, see 510–590, e.g. Inorganic chemistry, 546; Atomic physics, 539; Applied science, 600; Form divisions 1–9, p. lv*

## 510 MATHEMATICS

510.78      **Computation Instruments and Machines**  
Where interest in computation machines lies chiefly with electronics, class in 621.34 .

.83      **Mathematical Tables**  
Includes collections, elementary functions

### 511      **ARITHMETIC**

.2      **Number Theory**  
*For Algebraic number theory, see 512.81; Analytical number theory, 518.5*

.8      **Mercantile Rules**  
Includes interest tables, mensuration

### 512      **ALGEBRA**

Includes high school and elementary algebra

.5      **Combinatory Algebra**  
Permutations, combinations, partitions

.8      **Abstract Algebra**  
Includes determinants, matrices, quantics (theory of forms), invariant theory

.81      **Algebraic Number Theory**

.82      **Theory of Equations**

.85      **Algebraic Theory of Vectors and Quaternions**

.86      **Group Theory**  
Includes continuous groups, transformations, substitutions

.88      **Invariant Theory**

.89      **Special Topics in Algebra**  
Includes lattices, rings, ideals

.9      **Problems in Algebra**

**513 GEOMETRY**

Inclusive material on plane and solid geometry

Includes n-dimensional Euclidean synthetic geometry

For Descriptive geometry, see 515; Mechanical drawing, 744

**.01 Foundations and Philosophy of Geometry**

**.1 Elementary Plane Euclidean Synthetic Geometry**

**.3 Elementary Solid Euclidean Synthetic Geometry**

**.5 Advanced Euclidean Synthetic Geometry**

Plane and solid

**.8 Non-Euclidean Geometry**

**.83 Combinatorial Topology (Analysis Situs)**

**514 TRIGONOMETRY****515 DESCRIPTIVE GEOMETRY****516 EUCLIDEAN ANALYTIC GEOMETRY**

**.5 Projective Geometry (Analytic and Synthetic)**

Includes special configurations (curves and surfaces)

**.7 Differential Geometry**

**.8 Vectors    Tensors    Quaternions**

**.9 Problems in Geometry**

**517 CALCULUS**

Includes elementary, advanced calculus

**.1 Theory of Functions of Real Variable**

Includes development of number system, theory of sets, transfinite numbers; functional analysis (Hilbert space); theory of measure

**.2 Series, Products and Other Infinite Expansions**

Includes divergent series, summability methods, orthogonal series, Fourier series

**.3 Integration and Differentiation**

Includes theory and tables of integrals

- 
- 517.35 It is recommended that **Bessel Functions** be classified in 518.3
- .36 It is recommended that **Elliptic Functions** be classified in 518.4
- .37 **Integral Equations**
- .38 **Elementary Differential Equations**  
Ordinary and partial
- .4 **Calculus of Variations**
- .6 **Finite Differences**  
Includes numerical analysis; nomography and graphical methods
- .7 **Operational Methods**  
Includes Fourier integrals, Fourier and Laplace transformations
- .8 **Theory of Functions of Complex Variables**  
Includes theory of functions of several complex variables and special topics in analysis
- .9 **Problems in Analysis**
- 518 **SPECIAL FUNCTIONS**
- .1 **Gamma Functions**
- .2 **Legendre Functions**
- .3 **Bessel Functions**  
Formerly classified in 517.35
- .4 **Elliptic Functions and Integrals**  
Formerly classified in 517.36
- .5 **Riemann-zeta Functions and Analytical Theory of Numbers**
- 519 **PROBABILITY**
- .1 **Philosophical Foundations and History of Probability**
- .8 **Treatment of Experimental Data**  
Includes least squares

- 
- 519.9      **Mathematical Theory of Statistics**  
Where interest in mathematical statistics lies chiefly in statistics, class in 311.2
- .92      **Design of Experiments**
- .93      **Mathematical Theory of Sampling**  
Includes theory of quality control

## 520 ASTRONOMY

### 521 CELESTIAL DYNAMICS

Includes theoretical astronomy, orbits, perturbations

For *Law of gravitation*, see 530.1; *Motions of individual bodies*, 523, 525

### 522 OBSERVATORIES AND INSTRUMENTS

Includes photometer, spectroscope, bolometer

#### .1 Observatories

#### .2 Telescopes

#### .5 Auxiliary Instruments

#### .6 Observational Techniques

Includes photometry, photography, polarimetry, spectroscopy

### 523 DESCRIPTIVE ASTRONOMY ASTROPHYSICS

Descriptive astronomy is general description of celestial bodies and astronomical laws; Astrophysics deals principally with physical and chemical nature of heavenly bodies

Includes so called "popular astronomy"

#### .1 Universe

Includes structure of galactic system; cosmogony: theory of origin and evolution of parts of universe (formerly classified in 113)

#### .2 Solar System

Includes motions of solar system; constitution of planetary system

#### .3 Moon

Includes motion, surface features (atmosphere, craters), size, heat, light, eclipses, physical condition

#### .4 Planets

Distance, motions, physical condition

#### .5 Meteors and Zodiacal Light

Includes meteorites

- 
- 523.6      **Comets**  
             Orbits, physical constitution, remarkable comets
- .7      **Sun**  
             Includes dimensions, motions, internal constitution
- .72     **Heat and Light**  
             Includes solar radiation
- .74     **Physical Appearance**
- .77     **Spectrum**
- .78     **Eclipses**
- .8      **Stars**  
             Includes physical constitution
- .81     **Stellar Parallax**      **Distance**
- .82     **Heat and Light**      **Magnitudes**
- .83     **Proper Motions**      **Radial Velocity**
- .84     **Variable, Double, Multiple Stars**  
             Includes novae
- .85     **Clusters**
- .87     **Spectrum**
- .89     **Constellations**      **Maps**      **Catalogs**
- 524      It is recommended that **ASTRONOMICAL MAPS AND TABLES** be classified with specific subjects, e.g. **MAPS OF STARS, 523.89; OBSERVATORY PUBLICATIONS, 522.1**

525      **EARTH**

- .1      **Constants**  
             Mass, weight, density, distance from sun, parallax, shape, dimensions  
             For Determination of size and shape of the earth, see 526.1
- .3      **Orbits and Motions**
- .5      **Seasons**

- 525.6      Tides**  
Includes mathematical theory
- .69      Tide Tables**
- 526      GEODESY**  
Science of measuring portions of earth's surface by triangulation and astronomical observations; determination of magnitude and figure of the earth
- .1      Determination of Properties, Size and Shape**  
Includes determination of geoid by deflections of the vertical, of spheroid by geodetic-astronomic method of flattening by gravity measurements, astronomic methods  
*For Isostasy, see 551.15*
- .2      Geodetic Work Completed or Projected**  
Includes lists of geodetic data, operations in various countries
- .3      Geodetic Surveying**
- .31      Reconnaissance Surveys**
- .33      Triangulation**  
Includes base and precise traverse measurements, angle measurements, triangulation computation and adjustment (formerly classified in 526.4)
- .36      Precise Spirit Leveling**  
Includes instruments, field methods; orthometric and dynamic theory; computation and adjustment of observations; general questions of mean sea level
- .38      Trigonometrical Leveling**  
Geodetic refraction  
Zenith distances (observations, calculations and adjustment)
- .4      It is recommended that Computation of Triangulation be classified in 526.33**

**526.6 Geodetic and Positional Astronomy**

Includes application of spherical astronomy to geodesy resulting in geodetic latitude, longitude, azimuth; considerations in accurate measurement of positions of bodies or points on celestial sphere (relative deflections of the vertical, topographic and isostatic reductions, Laplace stations and their use in triangulation)

*For Astronomical latitude, longitude, azimuth, see 527*

**.7 Physical Geodesy**

Study of gravity and gravitation; determination of intensity of gravity

Includes methods, instruments

**.8 Cartography**

Compilation, drafting, editing of maps and charts; map reproduction

*For Military sketching, map making and reading, see 623.71*

**.9 Surveying**

Obtaining data for maps

*For Geodetic surveying, see 526.3*

**.91 Plane Surveying**

Includes instruments, methods

**.92 Boundary Surveying****.98 Topographic Surveying**

Use of contours or comparable symbols on maps to show physical features, e.g. mountains, valleys, plains

Includes photogrammetric methods (field methods and instruments, office methods and plotting instruments)

*For Military photogrammetry, see 623.71*

**.99 Hydrographic Surveying****527 CELESTIAL NAVIGATION**

Determining position of ship from observations of heavenly bodies

Includes astronomical latitude, longitude, azimuth

*For Air navigation, see 629.125; Navigation, 623.89*

- 528      **NAUTICAL ALMANACS AND EPHEMERIDES**  
          *For Air almanacs, see 629.125*
- 529      **MEASUREMENT OF TIME**  
          Includes sidereal and solar day
- .2      **Intervals of Time**  
          Includes eras, kinds of years, months, weeks, decades
- .3      **Calendars**  
          Includes ancient and non-Christian calendars
- .4      **Christian Calendars**
- .5      **Projected Reform of Calendar**
- .7      **Determination of Time**  
          Includes methods, time systems and standards, instruments  
          (dials, hourglasses, clocks, watches)  
          *For Construction and repair of time measuring instruments,*  
          *see 681.1*

## 530 PHYSICS

- 530.1 **Theory of Physics**  
Includes statistical mechanics, wave mechanics, quantum mechanics, relativity, gravity (formerly classified in 531.5)  
*For Theory of thermodynamics and statistical mechanics, see 536.1 . Pr. Physics - 530.7*
- 531 **MECHANICS OF SOLIDS**  
*For Thermodynamic properties of solids, see 536.43*
- .2 **Rigid Bodies**  
Includes graphic statics, static equilibrium, kinematics of mechanisms, dynamics of point masses, velocity, acceleration, acceleration of gravity, translation and rotation of rigid bodies
- .3 **Elastic Bodies**  
Includes stress and strain distribution, elastic instability, vibration, impact  
*For Engineering properties of materials, see 620.11*
- .5 It is recommended that Gravity be classified in 530.1
- 532 **MECHANICS OF LIQUIDS**  
Use as comprehensive number for Mechanics of fluids (liquids and gases)  
*For Thermodynamic properties of liquids, see 536.42*
- .2 **Hydrostatics**  
Includes pressure, buoyancy
- .5 **Hydrodynamics**  
Includes flow in pipes and channels, water waves, cavitation, liquid lubrication
- 533 **MECHANICS OF GASES**  
*Includes Kinetic theory of gases 533.7*  
*For Meteorology, see 551.5*
- .1 **Properties of Gases**  
*For Thermodynamic properties of gases, see 536.44*

**533.12      Equilibrium Properties of Gases and Vapors**

Compressibility, vapor pressure

**.13      Transport Properties of Gases**

Includes viscosity, diffusion

**.6      Aerodynamics**

*For Aerodynamics of flight, see 629.123*

**534      SOUND**

Includes acoustics

*For Architectural acoustics, see 729.2*

**.1      Generation of Sound Waves****.2      Propagation of Sound Waves**

Includes diffraction, transmission, and absorption of sound waves in continuous media

*For Sound velocity in gases, see Mechanics of gases, 533*

**.4      Measurements of Sound Waves**

Includes measurement of frequency and intensity

**.5      Ultrasonics**

Includes generation of sound waves above audible range, their use in determining properties of material

*For Engineering properties of materials, see 620.11*

**535      OPTICS**

Includes light, infra-red and ultra-violet radiation

*For Electron optics, see 537.1*

**.1      Theoretical Optics****.2      Physical Optics****.3      Geometrical Optics**

Includes refraction and reflection, design of optical instruments

*For Use of optical instruments, see 535.8*

**.5      It is recommended that Polariscope be classified in 535.8**

535.6

**Physiological Optics**

Includes light values, vision, color

*For Physiology of the eye, see 612.8; Optometry, 617.7*

.65

**Luminescence**

Includes fluorescence, phosphorescence

*For Fluorescent lighting, see 621.32*

.66

**X-rays**

*For Application, see subject, e.g. Roentgen rays in medical diagnosis, 616.07; Radiographic testing, 620.112; X-ray determination of crystal structure of matter, 548.83*

.8

**Applications of optics**

*ultra violet infra Red red*

Includes use of lens, microscope, telescope, spectroscope, polariscope (formerly classified in 535.5)

*For Specific application, see specific number, e.g. Interpretation of line spectra, 539.8; Interpretation of band spectra, 539.1; Spectroscopic analysis in Analytical chemistry, 544 and 545.4*

.89

**Experimental Optical Techniques**

Includes methods of producing and measuring optical phenomena and properties, transmittance

536

**HEAT**

.1

**Theory of Thermodynamics and Statistical Mechanics**

*For Chemical thermodynamics, see 541.36; Engineering thermodynamics, 621.01*

.2

**Transmission of Heat**

Conduction, convection, radiation

*For Chemical engineering including heat transfer, see 660.28*

.4

**Thermodynamic Properties of Matter**

.42

**Liquids**

.43

**Solids**

.44

**Gases**

.5

**Temperature and Temperature Measurements**

- 
- 536.56      **Cryogenics**  
Production of very low temperature; properties of matter at very low temperatures  
For Superconductivity, see 537.22
- .57      **High Temperatures**  
Combustion, explosion  
For Fuel technology, see 662.6; Explosives, 662.2; Heating systems, 697
- .6      **Calorimetry**
- 537      **ELECTRICITY AND MAGNETISM**  
Magnetism was formerly classified in 538  
For Atmospheric electricity, see 551.56; Terrestrial magnetism, 551.16; Electric measurements, 621.37
- .1      **Theoretical Electricity and Magnetism**  
Includes electron optics
- .12      **Electromagnetic Fields and Waves**  
Electromagnetism was formerly classified in 538.3  
Includes microwaves, wave guides  
For Microwave spectroscopy, see 539.1
- .2      **Electrical Properties of Matter**  
For Engineering properties of materials, see 620.11
- .22      **Dielectrics**  
Includes capacitor (condenser), electric dipole moments, conductivity, superconductivity, semiconductors  
For Dielectric constants in chemistry, see 541.8; Dipole moments in chemistry, 541.8
- .3      **Magnetic Properties of Matter**  
For Engineering properties of materials, see 620.11
- .4      It is recommended that Atmospheric Electricity be classified in 551.56

**539.753            Transmutations**

**.76            Nuclear energy**  
                  "Atomic energy"

**.77            Experimental Techniques and Instrumentation**  
                  Includes particle detectors: ionization chambers, counter  
                  tubes (Geiger-Müller), expansion chambers (cloud cham-  
                  bers), electrometers, photographic emulsions; special cir-  
                  cuits; amplifiers

*For Particle accelerators, see 539.73*

**.8            Atomic Structure**

                  Includes line spectra, atomic energy levels, ionization poten-  
                  tials

## 540 CHEMISTRY

For Biochemistry, see 574.19; Legal chemistry or forensic ballistics, 364.12; Chemical engineering, 660.28

### 541 PHYSICAL CHEMISTRY

Laws and theories of chemical reactions and their accompanying physical changes; structure and properties of matter as affected by chemical constitution; chemical effects of radiation and heat on chemical substances

#### .2 Chemical Structure of Matter

#### .22 Molecular and Crystal Structure

For Atomic and molecular physics, see 539; Crystallography of minerals, 548

#### .23 Radiation Chemistry Isotopes Tracer Chemistry

For Nuclear physics, see 539; Radioactive tracer techniques in Analytical chemistry, 545.82

#### .3 Kinetic Theory of Chemical Change

Chemical and physical processes in relation to atomic and molecular structure

#### .34 It is recommended that Theory of Solutions be classified in 541.37

#### .35 Photochemistry

For Preparation and use of chemical materials used in photography, see 771.5

#### .36 Chemical Thermodynamics

Includes thermochemistry and calorimetry; phase rule and its applications

#### .37 Electrochemistry and Theory of Solutions

Theory of solutions was formerly classified in 541.34  
Includes magnetochemistry

For Industrial electrochemistry, see 660.29; Electrochemical methods in analytical chemistry, 545.3

#### .371 Theoretical Electrochemistry

#### .372 Theory of Electrolytic Solutions

541.373      **Colligative Properties of Solutions and Theory of Non-electrolytic Solutions**

Includes ideal solutions, ebulliometry, cryometry, osmotic pressure, vapor pressure lowering, theories of solubility; ionic equilibria including hydrogen ion and pH

.374      **Specific Properties of Solutions**

Includes viscosity, surface tension (formerly classified in 541.341); index of refraction, density, optical rotation, polarimetry

.375      **Colloid Chemistry and Surface Phenomena**

Colloid chemistry was formerly classified in 541.3452  
Includes adsorption

.8      **Special Subjects in Physical Chemistry**

Includes dielectric constants and dipole moments

542      **APPARATUS AND EQUIPMENT FOR  
CHEMICAL LABORATORIES**

*For Equipment used in specific operations, see applications, e.g. Analytical chemistry applications, 543-545*

543-545 ANALYTICAL CHEMISTRY

543      **ANALYSIS**

Comprehensive works covering both qualitative and quantitative analysis

Includes laboratory apparatus and equipment divided by type of material analyzed, or substance takes precedence over process

.01      **Analysis of Pure and Reagent Chemicals**

.1      **Analysis of Food and Drink**

.2      **Dairy Products**

Where interest in Analysis of dairy products lies chiefly with Dairy industry, class in 637.12, .2, .3

.3      **Water**

.4      **Analysis of Drugs and Medicinals, Cosmetics**

.5      **Analysis of Insecticides and Poisons**

543.6 It is recommended that Analysis of Minerals be classified in 549.13; of Metallurgical Products, 669.016

.7 Analysis of Other Inorganic Products

.8 Analysis of Other Organic Products

For Analysis and identification of organic compounds, see 547.8

## 544 QUALITATIVE ANALYSIS

Includes bead analysis, dry method, blowpiping, capillary analysis, flame coloration, gas analysis, microscopical examinations, spectrochemical analysis, spectroscopic analysis

## 545 QUANTITATIVE ANALYSIS

Includes gravimetric and volumetric analysis, microanalysis

.3 Electrochemical Methods

Includes polarographic, potentiometric, conductimetric

.4 Spectroscopic Analysis

.5 Titrimetric Methods in General

.7 Gas Analysis

Eudiometric methods

.8 Other Methods of Quantitative Analysis

Includes colorimetric, photometric, X-ray, chromatographic, polarimetric, mass spectrometric

.82 Radioactive Tracer Techniques

## 546 INORGANIC CHEMISTRY

Includes elements and their inorganic compounds; preparation, properties, structure

For Detection, determination, identification of elements and their compounds, see 543

## 546.1-546.9 ELEMENTS

*Compounds may be classified in the group to which the first element of which it is composed belongs*

**.1 Hydrogen**

**.12 Halogen Group**

Includes fluorine, chlorine, bromine, iodine, astatine

**.17 Phosphorus Group**

Includes nitrogen, phosphorus (formerly classified in .18), arsenic (formerly classified in .19), antimony (formerly classified in .86), bismuth (formerly classified in .87)

**.18** It is recommended that **Phosphorus** be classified in **.17**

**.19** It is recommended that **Arsenic** be classified in **.17**

**.2 Sulfur Group**

Includes oxygen, sulfur, selenium, tellurium, polonium (formerly classified in .892)

**.25** It is recommended that **Carbon** be classified in **.28**

**.27** It is recommended that **Boron** be classified in **.66**

**.28 Silicon Group**

Includes carbon (formerly classified in .25), silicon, titanium (formerly classified in .82), zirconium (formerly classified in .83), hafnium (formerly classified in .832)

**.29 Rare Gases**

Includes helium, neon, argon, krypton, xenon, radon

**.3 Alkali Group**

Includes lithium, sodium, potassium, rubidium, caesium, francium

- 
- 546.4 Alkaline Earths Group**  
Includes beryllium, magnesium, calcium, strontium, barium, radium  
It is recommended that **Zinc, Cadmium** be classified in .58  
For Radioactive elements, see .6
- .5 Germanium Group**  
Includes germanium (formerly classified in .695), tin (formerly classified in .8), lead  
It is recommended that **Thallium** be classified in .66
- .55** It is recommended that **Silver** be classified in 546.56
- .56 Copper Group**  
Includes copper, silver (formerly classified in .55), gold (formerly classified in .91)
- .58 Zinc Group**  
Includes zinc (formerly classified in .47), cadmium (formerly classified in .48), mercury
- .6 Scandium, Yttrium and Rare Earths**  
Use for comprehensive material on radioactive elements  
Includes scandium, yttrium, lanthanide series or rare earths (lanthanum, cerium, praseodymium, neodymium, promethium, samarium, europium, gadolinium, terbium, dysprosium, holmium, erbium, thulium, ytterbium, lutecium); actinide series or transradium or transuranic elements [actinium (formerly classified in .84), thorium (formerly classified in .84), protoactinium, uranium (formerly classified in .79), neptunium, plutonium, americium, curium, berkelium, californium]  
It is recommended that **Germanium** be classified in .5
- .66 Aluminum Group**  
Includes boron (formerly classified in .27), aluminum, gallium, indium, thallium (formerly classified in .52)
- .7 Iron Group**  
Includes iron, cobalt, nickel
- .71 Manganese Group**  
Includes manganese, technetium, rhenium

546.75

**Chromium Group**

Includes chromium, molybdenum, tungsten

It is recommended that **Uranium** be classified in .6

.8

**Vanadium Group**

Includes vanadium, columbium, tantalum

It is recommended that **Antimony** and **bismuth** be classified in .17; **Polonium** in .2; **Tin** in .5; **Titanium**, **Zirconium**, **Hafnium** in .28; **Thorium** and **actinium** in .6

.9

**Platinum Group**

Includes ruthenium, rhodium, palladium, osmium, iridium, platinum

It is recommended that **Gold** be classified in 546.56

547

**ORGANIC CHEMISTRY**

Includes preparation and properties of carbon compounds

.01

**Methods and Techniques**

.012

**Analysis and Identification of Carbon Compounds**

For Analysis of materials and products, see 543-545

.013

**Preparations and Reactions**

Includes named reactions, reactions with specific reagents, general types of reactions (oxidation, reduction including hydrogenation), condensation, polymerization

.1

It is recommended that **Cyanogen** be classified in 547.8

.2

**Hydrocarbons and Oxygen Derivatives**

May be arranged alphabetically, e.g. acids (formerly .7); alcohols (formerly .3); aldehydes (formerly .5); ethers (formerly .4); hydrocarbons, e.g. acetylenes, aromatic (anthracene, benzene, naphthalene), cycloparaffins, diolefins, olefins (ethylene), paraffins (methane); ketones (formerly .6)

.3

It is recommended that **Alcohols** be classified in 547.2

.4

It is recommended that **Ethers** be classified in 547.2

.5

It is recommended that **Aldehydes** be classified in 547.2

.6

It is recommended that **Ketones** be classified in 547.2

.7

It is recommended that **Acids** be classified in 547.2

**547.8      Organic Compounds of Individual Elements and Groups of Elements**

May be arranged alphabetically, e.g. bromine, chlorine, cyanogen (formerly .1), fluorine, iodine, magnesium, mercury, nitrogen (amides, amines, azo compounds), silicon (silicones), sulfur

Compounds of metals were formerly classified in .9

**.9      It is recommended that Organic Compounds of Metals be classified in .8**

**.92      Special Fields of Organic Chemistry**

Carbohydrates (sugars, e.g. mono-, di-, and trisaccharides and their derivatives; Polysaccharides, e.g. starch, glycogen, pentosans, dextrans, cellulose, pectin, plant gums, mucilages and their derivatives, glucosides); Dyes and related products; Fats, fatty acids, glycerol; High polymers; Medicinal products (alkaloids, antibiotics, hormones, auxins, vitamins; sterols and related compounds); Petroleum; Proteins and related compounds (amino acids, nucleic acids); Rubber; Synthetic resins; Miscellaneous plant and animal products (pigments, resins, terpenes, essential oils)

**548      CRYSTALLOGRAPHY**

Study of nature of crystals (mineral or non-mineral; their origin, internal structure, external forms

*For Study of form and properties of minerals, see 549; of metals, 669.016*

**.1      Symmetry and Crystal Systems**

External form of crystals

**.3      Chemical Crystallography**

Includes isomorphism and polymorphism

It is recommended that Cleavage be classified in 548.84

**.5      Crystallization**

Process by which crystals and crystalline bodies are formed

*For Crystal structure, see 548.8*

- 
- 548.7      **Mathematical Crystallography**  
Includes measurement of interfacial crystal angles
- .8      **Physical Properties of Crystals**  
Includes structure of crystals: orderly arrangement of atoms in three dimensional pattern (lattice) within crystal
- .83      **X-ray Crystallography**  
Study of crystal structure by X-ray diffraction
- .84      **Mechanical Properties of Crystals**  
Includes elasticity, tenacity, cohesion, fracture, hardness, density, cleavage (formerly classified in 548.3)
- .85      **Electrical, Thermal and Magnetic Properties of Crystals**  
Includes conductivity, thermoelectrical and pyroelectrical properties
- .9      **Optical Crystallography**  
Optical properties of crystals
- 549      **MINERALOGY**  
Science which describes, classifies, correlates different mineral species  
*For Use of Minerals, see Economic geology, 553*
- .1      **Physical, Chemical and Determinative Mineralogy**
- .12      **Physical Mineralogy**  
Study of physical properties of minerals, e.g. cohesive (cleavage, elasticity, hardness), electrical, magnetic, thermal, optical properties
- .13      **Chemical Mineralogy**  
Study of chemical nature of minerals and methods of testing for elements commonly found in minerals
- .14      **Determinative Mineralogy**  
Methods used for distinguishing metals  
Includes determinative tables which rely upon chemical and physical tests

---

549.2-549.8 DESCRIPTIVE MINERALOGY

*Description and classification of minerals based on chemical composition and isomorphous relations  
Includes crystal system, crystallography, physical character, chemical composition, occurrence, localities of each mineral*

*For Families, groups, species of minerals, see a mineral classification, e.g. Dana's System of Mineralogy*

**.2 Elements**

Includes metals, semi-metals, non-metals, e.g. gold, platinum, antimony, sulfur

**.3 Sulfides**

Combinations of various metals with sulfur, more rarely with selenium, tellurium, arsenic, antimony, e.g. galena, cinnabar, marcasite

Includes sulfo salts: minerals composed of lead, copper or silver in combination with sulfur and antimony, arsenic or bismuth, e.g. enargite

**.4 Halides**

Compounds of metals with halogen elements

Includes natural chlorides, fluorides, bromides, iodides, e.g. halite, fluorite

**.5 Oxides**

Metals in combination with oxygen

Includes anhydrous oxides, e.g. hematite, magnetite, chromite, cassiterite; hydrous oxides, e.g. diaspore, bauxite

**.6 Silicates**

Combination of various elements (sodium, potassium, calcium, magnesium, aluminum, iron) with silicon and oxygen, e.g. quartz, opal, leucite, talc, amphiboles, tourmaline, beryl, garnet, topaz

549.7

**Minerals Containing Other Oxygen Compounds**

Includes carbonates, nitrates, borates, phosphates, arsenates, vanadates, sulfates, chromates, tungstates, molybdates, uranates

.8

**Organic**

Includes amber, asphaltum, lignite, coal

.9

**Geographic Distribution of Minerals**

## 550 EARTH SCIENCES

Comprehensive geology or science of the earth  
Includes study of all earth materials, forces, processes

*For Astronomy, see 520*

### 551 PHYSICAL AND DYNAMIC GEOLOGY

Causes and processes of geological change

Includes geophysics, geochemistry

#### .1 Descriptive Geology

Structure of earth as a whole

#### .15 Conditions within the earth

Includes isostasy

#### .16 Terrestrial Magnetism

Formerly classified in 538.7

*For Atmospheric electricity, see 551.56*

#### .2 Diastrophism

Movements of earth's crust

#### .21 Volcanism

Includes volcanic structures, materials (magma, lava), eruptions; craters; cones

#### .22 Seismology

Science of earthquakes

Includes seismographic observations, instruments

#### .3 Gradation

Natural transference of solid material from one part of earth's surface to another

Includes degradation or tearing down and removal of land materials, e.g. erosion; aggradation or construction of new land surfaces, e.g. deposition, sedimentation

#### .31 Gradation Work of Ice

Includes glaciers, glaciation

#### .35 Gradation Work of Water

Includes work of underground and running water

- 
- 551.37      **Gradation Work of Atmosphere**  
             Includes weathering, wind work
- .4          **Physiography**  
             Study of earth's surface features  
             Includes geomorphology, study of origin and development of  
             topographic features  
             *For Geography, see 910*
- .41        **Continents**  
             Includes continental shelves
- .42        **Islands**  
             Includes coral reefs (formerly classified in 551.96)
- .43        **Mountains and Orology**  
             Science of mountains  
             Includes mountain ranges, plateaus, valleys
- .44        **Caves and Speleology**  
             Study, exploration, description of caves  
             Includes grottoes
- .45        **Plains**  
             Includes prairies and deserts (formerly classified in 551.58)
- .46        **Oceans and Oceanography**  
             Study of ocean and its phenomena  
             Includes submarine topography  
             *For Marine plants, see 581.92; Marine animals, 591.9*
- .48        **Inland Waters**  
             Includes lakes, rivers, waterfalls
- .49        **Underground Waters and Hydrology**  
             Phenomena, properties, laws, distribution of earth's water  
             Includes springs, wells
- .5         **Meteorology**  
             Science of earth's atmosphere and its physical processes  
             Includes atmospheric composition, structure  
             *For Medical climatology and meteorology, see 616.98*

- 
- 551.51      **Circulation of Atmosphere**  
Includes air currents; wind systems, e.g. trade winds, prevailing westerlies, monsoons
- .52      **Atmospheric Temperature**  
Heating and cooling of atmosphere  
Includes seasonal temperature changes, measurement of temperature  
*For Solar radiation, see 523.72*
- .54      **Atmospheric Pressure**  
Includes barometry, determination of atmospheric pressure
- .55      **Storms**  
Includes cyclones, tornadoes, thunderstorms, hurricanes, typhoons
- .56      **Atmospheric Electricity**  
Formerly classified in 537.4  
*For Terrestrial magnetism, see 551.16*
- .57      **Atmospheric Moisture**  
Moisture content or humidity
- .572      **Condensation and Evaporation**  
Includes clouds, fog; drought
- .573      **Precipitation**  
Includes rain, snow, hail, sleet, dew, frost
- .58      It is recommended that **Prairies and Deserts** be classified in 551.45
- .59      **Climatology**
- .591      **Weather**  
Includes observation, collection of data, instruments, forecasting
- .6      It is recommended that **Metamorphism** be classified in 552.4

- 551.7      **Historical Geology**  
Chronological account of events in earth's history  
Includes stratigraphy, relations and succession of rock strata
- .71      **Precambrian Eras**  
Includes Archeozoic, Proterozoic eras
- .72      **Paleozoic Era**
- .76      **Mesozoic Era**
- .78      **Cenozoic Era**
- .8      **Structural Geology**  
Form and position of rocks  
Includes joints, tilts, faults, folds
- .9      It is recommended that **Agents of Geologic Work** be classified with **Geologic Processes**, e.g. **Gradation Work of Water**, 551.35
- .96      It is recommended that **Coral Reefs** be classified in 551.42
- 552      **PETROLOGY**  
Origin, occurrence, classification of rocks
- .1      **Igneous Rocks**  
Rocks formed by cooling and consolidation of molten matter
- .4      **Metamorphic Rocks**  
Rocks that have been changed either in form or composition without disintegration  
Includes metamorphism (formerly classified in 551.6)
- .5      **Sedimentary Rocks**  
Rocks composed of fragments of other rocks deposited either above or below sea level
- 553      **ECONOMIC AND APPLIED GEOLOGY**  
Occurrence, origin, distribution of geologic materials that are valuable to man  
Includes prospecting  
  
For Geology applied to specific fields, see fields, e.g. Mining engineering, 622

- 
- 553.1      **Ore Deposits**  
            Formation, structure, classification of ores  
            Includes placer deposits, mineral veins, pegmatites
- .2          **Mineral Fuel Deposits**  
            Includes deposits of peat, lignite, coal
- .28        **Petroleum Geology**  
            Includes natural gas deposits
- .3          **Ferrous Ore Deposits**
- .4          **Nonferrous Ore Deposits**  
            Includes deposits of copper, gold and silver, zinc and lead,  
            nickel, platinum, chromium, tin and tungsten, mercury, an-  
            timony, aluminum and bauxite, manganese, molybdenum,  
            arsenic, bismuth, cobalt, cadmium, selenium and tellurium,  
            radium and uranium, vanadium, titanium, tantalum and co-  
            lumbium, zirconium, beryllium
- .5          **Building Stone Deposits**  
            Includes deposits of limestone, marble, sandstone, granite,  
            slate
- .6          **Earthy Material Deposits**  
            Includes deposits of clay, sand, gravel, salt, gypsum, diatoma-  
            ceous earth
- .7          **Mineral Water Deposits**
- .8          **Gem Deposits**  
            Deposits of minerals used for ornaments  
            Includes precious stones, e.g. diamonds, emeralds, rubies,  
            sapphires; semi-precious stones, e.g. garnet, amethyst, topaz,  
            turquoise
- .9          **Other Economic Mineral Deposits**

## 554-559 REGIONAL GEOLOGY

*May be divided like 940-999*

- 554      GEOLOGY OF EUROPE
- 555      GEOLOGY OF ASIA
- 556      GEOLOGY OF AFRICA
- 557      GEOLOGY OF NORTH AMERICA
- 558      GEOLOGY OF SOUTH AMERICA
- 559      GEOLOGY OF OCEANIA AND POLAR REGIONS

## 560 PALEONTOLOGY

- 560.17      **Stratigraphic Paleontology**  
Study of fossil plants and animals correlated with rock formation
- .172      **Paleozoic Paleontology**
- .176      **Mesozoic Paleontology**
- .178      **Cenozoic Paleontology**
- 561      **PALEOBOTANY**  
Study of plant life of geologic past  
*For Fossil plants discussed from viewpoint of geologic eras, see 560.17*
- .21      **Fossil Spermatophytes**  
Includes fossil herbaceous plants, flowering plants, trees, shrubs  
*For Single species of fossil spermatophytes, see 561.3-.9; Extant plants, 582-589*
- .3      **Fossil Angiosperms**  
Includes dicotyledons
- .4      **Fossil Monocotyledons**
- .5      **Fossil Gymnosperms**  
Includes fossil coniferales (Araucariaceae, Walchia, Voltzia); Cordaitales, Ginkgoales, Cycadophytes (including Pteridosperms, e.g. Alethopteris, Neuropteris, Sphenopteris, Glossopteris, Pecopteris, Caytoniales)
- .7      **Fossil Pteridophytes**  
Includes Equisetales (Archaeocalamites, Calamites, Schizoneura, Equisetaceae, Sphenophyllales); Filicales (Eufilicinae, Glossingia, Marattiales, Hydropteridae); Psilophytales (Psilophyton, Rhynia, Hornea); Lycopodiales (Lepidodendron, Sigillaria)
- .9      **Fossil Thallophytes**  
Includes Phycophyta or algae (Pachythea, Parka, Characeae); Rhodophyta or red algae

## 562-569 PALEOZOOLOGY

562 INVERTEBRATE PALEOZOOLOGY  
563 PROTOZOA, PORIFERA, CNIDARIA,  
ECHINODERMATA

Includes micropaleontology

.1 Protozoa

Includes Radiolaria, Foraminifera

.4 Porifera (Sponges)

Includes Silicispongiae and Calcispongiae

.5 Cnidaria

Coelenterata in modern sense

Includes Hydrozoa, Anthozoa or corals, Graptolites

.9 Echinodermata

Includes Pelmatozoa, Eleutherozoa

564 MOLLUSCA AND MOLLUSCOIDEA

.1 Pelecypoda

Lamellibranchia (bivalves)

.3 Gastropoda (Snails, Slugs)

.5 Cephalopoda (Squid, Octopus, Nautilus)

Includes Ammonites, Belemnites

.7 Bryozoa

.8 Brachiopoda

565 ARTHROPODA

.3 Crustacea

Includes Branchiopoda, Ostracoda, Cirripedia, Phyllocarida,  
Isopoda, Decapoda, Eurypterida, Xiphosura, Trilobites

.4 Arachnida

Includes Scorpiones, Araneida

.6 Myriapoda

.7 Insecta

## 566 VERTEBRATE PALEOZOOLOGY

## 567 FISHES

.2 Agnatha (Lampreys)

.3 Chondrichthyes (Sharks and Skate)

Includes Acanthodii, Pleuracanthodii, Cladoselachii, Elasmobranchii, Holocephali

.4 Placodermi (Armor-Plated Fish)

Includes Osteichthyes or bony fishes (Crossopterygii, Chondrostei, Dipnoi)

.6 Tetrapoda

Includes Amphibia (Labyrinthodontia, Lepospondyli)

.8 Anura (Frogs)

.9 Urodela

## 568 SAUROPSIDA (REPTILES AND BIRDS)

.1 Reptilia

Includes Anapsida (Chelonia, Cotylosauria); Synapsida (Pelycosauria, Therapsida); Archosauria (Thecodontia, Crocodilia, Pterosauria, Saurischia, Ornithischia)

.2 Aves

Includes Archaeornis, Neornithes

## 569 MAMMALS

.1 Prototheria

Includes Monotremata

.2 Metatheria

Includes Marsupials

.3 Eutheria

Includes Unguiculata (Insectivora, Edentata)

.4 Chiroptera

.5 Cetacea

Whales, dolphins

.6 Paenungulata

Includes Proboscidea, Pyrotheria, Embrithopoda

.7 Ungulata

.72 Perissodactyla

.73 Artiodactyla

.74 Carnivora

Includes Creodonta

.8 Primates

Lemurs, monkeys, man

## 570 BIOLOGICAL SCIENCES

Sciences treating of phenomena of life

For *Form* divisions .1–.9, see p. lv

### 571 ARCHEOLOGY

Study of prehistoric man from collection and investigation of antiquities

Includes relics of material, cultural, social life

For *Ancient history*, see 930; *Antiquities of specific countries*, see countries, e.g. *Antiquities of France*, 944

#### .1 Paleolithic or Old Stone Age

Hunting and fishing economy

Includes chipped stone artifacts

#### .2 Neolithic or New Stone Age

Pastoral and agricultural economy

Includes polished stone artifacts

#### .3 Copper and Bronze Age

#### .4 Iron Age

#### .7 Prehistoric Art

Includes prehistoric art objects, cave drawings, rock paintings, petroglyphs or rock carvings

For *Primitive art*, see 709.01

#### .8 Prehistoric Shelter

Includes cave dwellings, pit dwellings, lake dwellings, tree dwellings, cliff dwellings, tent dwellings

#### .9 Prehistoric Structures

Includes mounds, kitchen middens, megaliths, monoliths, dolmens, cromlechs

### 572 ANTHROPOLOGY

Science of man

For *Ethnopsychology*, see 136.4

- 
- 572.7      **Cultural or Social Anthropology**  
Study of primitive society  
Includes ethnography and ethnology, scientific description  
and analysis of socio-economic systems and cultural heritages  
of peoples of low technological levels  
For Sociology, see 301
- .8      **Linguistic Anthropology**  
Division of peoples by language  
May be divided like 420-499
- .9      **Anthropogeography**  
Geographic distribution of races  
May be divided like 940-999  
For Human geography, see 911
- 573      **PHYSICAL ANTHROPOLOGY**  
Structural characteristics of man
- .3      **Anthropogeny**  
Origin and evolution of man
- .6      **Anthropometry**  
Study of measurements of human body, e.g. stature, cranial  
capacity, head form, frontal index, pigmentation, hair texture,  
blood groups  
For Anthropometry used in crime investigation, see 364.12
- .9      It is recommended that **Monstrosities** be classified in 611.012
- 574      **BIOLOGY**  
Science of life and living things  
Includes natural history  
For Botany, see 580; Zoology, 590
- .1      **Physiology**  
Vital life processes: nutrition, respiration, metabolism, excretion,  
circulation, reproduction, nervous and chemical coordination  
For Plant physiology, see 581.1; Animal physiology, 591.1;  
Human physiology, 612

574.19

**Biochemistry**

Chemistry of vital processes

Includes chemical constituents of bodies of organisms; chemistry of metabolism including food constituents, enzymes, hormones

*For Plant biochemistry, see 581.19; Animal biochemistry, 591.19; Human biochemistry, 612.015; Applied nutrition, 641.1*

.191

**Biophysics**

Physical phenomena of life

Includes action of physical agents on organisms, e.g. radiations

*For Plant biophysics, see 581.191; Animal biophysics, 591.191; Human biophysics, 612.017*

.3

**Embryology**

Formation and development of organisms

*For Plant embryology, see 581.3; Animal embryology, 591.33; Human embryology, 611.013*

.4

**Morphology**

Gross structure of living organisms

*For Microscopic structure, see Histology and cytology, 574.8; Plant morphology, 581.4; Animal morphology, 591.4; Anatomy, 611*

.5

**Ecology**

Relations of organisms to their environments (formerly classified in 575.3)

Includes adaptation or adjustment to environment (formerly classified in 575.4), symbiosis, parasitism

*For Plant ecology, see 581.5; Animal ecology, 591.5; Human ecology, 301.3; Medical parasitology, 616.96; Veterinary parasitology, 636.0896*

.6

**Economic Biology**

*For Economic botany, see 581.6; Economic zoology, 591.6*

- 
- 574.8      **Histology and Cytology**  
Microscopic structure of organisms  
Includes tissues and cells (formerly classified in 576.3)  
For *Plant histology and cytology*, see 581.8; *Animal histology and cytology*, 591.8; *Human histology and cytology*, 611.018
- .9      **Biogeography**  
Geographic distribution of living organisms  
For *Phytogeography*, see 581.9; *Zoogeography*, 591.9; *Anthropogeography*, 572.9
- 575      **EVOLUTION**  
Development of organisms from earlier and simpler forms  
For *Paleontology*, see 560; *Anthropogeny*, 573.3
- .01      **Theories of Evolution**  
Includes Darwinian theory, orthogenesis, Mutation theory, Lamarckian theory
- .1      **Genetics**  
Study of heredity and variation (formerly classified in 575.2)  
It is recommended that **Eugenics** be classified in 301.323  
For *Plant genetics*, see 581.15; *Animal genetics*, 591.15; *Human genetics*, 613.9
- .11      **Laws of Heredity**  
Includes Mendelian law, chromosome theory
- .12      **Hereditary Characteristics**  
Inheritance of similar and divergent characters  
Includes genotypes, hereditary units (genes)
- .2      It is recommended that **Variation** be classified in 575.1
- .3      It is recommended that **Ecology** be classified in 574.5
- .4      It is recommended that **Adaptation** be classified in 574.5

576

**MICROBIOLOGY**

Study of microscopic organisms and viruses

Includes origin of life, abiogenesis (spontaneous generation)

For Bacteriology, see 589.9; Mycology, 589.2; Protozoology, 593.1; Special applications, the subject, e.g. Microbiology of soils, 631.46

.2

**Protoplasm**

Living substance

.3

**It Is Recommended That Cytology Be Classified in 574.8**

.6

**Viruses**

For Virus diseases, see 616.9

577

It is recommended that **CHEMICAL PROPERTIES OF LIVING MATTER** be classified in 574.19; **PHYSICAL PROPERTIES** in 574.191

578

**BIOLOGICAL TECHNIQUES**

Includes keeping and raising of organisms; methods of studying morphology (microscopic technique, e.g. preparation of slides, biological microphotography), physiology (kymography, tracer technique), development, genetics of organisms

579

**BIOLOGICAL AND NATURAL HISTORY  
COLLECTIONS**

Includes collecting, transporting, preservation, mounting (taxidermy) of biological specimens; special techniques (preparation of skeletons, injections, models); arrangement of museum collections

## 580 BOTANY

For Form divisions .1-.9, see p. lv; Paleobotany, 561

### 581 PLANT PHYSIOLOGY AND MORPHOLOGY

- .1 **Plant Physiology**  
Normal functions of plants under ordinary as well as controlled environmental conditions
- .11 **Circulation**  
Movement and absorption of liquid by plants
- .12 **Respiration**  
Release of energy gained from food
- .13 **Metabolism**  
Includes nutrition, food making processes (photosynthesis, protein synthesis), assimilation, storage, use (for growth, reserves)
- .14 **Secretion**  
*For Enzymes, hormones, vitamins, see 581.19*
- .15 **Plant Genetics**  
Includes heredity and variation  
*For Abnormalities, see 581.2*
- .16 **Plant Propagation**
- .17 **Histogenesis**  
Microscopic study of germ cells and related structures
- .18 **Nervous Function**  
Includes tropisms, nastic, formative and tactic responses
- .19 **Plant Biochemistry**  
Includes chemical composition and analysis of plant constituents; plant enzymes, hormones, vitamins  
*For Vitamin therapy, see 616.46; Hormone therapy, 616.4; Biochemistry, 574.19*
- .191 **Plant Biophysics**

- 581.2 Plant Pathology**  
Plant disease and control  
Includes phytopathology (disease in form or function), teratology (abnormalities), virus diseases
- .23 Parasitic Diseases**  
Includes diseases due to bacteria, fungi, insects  
*For Diseases of specific crops, see 633-635; Bacteria, 589.9; Fungi, 589.2; Insects, 595.7*
- .3 Plant Embryology**  
Includes germination
- .4 Plant Morphology**  
Form and structure of plants  
Includes structure of flower, fruit, seed, stem, root, leaf
- .5 Plant Ecology**  
Plant in relation to its surroundings  
Includes plant symbiosis and parasitology
- .52 Relation to Habitat**  
Includes soil, light, water and individual plant; mutual relationship of plants (succession, zonation); influence of physical factors of environment on plant distribution and species (Hydrophytes, Mesophytes, Xerophytes)  
*For Plants in above groups, see 582-589*
- .6 Economic Botany**  
*For Agriculture and plant culture, see 630*
- .8 Plant Histology and Cytology**  
Plant tissues and cells
- .87 Cytology**  
Cell structure, function, reproduction

- 581.9      **Phytogeography**  
Includes only general material on geographic distribution of plants  
*For Specific plants of certain locality, see plants, e.g. Cryptogams of North America, 586; Cactus of Southwestern United States, 583.47; General plant life of specific locality, e.g. Wild flowers of Northeastern United States, 581.974*
- .92      **Geographic Distribution of Aquatic Flora**  
*For Aquatic plants as influenced by physical environment, see 581.52*
- .93-.99      **Plants of Specific Countries or Localities**  
*May be divided like 930-999*  
*For Specific plants of a locality, see plant, e.g. Cryptogams of North America, 586; Willows of United States, 583.98*

## 582-589

## SYSTEMATIC OR TAXONOMIC BOTANY

*Description and classification of plants*  
*Orders and most important families are given*

*For Fuller classification, see standard plant classification, e.g. Asa Gray*

## 582      SYSTEMATIC OR TAXONOMIC BOTANY

- .1      **Spermatophytes**  
Seed-bearing plants  
Includes Gymnosperms, Angiosperms  
*For Plants of an order, family, genera or species, see 583-589, e.g. Maple tree, 583.28; of a specific locality, 581.93-.99; Culture, 630; Use in landscape design, 710-719*
- .12      **Herbaceous Plants**  
Seed plants which do not have woody stems  
Includes herbals  
*For Specific plants, see 583-589; Culture, 630; Use in landscape design, 710-719; Grasses, 584.8*

582.13

**Flowering Plants**

Includes wild flowers

*For Single species of flowering plants or plant families, see 583-589; General material on plants of specific countries or localities, 581.93-.99, e.g. Wild flowers of United States, 581.973*

.16

**Trees**

Includes comprehensive treatment of trees, shrubs, flowering plants

*For Culture, see 634.9; Order, family, genera, species of tree, 583-588; Use in landscape design, 710-719; Specific locality, 581.93-.99*

.17

**Shrubs**

*For Culture, see 630; Order, family, genera, species of shrub, 583-588; Use in landscape design, 710-719; Specific locality, 581.93-.99*

**583-584 ANGIOSPERMS**

583

**DICOTYLEDONS**

.11

**Ranunculales**

Includes Nymphaeaceae or water lily family; Myristicaceae or nutmeg family; Anonaceae or papaw family; Berberidaceae or barberry family; Ranunculaceae or buttercup family (buttercup, columbine, larkspur, marsh marigold, anemone, monk's-hood, peony, clematis); Magnoliaceae or magnolia family (magnolia, tulip tree); Lauraceae or laurel family (sassafras, cinnamon, camphor)

Lauraceae was formerly classified in 583.931

.12

**Papaverales**

Includes Papaveraceae or poppy family; Cruciferae or mustard family (cabbage, broccoli, Brussels sprouts, turnip, radish, watercress), Capparidaceae or caper family (formerly classified in 583.131)

583.13

**Violales**

Includes Violaceae or violet family; Cistaceae or rock-rose family; Passifloraceae or passion-flower family and Loasaceae or star flower family (formerly classified in 583.45)

It is recommended that **Caper** family be classified in 583.12

.14

**Polygalaceae**

.15

**Caryophyllales**

Includes Caryophyllaceae or pink family; Portulacaceae or purslane family

.16

**Guttiferales**

Includes Theaceae or tea family

.17

**Malvales**

Includes Malvaceae or mallow family (cotton, hollyhock)

.21

**Geraniales**

Includes Linaceae or flax family

.27

**Rhamnales**

Includes Rhamnaceae or buckthorn family; Vitaceae or grape family

.28

**Sapindales**

Includes Sapindaceae or soapberry family; Aceraceae or maple family

.3

**Rosales**

Includes Leguminosae or pea family (peas, beans, peanuts, clover, alfalfa, locust tree, redbuds, lupines, locoweeds, mesquite, palo verde); Rosaceae or rose family (apples, pears, hawthorn, strawberry, raspberry, blackberry, peach, plum, cherry, bridal wreath), Saxifragaceae

.4

**Myrtales**

Includes Myrtaceae or myrtle family (eucalyptus, evening primrose)

It is recommended that **Loasaceae** and **Passifloraceae** be classified in 583.13; **Cucurbitaceae** in 583.57

- 583.47      **Opuntiales**  
             Includes Cactaceae or cactus family
- .48        **Umbellales**  
             Includes Umbelliferae or parsley and carrot family
- .51        **Rubiales**  
             Includes Caprifoliaceae or honeysuckle family
- .55        **Compositae**  
             Includes Cichoriaceae or lettuce family; Carduaceae or this-  
             tle family; Asteraceae or aster family, Ambrosiaceae or rag-  
             weed family; Helianthaceae or sunflower family
- .57        **Campanales**  
             Includes Cucurbitaceae or gourd family (formerly classified in  
             583.46)  
             *For Compositae generally considered in Campanales, see*  
             583.55
- .6         **Ericales**  
             Includes Ericaceae or heath family (heather, blueberry, cran-  
             berry, laurel, arbutus, wintergreen, rhododendron, azalea)
- .67        **Primulales**  
             Includes Primulaceae or primrose family
- .68        **Ebenales**
- .7         **Gentianales**  
             Includes Oleaceae or olive family (olive, jasmine, ash); Gen-  
             tianaceae or gentian family; Apocynaceae or dogbane family  
             (oleander, periwinkle); Asclepiadaceae or milkweed family
- .76        **Polemoniales**  
             Includes Polemoniaceae or phlox family
- .8         **Scrophulariales**  
             Includes Scrophulariaceae or snap-dragon family (foxglove,  
             Indian paintbrush), Verbenaceae or vervain family, Labiatae  
             or mint family (rosemary, sage, lavender, thyme, peppermint,  
             spearmint)

- 
- 583.899      **Plantaginales**  
             Includes Plantaginaceae or plantain family
- .91          **Chenopodiales**  
             Includes Amarantaceae, Chenopodiaceae or goosefoot family
- .917        **Polygonales**  
             Includes Polygonaceae or buckwheat family
- .925        **Piperales**  
             Includes Piperaceae or pepper family; Saururaceae or lizard's-tail family
- .93          **Proteales**  
             Includes Proteaceae  
             It is recommended that Lauraceae be classified in 583.11
- .94          **Santalales**  
             Includes Santalaceae or sandalwood family; Loranthaceae or mistletoe family
- .96          **Urticales**  
             Includes Urticaceae or nettle family; Moraceae or mulberry family; Ulmaceae or elm family
- .973        **Juglandales**  
             Includes Juglandaceae or walnut family
- .974        **Myricales**  
             Includes Myricaceae or bayberry family
- .976        **Fagales**
- .98          **Salicales**  
             Includes Salicaceae or willow family
- 584        **MONOCOTYLEDONS**
- .11          It is recommended that Hydrocharitaceae be classified in 584.7
- .15          **Orchidales**  
             Includes Orchidaceae or orchid family (lady's-slipper, vanilla)

- 
- 584.21      **Scitaminales**  
Includes Marantaceae or arrowroot family; Musaceae or banana family; Cannaceae or canna family
- .22      It is recommended that **Bromeliaceae** be classified in 584.3
- .23      **Liliales**  
Includes Liliaceae or lily family (lily, trillium, onion, dog's-tooth violet, asparagus, garlic, leek, yucca), formerly classified in 584.32; Haemodoraceae or bloodwort family; Juncaceae or rush family (formerly classified in 584.45)
- .3      **Xyridales**  
Includes Xyridaceae or yellow-eyed grass family; Commelinaceae or spiderwort family; Mayacaceae or mayaca family; Bromeliaceae or pineapple family (formerly classified in 584.22)
- .32      It is recommended that **Liliaceae** be classified in 584.23
- .45      It is recommended that **Juncaceae** be classified in 584.23
- .5      **Palmales**  
Includes Palmaceae or palm family
- .61      **Pandanales**  
Includes Sparganiaceae or bur-reed family; Typhaceae or cat-tail family
- .62      **Cyclanthales**
- .64      **Arales**
- .7      **Najadales**  
Includes Hydrocharitaceae (frog's-bit), formerly classified in 584.11; Alismaceae (water plantain); Najadaceae (najas)
- .8      **Graminales**  
Includes Cyperaceae (sedge); Gramineae (grass, e.g. wheat, rice, rye, oats, barley, corn, sorghum, sugar cane, bamboo), formerly classified in .9
- .9      It is recommended that **Gramineae** be classified in .8

**585 GYMNOSPERMS****.1 Gnetales**

Includes Gnetaceae

**.2 Coniferales**

Includes Taxodiaceae (redwood); Pinaceae (pine: hemlock, spruce, larch, tamarack, fir); Taxaceae (yew)

**.7 Ginkgoales**

Includes Ginkgoaceae (maidenhair tree: ginkgo)

**.9 Cycadales**

Includes Cycadaceae (cycad)

**586 CRYPTOGRAMS**

Seedless plants

Includes Thallophytes (lichens), Bryophytes (mosses), Pteridophytes (ferns)

*For Order, family, species of Thallophytes, see 589; Bryophytes, 588; Pteridophytes, 587*

**587 PTERIDOPHYTES**

Ferns and their allies

**.1 Isoetales****.2 Equisetales**

Includes Equisetaceae (horsetail)

**.3 Filicales**

Includes water ferns (Salviniaceae, Marsiliaceae); land ferns (Osmundaceae), Schizaeaceae, Polypodiaceae, Cytheaceae, Hymenophyllaceae

**.9 Lycopodiales**

Club mosses

Includes Selaginellaceae, Lycopodiaceae (ground pines)

**588 BRYOPHYTES**

Musci (mosses)      Hepaticae (liverworts)

## 588.1-588.2 MUSCI

- .1        **Sphagnales**  
          Peat and bog mosses
- .2        **Bryales**  
          True mosses
- .22      **Andreaeales**  
          Black, small mosses
- .3        **Hepaticae or Liverworts**  
          Includes Jungermanniales (scale mosses); Anthocerotales (hornworts); Marchantiales (great liverworts)

589        **THALLOPHYTES**

Lichens, fungi, algae, bacteria

*For Orders, family, species of lichens, see 589.1; Fungi, 589.2; Algae, 589.3; Bacteria, 589.9; Effect on crops and control, 632 or specific crop*

- .1        **Lichenes**  
          Lichens: plants formed by intimate association between algae and fungi  
          Includes Basidiolichenes, Ascolichenes
- .2        **Eumycetes or Mycophyta**  
          True fungi, e.g. Phycomycetes, Ascomycetes, Basidiomycetes  
          Includes mycology
- .22      **Basidiomycetes**  
          Club fungi  
          Includes Ustilaginales (smuts); Uredinales (rusts); Tremelales, Hymenomycetes and Gasteromycetes (fungi)
- .23      **Ascomycetes**  
          Sac fungi  
          Includes Saccharomycetales (yeast fungi); Erysiphales (powdery mildews); Hysteriales (slit fungi); Phacidiales (little cup fungi); Pezizales (cup fungi); Tuberales (truffles or tubers); Helvellales; Exoascales (peach leaf curl, plum pocket, witches'-broom); Hypocreales; Sphaeriales, Dothideales (ergot, black rot, black knot); Laboulbeniales (beetle fungi); Aspergilliales (little tubers; aspergillus, penicillium)

- 
- 589.24      **Fungi Imperfecti**
- .25      **Phycomycetes**  
            Algae-like fungi  
            Includes Peronosporales (downy mildews)
- .26      **Saprolegniales (Water Molds)**  
            Includes Ancylistales, Monoblephariadaceae
- .28      **Mucorales (Black Mold)**  
            Includes Entomophorales (fly fungi), Chytridales
- .29      **Myxomycetes**  
            Slime molds  
            Includes Endosporales and Exosporales
- .3        **Phycophyta**  
            Algae
- .41      **Rhodophyta**  
            Red algae
- .45      **Phaeophyta**  
            Brown algae  
            Includes seaweeds (*Fucus*) and kelps
- .47      **Chlorophyta**  
            Green algae  
            Includes Zygnematales (pond scum) and Desmidiiales (desmids), formerly classified in 589.61
- .48      **Chrysophyta**  
            Golden algae  
            Includes Heterokontae (yellow-green algae)
- .61      It is recommended that **Zygnematales** and **Desmidiiales** be  
            classified in 589.47
- .62      **Bacillariales**  
            Diatoms  
            Includes Centrales and Penales
- .7        **Schizophyta**  
            Fission plants

589.8      **Myxophyceae or Cyanophyceae**

Blue-green algae

.9      **Schizomycetes**

Bacteria      Bacteriology

Includes Eubacteriales (true bacteria); Actinomycetales, Chlamydobacteriales, Theobacteriales, Myxobacteriales, Spirochaetales, Caulobacteriales, Rickettsiales

*For Bacteriology of specific subjects, see subject, e.g. Soil bacteriology, 631.4; Yeasts, 589.23; Microbiology, 576; Medical bacteriology, 616.01*

.97      **Phytoflagellatae**

Euglenales

Includes Euglenaceae, Astaceaceae, Peranemaceae

It is recommended that **Flagellated protozoans** be classified in 593.16

## 590 ZOOLOGY

Comprehensive works including systematic and non-systematic zoology

*For Form divisions .1–.9, see p. lv; Paleozoology, 562–569; Conservation of wild life, 333.78*

### 591 GENERAL ZOOLOGY

Non-systematic zoology

Includes morphology and physiology of animal organisms

#### .1 Animal Physiology

Functions of animal body and its parts

#### .11 Circulation

#### .12 Respiration

#### .13 Metabolism

Includes nutrition

*For Applied nutrition in animal husbandry, see 636.085*

#### .14 Secretion and Excretion

#### .15 Animal Genetics

Includes heredity and variation

*For Stock breeding, see 636.082*

#### .16 Reproduction

Includes sexual and asexual reproduction

#### .17 Gametogenesis

Formation or maturation of sex cells

It is recommended that **Histogenesis** be classified in 591.8

.179 It is recommended that **Regeneration** be classified in 591.3

#### .18 Nervous Functions

Includes sensations, tropisms

- 591.19      Animal Biochemistry**
- .191      Animal Biophysics**
- .2        Animal Pathology**  
        *For Veterinary medicine, see 636.089*
- .3        Animal Development**  
        Includes embryonic and postembryonic development; metamorphosis: postembryonic change from one developmental stage to another; regeneration (formerly classified in 591.179) and transplantation
- .33       Embryology**  
        Includes cleavage, formation of germ layers, differentiation of organs
- .4        Animal Morphology**  
        Gross structure of animals  
        Includes comparative anatomy, descriptive anatomy (formerly classified in 591.7)  
        *For Microscopic structure of animals, see Animal histology and cytology, 591.8*
- .41       Circulatory System**
- .42       Respiratory System**
- .43       Digestive System**
- .44       Glands and Excretory System**  
        Includes endocrine glands
- .46       Reproductive System**
- .47       Muscular, Skeletal, Integumentary Systems**
- .48       Nervous System**  
        Includes sense organs
- .49       Topographical Anatomy**

- 591.5      Animal Ecology**  
Animal habits and behavior; their relation to environment and to each other  
Includes food; seasonal habits, e.g. hibernation; relation to other animals (animal symbiosis, parasitism, commensalism, predation); sexual behavior; means of protection (adaptation, protective coloration); sound production and other means of communication used by animals  
It is recommended that **Animal stories** be classified in 800  
*For Specific parasites, see taxonomic groups*
- .51      Instinct**  
*For Comparative or animal psychology, see 151.3*
- .52      Habitat**  
Includes migration
- .6      Economic Zoology**  
Useful and injurious animals  
*For Animals as injurious factors in crop production, see 632.6-.7*
- .7      It is recommended that Descriptive Anatomy be classified in 591.4**
- .8      Animal Histology and Cytology**  
Microscopic structure of animals  
Includes animal tissues and cells, histogenesis (formerly classified in 591.17)
- .9      Zoogeography**  
Includes marine, freshwater, terrestrial animals
- .93-.99      Animals of Specific Countries or Localities**  
May be divided like 930-999, e.g. Animals of South America, 591.98  
*For Specific animals of certain localities, see specific animals, e.g. Birds of North America, 598.2*

## 592-599 SYSTEMATIC OR TAXONOMIC ZOOLOGY

*Description and classification of animals**Most important phyla, classes, orders are given*

For fuller classification, use standard list, e.g. Zoological names, a list of phyla, classes, and orders prepared for Section F, American Association for the Advancement of Science

**592 INVERTEBRATES**

Animals without backbones

**593.1 Protozoa**

Unicellular animals

Includes protozoology

**.11 Sarcodina**

Protozoa that move by means of pseudopodia

Includes Rhizopoda (Amoeba)

**.12 Foraminifera****.16 Mastigophora**

Flagellated protozoans (Trypanosoma)

*For Phytoflagellatae, see 589.97***.17 Ciliata**

Protozoa that move by means of cilia (Paramecium, Stentor, Balantidium)

**.2 Mesozoa**

Simple multicellular animals (Orthonectida, Dicyemida)

Formerly radiates, obsolete term used to include Coelenterata, Ctenophora, Echinodermata

**.3 It is recommended that Coelenterata be classified in 593.5****.4 Porifera**

Sponges

**.5 Cnidaria**

Cocenterata in its modern sense (formerly classified in 593.3)

- 
- 593.6      **Anthozoa**  
            Includes sea-anemones, corals
- .7          **Hydrozoa**  
            Includes hydras, hydroid polyps, Hydromedusae
- .73        **Scyphozoa**  
            Acalepha, includes Scyphomedusae
- .8          **Ctenophora**  
            Sea-walnuts or comb-jellies
- .9          **Echinodermata**  
            Spiny-skinned animals  
            Includes Crinoidea (sea-lilies), Asteroidea (common star-fishes), Ophiuroidea (brittle-stars, basket-stars), Echinoidea (sea-urchins, sand-dollars), Holothurioidea (sea-cucumbers)
- .99        It is recommended that **Enteropneusta** be classified in 596

## 594      **MOLLUSCA AND MOLLUSCOIDEA**

Mollusks and mollusk-like animals

- .1          **Pelecypoda**  
            Lamellibranchia or bivalve mollusks (clams, mussels, oysters)
- .19        **Amphineura**  
            Includes chitons (formerly classified in 594.31)
- .2          **Scaphopoda**  
            Dentalium or toothshell
- .3          **Gastropoda**  
            Snails, slugs, whelks  
            Includes Prosobranchia, Opisthobranchia, Pulmonata
- .31        It is recommended that **Amphineura** be classified in 594.19

- 
- 594.5      **Cephalopoda**  
Includes Tetrabranchia (Nautilus), Dibranchia (Decapod and octopod Cephalopoda: squid, devilfish, cuttlefish, octopus)
- .7      **Bryozoa (Polyzoa)**  
Moss animals
- .73      It is recommended that Pterobranchia be classified in 596.
- .8      **Brachiopoda**  
Includes lamp-shells
- .9      It is recommended that Tunicata be classified in 596
- 595.1      **Vermes**  
Worms
- .12      **Platyhelminthes and Nemertinea**  
Flatworms and ribbon worms  
Includes Turbellaria (planarians), Trematoda (flukes), Cestoda (tapeworms)
- .13      **Nemathelminthes**  
Roundworms  
Includes Nematoda (Ascaris, hookworms, Trichinella), Nematomorpha (Gordius or horsehair worm), Acanthocephala
- .14      **Annelida**  
Segmented worms  
Includes Archiannelida
- .15      **Hirudinea**  
Leeches
- .16      **Oligochaeta**  
Includes earthworms
- .17      **Polychaeta and Myzostoma**  
Includes Nereis

- 
- 595.18      **Trochelminthes**  
            Rotifers or wheel animalcules and related animals  
            Includes Rotatoria, Gastrotricha, Echinodera
- .2      **Arthropoda**
- .3      **Crustacea**
- .315      It is recommended that Pantapoda be classified in 595.4
- .32      **Phyllopoda or Branchiopoda**
- .33      **Ostracoda**
- .34      **Copepoda**  
            Includes Cyclops, fish lice
- .35      **Cirripedia**  
            Barnacles
- .371      **Amphipoda**
- .372      **Isopoda**  
            Sow bugs, wood lice
- .38      **Minor Crustacean Orders**  
            Includes Leptostraca (Nebalia), Syncarida, Thermosbaenacea, Tanaidacea, Euphausiacea, Cumacea, Stomatopoda (Squilla), Mysidacea (Mysis), Decapoda (Macrura, e.g. lobster, crayfish; Brachyure, e.g. crab)
- .39      **Gigantostraca**  
            Includes Xiphosura (horseshoe crab)
- .4      **Arachnida**  
            Includes Linguatulida, Tardigrada (water bears), Acari (mites and ticks), Phalangida (daddy longlegs or harvestmen), Pedipalpi or Palpigradi (whip-scorpions), Scorpiones (scorpions), Pseudoscorpiones (false scorpions), Solifuge (weasel spiders), Pycnogonida or Pantopoda (formerly classified in 595.315)
- .44      **Araneida**  
            True spiders
- .5      **Onychophora**  
            Includes Peripatus

- 
- 595.6      **Myriapoda**  
            Includes Diplopoda (millipedes), Chilopoda (centipedes),  
            Symphyla, Pauropoda
- .7          **Insecta (Hexapoda)**  
            Insects  
            Includes entomology
- .71        **Synaptera**  
            Includes Collembola (spring-tails), Protura, Entotrophi,  
            Thysanura (bristle-tails)
- .72        **Orthoptera**  
            Grasshoppers, crickets, katydids, mantises, cockroaches, stick  
            insects
- .73        **Pseudoneuroptera**  
            Includes Thysanoptera (thrips), Corrodentia (psocids,  
            book-lice), Odonata (dragonflies, damselflies), Ephemera  
            (mayflies), Plecoptera (stoneflies), Isoptera (termites or  
            white ants), Embioptera, Zoraptera
- .74        **Neuroptera**  
            Lacewing-flies, ant-lions, snake-flies  
            Includes related phyla: Mecoptera (scorpion-flies), Trichop-  
            tera (caddis-flies), Strepsiptera (stylopids or twisted-winged  
            insects), Anoplura and Mallophaga (true lice and bird-lice,  
            formerly classified in 595.751)
- .75        **Hemiptera**  
            Includes Homoptera (cicadas, leafhoppers, aphids, scale-  
            insects), Heteroptera (true bugs)
- .751       It is recommended that **Anoplura** and **Mallophaga** be  
            classified in 595.74
- .76        **Coleoptera**  
            Beetles, weevils, fireflies, wood-borers, ladybugs
- .77        **Diptera**  
            Flies, gnats, midges, mosquitoes
- .775       **Siphonaptera**  
            Fleas

- 595.78      **Lepidoptera**  
             Includes Heterocera (moths), Rhopalocera (butterflies)
- .79        **Hymenoptera**
- .796       **Formicidae**  
             Ants
- .799       **Apidae**  
             Bees

596        **CHORDATES**

Includes Enteropneusta (formerly classified in 593.99), Pterobranchia (formerly classified in 594.73), Tunicata or sea squirts (formerly classified in 594.9), Cephalochorda or lancelets (formerly classified in 597.1), Vertebrata or Craniata, animals with backbones

597        **FISHES**

Includes ichthyology

- .1        It is recommended that Cephalochorda be classified in 596
- .2        **Cyclostomata**  
             Hagfishes, lampreys
- .3        **Elasmobranchii**  
             Sharks, rays, skates
- .4        **Ganoidei**  
             Includes Chondrostei (paddle fishes, sturgeons), Holostei (garpikes, bowfins), Crossopterygii (lobefinned fishes), Dipnoi (lung fishes)
- .5        **Teleostei**  
             Bony fishes  
             Includes Acanthopterygii (spiny-rayed fishes), Isospondyli (soft-rayed fishes)
- .6        **Amphibia**
- .8        **Salientia**  
             Frogs, toads

- 597.9            **Urodela**  
                 Salamanders, newts, mud-puppies
- 598.1           **Reptilia**  
                 Reptiles
- .11       **Lacertilia**  
                 Lizards
- .12       **Serpentes**  
                 Snakes
- .13       **Chelonia**  
                 Turtles, tortoises
- .14       **Crocodylia**  
                 Crocodiles, alligators
- .2        **Aves**  
                 Birds  
                 Includes ornithology
- .29       **Geographic Distribution of Birds**
- 599            **MAMMALS**
- .1        **Prototheria**  
                 Egg-laying mammals
- .2        **Metatheria**  
                 Pouched mammals or marsupials (opposums, kangaroos)
- .3        **Eutheria**  
                 Viviparous mammals  
                 Includes Edentata, e.g. Xenarthra (armadillos, anteaters, sloths), Pholidota (pangolins or spiny anteaters), Tubulidentata (aardvarks)
- .32       **Rodentia and Lagomorpha**  
                 Rats, beavers, squirrels, porcupines, rabbits, hares, pikas
- .4        **Chiroptera**  
                 Bats

- 
- 599.5      **Cetacea**  
            Whales, dolphins, porpoises
- .61      **Proboscidea**  
            Elephants
- .7      **Ungulata**  
            Hoofed mammals  
            For Domestic animals, see *Animal husbandry*, 636
- .72      **Perissodactyla**  
            Odd-toed ungulates (horses, asses, zebras, rhinoceroses, tapirs)
- .73      **Artiodactyla**  
            Even-toed ungulates (pigs, hippopotamuses, camels, giraffes, deer, antelopes, buffalo, bison, cattle, sheep, goats)
- .74      **Carnivora**  
            Flesh-eating mammals
- .744      **Fissipedia**  
            Land carnivora (cats, dogs, bears, weasels, hyenas)
- .745      **Pinnipedia**  
            Marine carnivora (seals, walruses)
- .8      **Primates**  
            Lemurs, monkeys, apes, man (formerly classified in .9)  
            For *Anthropology*, see 572
- .9      It is recommended that Man be classified in .8

# 600 Applied Science

---

*For Specific subjects in applied science, see 610–690, e.g. Chemical technology, 660; Engineering, 620; Pure science, 500; Form divisions 1–5, 7, 9, p. lv; exceptions 6 and 8 follow:*

606 SOCIETIES FAIRS EXPOSITIONS

608 PATENTS AND INVENTIONS

## 610 MEDICAL SCIENCES

*For Medical jurisprudence, see 340.6; Hospitals, sanitariums, 362; Form divisions .1-.6 and .8-9, p. Iv; exception in .7 follows:*

- 610.72      **Experimental Medicine**
- .73      **Nurses and Nursing**
  - Includes professional and practical nurses, aides, attendants
  - May be divided by regular form divisions, e.g. Study and teaching of nursing, 610.7307; History of nursing, 610.7309
  - For Army Nurse Corps, see 356.92; Naval Nurse Corps, 359.98; Home nursing, 649.8
- .732      **Private Duty Nursing**
- .733      **Institutional Nursing**
  - Nursing in hospitals, sanitariums, clinics, prisons
- .734      **Public Health and Community Nursing**
  - Includes industrial nursing
- .736      **Special Nursing**
  - Includes communicable disease, surgical and gynecological, obstetrical, orthopedic, pediatric, psychiatric nursing
- .75      It is recommended that **Diagnosis** be classified in 616

## 611 ANATOMY

- Structure of human body and relation of its parts
- For Comparative anatomy, see 591.4
- .012      **Human Teratology**
  - Study of human anomalies, deformities, monstrosities (formerly classified in 573.9)
- .013      **Human Embryology**
  - Formation and development of human embryos
- .018      **Human Histology and Cytology**
  - Microscopic structure of human organisms
  - Includes tissues and cells

---

612      **HUMAN PHYSIOLOGY**

Functions of human body and its parts

**.015      Human Biochemistry**

Chemical composition of human bodies and changes which occur in them, e.g. chemical transformations, oxidations, reductions

**.017      Human Biophysics**

Action of physical agents on human bodies

**.1      Circulation**

Operation of circulatory system

**.2      Respiration**

Process of breathing  
Includes artificial respiration

**.3      Digestion**

Conversion of food into absorbable form

**.39      Metabolism**

Assimilation of food

**.4      Secretion and Excretion**

Processes of glandular system

**.6      Reproduction**

Sex functions  
Includes sex instruction

*For Sex education in schools, see 371.76*

**.63      Conception**

Union of male sperm and ovum of female  
Includes artificial insemination, contraception or birth control

*For Planned parenthood, see 301.426*

**.7      Locomotion      Speech      Cutaneous functions**

**.76      Locomotion**

Movement from one place to another

- 
- 612.78      **Speech**  
            Use of voice
- .79          **Cutaneous Functions**  
            Physiology of skin
- .8          **Sensation**  
            Response to stimulation  
            Includes sight, hearing, smell, taste, touch
- 613      **PERSONAL HYGIENE**  
            Maintenance of personal health  
            *For Health education in schools, see 371.76*
- .1          **Air and Light**  
            Beneficial effects of fresh air and sunlight  
            Includes sunbathing  
            *For Therapeutic use of air and light, see 615.8; Medical climatology and meteorology, 616.98*
- .2          **Food**  
            Uses of food in maintaining health  
            *For Nutrition and dietetics, see 641.1; Dietotherapy, 615.85*
- .4          **Bathing**  
            Cleanliness of body  
            *For Therapeutic use of water and bathing, see 615.8; Sanitary control of public bathing places, 614.7; Care of personal appearance, 646.7*
- .6          It is recommended that **Industrial Hygiene** be classified in 614.85
- .67        It is recommended that **Military Hygiene** be classified in 356.92
- .68        It is recommended that **Naval Hygiene** be classified in 359.98
- .7          **Rest and Exercise**  
            Adequate sleep, relaxation, exercise for maintenance of health  
            Includes correct posture  
            *For Physical education in schools, see 371.73*

613.8 It is recommended that **Effects of Stimulants and Narcotics** be classified in 616.86

.9 **Human Genetics**

Improvement of human race by judicious mating

For *Eugenics*, see 301.323; *Birth control*, 612.63

614 **PUBLIC HEALTH AND PREVENTIVE  
MEDICINE**

.1 **Medical Statistics**

Includes physicians' reports of disease, births, stillbirths, and death; medical surveys

For *Vital statistics*, see 312

.2 **State Medicine**

Regulation of medical practice by the state by means of health codes, licensing of physicians, socialized medicine

Includes control of quackery, patent medicines

For *Social insurance*, see 368.4; *Group hospitalization and medical expenses*, 368.38

.3 **Food and Drug Control**

Control of adulterations and health hazards in foods and beverages, milk and milk products, drugs, cosmetics, by means of legislation, inspection

.4 **Disease Control**

Health measures for prevention and control of communicable disease, e.g. isolation and quarantine, vaccination and immunization, disinfection

.49 **Epidemiology**

History and control of epidemics

.5 It is recommended that **Control of Specific Diseases** be classified with **Diseases**, e.g. **Venereal Disease Control**, 616.95

.6 **Disposal of the Dead**

Includes morgues, crematories, cemeteries, undertaking, embalming, cremation, burial

For *Manners and customs in treatment of dead*, see 392

- 614.7      **Sanitary Control**  
Public health measures for sanitation and control of environment, e.g. control of air and soil pollution; provision of adequate and safe water supply, waste disposal, noise control; sanitary supervision of public conveyances and buildings; sanitary operation of swimming pools, bathing beaches, comfort stations  
*For Methods of sanitation, see Sanitary engineering, 628*
- .8      **Safety**  
Protection of human life from accidents, casualties  
*For Safety instruction in schools, see 371.71*
- .81      **Life-Saving**  
Rescue of drowning  
Includes resuscitation
- .84      **Fire Prevention and Protection**
- .85      **Industrial Medicine**  
Includes industrial hygiene and safety (formerly classified in 613.6)
- .86      **Accident Prevention**  
Public protection of travelers  
*For Mining accident prevention and relief, see 622.86*
- .88      **First Aid**
- .9      It is recommended that **Veterinary Sanitation** be classified in 636.0894
- 615      **THERAPEUTICS**  
Treatment of disease  
Includes Materia medica and pharmacology; nature, sources, mode of administration, effects on the body of medicinal substances, e.g. antibiotics, biologicals; pharmacopoeias; formularies; dispensaries
- .37      It is recommended that **Immunology** be classified in 616.97
- .4      **Pharmacy**  
Preparation and dispensing of drugs

- 615.5      **Pharmacotherapy**  
            Use of drugs in treatment of disease  
            *For Pharmacotherapy of specific diseases, see diseases, e.g.*  
            *Use of quinine in treatment of malaria, 616.9*
- .8          **Physiotherapy**  
            Treatment of disease by physical agents other than drugs, e.g.  
            heat, water, light, electricity, radiation  
            Includes thermotherapy, hydrotherapy, actinotherapy, electro-  
            therapeutics, radiotherapy
- .82        **Mechanotherapy**  
            Treatment of disease by mechanical means, e.g. massage,  
            exercise, rest  
            Includes osteopathy, chiropractic
- .85        **Other Types of Therapy**  
            Use of other agents, e.g. diet, religion, for remedial purposes  
            Includes naturopathy, dietotherapy, hierotherapy  
            *For Psychotherapy, see 131.32*
- .851      **Occupational Therapy**  
            Use of occupations for purposes of treatment  
            *For Vocational rehabilitation, see 371.91*
- .9          **Toxicology**  
            Study of poisons, their nature, effect, detection, antidotes;  
            treatment of conditions produced by poisoning  
            Includes organic, inorganic, vegetable, animal, gaseous, food  
            poisons
- 616      **INTERNAL AND CLINICAL MEDICINE**  
            Nature of disease, its diagnosis and treatment  
            Includes domestic medicine or treatment of minor ailments at  
            home without direction of physician  
            *For Pathology, diagnosis, treatment of specific diseases, see*  
            *diseases, e.g. Treatment of arthritis, 616.7*
- .01        **Etiology and Pathology**  
            Cause and nature of diseases  
            Includes medical bacteriology

- 
- 616.012      **Nosology**  
Classification of diseases
- .07      **Symptomatology and Diagnosis**  
Symptoms of disease      Diagnosis by clinical, physical, laboratory, serum, pathological, roentgen, differential methods  
This form division may be used to indicate diagnostic methods applied to specific diseases, e.g. Electrocardiography, 616.107
- .08      **Psychosomatic Medicine**  
Treatment of diseases resulting from interrelationship between bodily processes and emotional life  
*For Psychosomatics, see 131*
- .1      **Cardiovascular System      Cardiology**  
Hygiene, pathology of heart, arteries, veins, capillaries  
Includes diagnosis, treatment of carditis, angina pectoris, thrombosis, arteriosclerosis, phlebitis, varix
- .15      **Hemic and Lymphatic System      Angiology**  
Hygiene, pathology of blood-forming organs, blood and lymph, spleen, lymphatic channels, lymph nodes and lymphatic tissue  
Includes diagnosis, treatment of anemia, leukemia, hemophilia, Hodgkin's disease, high blood pressure  
Lymphatic system was formerly classified in 616.4
- .151      **Blood Transfusions**  
Includes blood banks, blood plasma
- .2      **Respiratory System**  
Hygiene, pathology of lungs, bronchi and bronchioles, pleura  
Includes diagnosis, treatment of common cold, pneumonia, tuberculosis, bronchitis, pleurisy
- .3      **Digestive System      Gastroenterology and Proctology**  
Hygiene, pathology of stomach, intestines, liver and biliary tract, pancreas  
Includes diagnosis, treatment of indigestion, gastritis, constipation, colitis, appendicitis, hemorrhoids, jaundice

- 616.4      **Endocrine System      Endocrinology and Hormone Therapy**  
Hygiene, pathology of thyroid, parathyroids, thymus, pituitary and pineal bodies, adrenals, suprarenals, carotid  
Includes diagnosis, treatment of goiter, cretinism, Addison's disease  
It is recommended that **Lymphatic System** be classified in 616.15
- .46      **Metabolic and Nutritional Disorders      Vitamin Therapy**  
Includes diagnosis and treatment of gout, rickets, scurvy, avitaminosis, diabetes (formerly classified in 616.63)
- .5      **Integumentary System      Dermatology**  
Hygiene, pathology of skin, hair, nails  
Includes diagnosis, treatment of acne, dermatitis, eczema, dandruff, baldness
- .6      **Urogenital System      Urology**  
Hygiene, pathology of kidney, ureter, bladder, urethra, male genital system  
Includes diagnosis, treatment of nephritis, enuresis, prostatitis, impotence, sterility of males  
It is recommended that **Diabetes** be classified in 616.46  
For *Female genital system*, see 618
- .7      **Musculo-skeletal System**  
Hygiene, pathology of bones, joints, ligaments, tendons, and bursae, connective tissue and fascia, muscles  
Includes diagnosis, treatment of osteomyelitis, arthritis, bursitis, myositis  
For *Orthopedics*, see 617.3
- .8      **Nervous System      Neurology**  
Hygiene, pathology of brain, spinal cord and nerves, meninges, cerebrospinal spaces and fluid  
Includes diagnosis, treatment of apoplexy, encephalitis, neuralgia, insomnia, epilepsy, aphasia, meningitis, neuroses
- .86      **Intoxicants**  
Effect of stimulants and narcotics on human body  
Includes diagnosis, treatment of alcoholism, drug habit

- 
- 616.89      **Psychoses      Psychiatry**  
Includes diagnosis, treatment of schizophrenia, paranoia,  
manic-depressive psychoses, dementia praecox  
*For Psychotherapy and Psychoanalysis, see Clinical psy-  
chology, 131.3*
- .9      **Diseases of the Body as a Whole**  
Includes diagnosis, treatment of contagious, infectious and  
virus diseases
- .95      **Venereal Diseases      Venereology**  
Includes syphilis, gonorrhea
- .96      **Parasitic Diseases      Medical Parasitology**
- .97      **Anaphylaxis and Allergies**  
Includes immunology (formerly classified in 615.37)
- .98      **Medical Climatology and Meteorology**  
Relation of air pressure, altitude, climate, moisture, weather  
to health  
Includes tropical medicine, aviation medicine (formerly  
classified in 629.13256), submarine medicine
- .99      **Neoplastic Diseases**  
Includes tumors, cancers
- 617      **SURGERY**  
Treatment of disease by manual and instrumental operations
- .3      **Orthopedics**  
Correction of deformities and treatment of chronic diseases of  
joints and spine
- .6      **Oral Surgery and Dentistry**  
Teeth and gums and their diseases  
Includes operative dentistry, orthodontia, prosthetic dentistry,  
pedodontia
- .7      **Ophthalmology      Optometry**  
Eye and its disorders, e.g. astigmatism, myopia, glaucoma  
Includes artificial eyes, spectacles and their fitting, mechanical  
work of opticians (frames and lenses)

## 620 ENGINEERING

Includes civil engineering

For Form divisions .2-.9, see p. lv; exception in .1 follows:

- 620.02      **Quantities and Cost**
- .03        **Contracts and Specifications**
- .04        **Designs and Drawings**
  - Where interest in Engineering drafting lies in drawing, classify in 744
- .07        **Laws and Regulations**
- .09        **Reports**
- .1         **Engineering Mechanics and Materials**
  - Includes applied mechanics, vibration in engineering
- .11        **Engineering Materials**
  - Includes theory of strength of materials; engineering properties of materials not specifically classified in 620.12-.19
- .112       **Tests of Materials**
  - Testing methods      Equipment      Performance
  - Includes tests for strength (influence of temperature, corrosion, weathering, plasticity, fatigue, deformation, tension, compression, hardness); tests for other engineering properties (homogeneity, thermal expansion, electrical conductivity); testing methods (magnetic particle testing, radiographic testing)
  - For Application to specific materials, see material, 620.12-.19
- .12        **Wood**
  - For Deterioration and preservation of wood, see 691.1
- .13        **Stone, Cement and Concrete**
- .132       **Stone**
- .135       **Cement**
- .136       **Concrete**
- .137       **Reinforced Concrete**

- 620.14      **Brick, Tile, Glass**
- .15      **Masonry Adhesives**
- .17      **Iron, Steel, and Alloy Steels**
- .172      **Corrosion Properties**
- .173      **Elastic Limit Properties**
  - Includes plasticity, fatigue, deformation
- .18      **Other Metals and Their Alloys**
- .19      **Other Materials**
  - Includes plastics, rubber, laminated materials
  - For Mechanics of engineering soils, see 624.151

## 621      **MECHANICAL ENGINEERING**

*For Marine engineering, see 623.87; Aeronautics, 629.1; Motor vehicle engineering, 629.2; Transportation engineering, 625*

- .01      **Engineering Thermodynamics**
- .1      **Steam Power Engineering**
- .11      **Steam Engines**
  - Design of engine and parts
  - Includes operation and maintenance of steam engines, e.g. packing, oiling; valve mechanisms and governors
- .12      It is recommended that **Marine Engines** be classified in 623.872
- .13      It is recommended that **Steam Locomotives** be classified in 625.26
- .14      **Steam Tractors and Rollers**
- .16      **Steam Turbines**
  - Includes types, design, construction, maintenance of steam turbines
- .18      **Steam Generation**
- .182      **Fuels and Combustion**
  - Includes fuels for boiler heating (solid, liquid, gaseous fuels, fissionable material), fuel combustion
  - For Technology of fuels, see 662.6

- 
- 621.183      **Boiler Furnaces**  
Includes boiler furnace details (mechanical stokers, ash conveyers, chimneys, draft appliances, smoke consumers)
- .184      **Boilers**  
Includes types of steam boilers; boiler construction, erection, firing, maintenance and inspection; boiler accessories
- .185      **Steam Distribution and Circulation**  
Includes piping
- .19      **Steam Power Plants**  
Central stations  
Includes feedwater heaters, economizers, pumps, separators, superheaters, condensers, cooling towers, instruments
- .2      **Hydraulic Power Equipment**  
Industrial use of water as motive power  
Includes water wheels, turbines, hydraulic engines, hoists, elevators, hydraulic presses, hydraulic rams, machines run by water under pressure maintained by accumulators; constructions and appliances for distributing and regulating supply of water to hydraulic power equipment  
For Hydraulic engineering, see 627; Water-supply engineering, 628.1; Theory of Mechanics of liquids, 532
- .3      **Electrical Engineering**
- 621.31-621.37 ELECTRIC POWER ENGINEERING
- 621.38 ELECTRIC COMMUNICATION ENGINEERING
- .31      **Generation of Electricity**  
Includes Dynamoelectric machinery, transformers, transmission of electricity
- .312      **Production of Electric Power**  
Includes operation, maintenance and testing of power stations (steam, gas turbine, Diesel, hydraulic); and substations (transformer, converter)

- 
- 621.313      Dynamoelectric Machinery**  
Design      Construction      Installation      Operation  
Maintenance      Testing  
Includes direct or continuous current machinery; alternating-current machinery
- .314      Transformers, Regulators and Reactors**
- .316      Details of Electric Machinery**  
Includes armatures, field cores, brushes
- .317      Power Station Wiring      Switchboards and Control Devices**  
Includes panels (generator, motor, feeder); switches and circuit breakers (oil, air, thermal); safety and signal devices, e.g. barriers and compartments, fuzes, lightning arresters
- .319      Transmission of Electric Energy**  
Includes transmission systems (direct or continuous, alternating current systems); transmission lines and conductors (overhead or aerial, underground lines); cables, wires and conductors; insulating materials; insulators; protective devices, e.g. line lightning arresters  
*For Local wiring, see specific application, e.g. Electric light wiring, 621.328*
- .32      Electric Lighting**  
Illumination engineering (formerly classified in 628.9)  
Includes design of domestic (formerly classified in 644), industrial, public lighting systems for streets, parks, public buildings; flood lighting for sports and expositions; arc, incandescent, fluorescent and neon tube lighting
- .328      Apparatus at Service End of Line**  
Includes panels, fuzes, insulators, switches, protective devices; underwriter requirements, e.g. national electric code, house wiring
- .33      It is recommended that Electric Traction be classified in 625.1; Electric Locomotives in 625.26**  
*For Marine propulsion, see 623.8*

621.34

**Electronics and Electron Tubes**

*For Physical electronics, see 537.5; Industrial and scientific application, the subject, e.g. Radar, 621.381; Particle detectors in nuclear physics, 539.7; Electronic navigation, 623.893*

.342

**Electron Tubes and Their Characteristics**

Includes vacuum tubes, cathode ray tubes, photoelectric cells

*For Vacuum tubes as radio apparatus, see 621.3843*

.343

**Electronic Circuit Functions**

.345

**Sound-reproduction Applications**

Includes sound recording, reproduction of sound in moving pictures

.35

**Production of Electricity Directly from Chemical Action**

Includes primary and storage batteries

*For Industrial electrochemistry, see 660.29*

.37

**Electric Measurements**

Standards      Calibration of instruments      Testing

Includes resistance measurement (inductance, capacity) by Wheatstone bridges, ohmmeters, resistance boxes; voltage measurement by voltmeters, electrometers, potentiometers, standard cells; current measurement by galvanometers, ammeters, milliammeters; quantity or energy measurement by coulometers, ampere-hour meters, watt-hour meters; power measurement by wattmeters; frequency, phase, power-factor meters, synchronizers, oscillographs; measurement of non-electric quantities by electrical means, e.g. electric thermometers

.38

**Electric Communication Engineering**

.381

**Radar**

621.382

**Telegraphy (Wire)**

Includes telegraphic codes; telegraphic systems; automatic code telegraphy and high speed systems, e.g. Bain and Morse systems, Wheatstone; printing and writing telegraphy, e.g. stockticker, teleprinter, teletype, telautograph; facsimile telegraphy or phototelegraphy; submarine cable telegraphy; telegraph instruments (formerly classified in 621.383)

*For Radiotelegraph, see 621.384*

.383

It is recommended that **Telegraph Instruments** be classified in 621.382

.384

**Radio**

Includes radiotelegraph (formerly classified in .3842-3-4), radiofacsimile, radiotelephone (formerly classified in .3845-6-7), radio circuits, measurement and standardization

*For Radio administration, regulation, finance, facilities, services, see 384.5*

.3841

**Radio Principles**

Includes radio waves: characteristics, propagation, radiation; transmission phenomena: fading, meteorologic influences, ionosphere

621.3842-.3849      Former expansions of radio have used .3841 as base number. In order to shorten number, .384 has been used as base number

.3843

**Radio Apparatus and Equipment**

Formerly .38413

Includes generating, sending, transmitting apparatus, vacuum and electron tubes, parts of circuits, e.g. capacitors, inductors, modulating devices, transmission lines (radio), wave guides; antennas, aerials and their substitutes; receiving apparatus and instruments, detectors, rectifiers, amplifiers, acoustic receivers, recording devices, receiving sets; maintenance, repair and testing

- 
- 621.3845**      **Radio Communication Systems**  
Formerly .38415  
For Commercial radio stations, see 384.5
- .3849**      **Applications of Radio**  
Formerly .38419  
Comprehensive material only  
Includes radio transmitting  
It is recommended that specific applications be classified with specific number, e.g. Radio aids to navigation (marine), 623.894; Radio landing aids (aeronautics), 629.16  
For Radio show production, see 792.94; Radio advertising, 659.14; Radio in teaching, 371.333; Radio in adult education, 374.26; Radio speech, 808.5; Radio broadcasting, 384.5
- .385**      **Telephone (Wire)**  
Includes telephone systems (party line, intercommunication systems, central switchboard systems, automatic systems)  
For Radiotelephone, see 621.384
- .388**      **Television**  
Includes systems (wire and wireless)
- .3883**      **Television Apparatus**  
Includes construction, operation, maintenance, testing
- .3889**      **Television Applications**  
For Television show production, see 792.95; Television broadcasting, 384.55
- .389**      **Other Electrical Communication**  
Electric bells and buzzers, electric alarms, public address systems
- .39**      **Other Applications of Electricity**  
It is recommended that specific applications be classified with specific numbers, e.g. Electricity on farm, 631.37; Household electrical appliances, 643.6; Use of electricity for heating, 697.7; Electric welding, 671.521

- 
- 621.4 Internal Combustion and Heat Engines Other Than Steam**  
 Principles      Design      Construction      Performance  
 Testing  
*For Steam engines, see 621.11; Engineering thermodynamics, 621.01*
- .41 External Combustion Engines**  
*Includes hot air engines*
- .42 Compressed or Rarefied Air or Gas Engines**  
*For Internal combustion gas engines, see 621.43; External combustion gas engines, 621.41*
- .43 Internal Combustion Engines**  
*Includes engines especially designed to use gas, gasoline, and other liquid or solid fuels; gas turbines*  
*For Aircraft engines, see 629.1435; Automobile engines, 629.25; Marine engines, 623.872*
- .436 Diesel Engines**  
*For Diesel locomotives, see 625.26*
- .437 Parts and Accessories of Internal Combustion Engines**  
*For Specific application, see specific engines, e.g. Diesel engines, 621.436*
- .47 Solar Engines**
- .48 Atomic Energy Engines**  
*Use of atomic fission as source of power*
- .49 Power Plants and Central Stations Other Than Steam Power Plants**
- .5 Pneumatic Machinery**  
*Includes air compressors; piping, mains, gages for compressed air transmission and distribution*
- .54 Applications for Compressed Air**  
*Includes pneumatic cleaning, sandblasts, pneumatic tubes and carriers*  
*For Pneumatic hoists, see 621.86; Pneumatic machine tools, 621.9*

- 
- 621.56      **Refrigeration**  
Includes refrigerants, refrigerating systems and plants, comprehensive material on refrigeration and air conditioning  
*For Specific application of refrigeration, see subject, e.g. Refrigeration of foods, 664.85; Air conditioning, 697*
- .57      **Refrigerating Machines**  
Includes ammonia machines
- .58      **Ice Manufacture**
- .6      **Fans, Blowers and Pumps**  
Design      Construction      Tests  
Includes rotary, centrifugal blowers; direct acting, rotary, centrifugal, fire, hydraulic pumps; steam injectors and ejectors  
*For Air compressors, see 621.5*
- .7      **Shop Management**  
Engineering questions affecting establishment and operation of shops; arrangement with reference to sequence of processes, mechanical equipment, economy of power  
Includes woodworking, pattern, forge, sheet metal shops; foundries, blast furnaces, rolling mills  
*For Design, maintenance and operation of machine and hand tools, see 621.9; Metal manufactures including sheet metal work, 671*
- .75      **Machine Shop Practice**
- .8      **Power Transmission Machinery and Materials-Handling Equipment**  
Elements      Design      Construction      Tests
- .82      **Journals, Bearings, Springs, Couplings, Clutches**  
Includes Universal joints
- .83      **Gears and Cams**
- .85      **Belt, Rope and Chain Transmission**
- .86      **Materials-handling Equipment**  
Includes hoists, conveyers  
*For Pneumatic tubes, see 621.54*

- 
- 621.87      **Cranes, Derricks, Elevators**
- .88      **Fastenings**  
             Includes clamps, vises, screws and bolts, rivets, nails
- .89      **Lubrication**  
             For Production and properties of lubricants, see 665
- .9      **Machine and Hand Tools**  
             Design      Maintenance      Operation  
             Includes use of diamonds for grinding, cutting; catalogs  
             For Specific application, see specific tools, e.g. Wood-  
             working tools, 674.4
- .91      **Planing and Milling Machines**
- .92      **Grinding and Filing Tools**  
             Includes abrasives, crushers
- .93      **Cutting and Sawing Tools**
- .94      **Lathes and Boring Mills**  
             Includes screw and pipe threading
- .95      **Drilling and Reaming Machinery**
- .98      **Bending, Straightening and Shaping Machinery**  
             Includes flanging and die press machinery
- .99      **Gages, Jigs and Fixtures**
- 622      **MINING ENGINEERING**  
             Discovery and extraction of ores and economically useful min-  
             erals  
             Includes mining laws  
             For Metallurgy, see 669; Metal manufactures, 671-673; Eco-  
             nomics of mineral industries, 338.2; Mineral land resources,  
             333.8; Conservation of mineral resources, 333.72

**622.1 Preliminaries to Mining**

Includes mining prospecting methods, e.g. geological, geophysical (magnetic, gravimetric, seismic, electrical, geochemical, geothermal, resistivity and radioactivity methods); mine surveying; development workings

*For Economic geology, see 553; Application to specific mineral, see mineral, e.g. Prospecting for gold, 622.342*

**.17 Mining Economics**

Includes valuation (mine examination, sampling and measuring, tonnage calculations, analysis of costs); organization (formation of companies, promotion and sale of stock, taxation) and management

**.2 Mining Operations**

Practices Tools, equipment, machinery

Includes quarrying, boring, shaft sinking, tunneling, stoping, timbering and roofing of mines

*For Milling plant design, see 622.7; Application to specific mineral, see mineral, e.g. Blasting for marble, 622.35*

**.23 Drilling and Blasting**

Methods Drills and accessories Drill sharpening

Includes selection, handling and use of blasting explosives; safety measures

*For Explosives technology, see 662.2*

**.3 Types of Mining**

Practices Special tools, equipment, machinery

Includes open pit mining, alluvial mining (placer, hydraulic, dredging and drift mining)

**.33 Mining of Mineral Fuels and Other Organic Minerals**

Practices Equipment, machinery

Includes mining of coal, peat, lignite, graphite, asphalt

**.338 Petroleum Mining**

Includes prospecting; well drilling

*For Petroleum technology, see 665.5*

- 
- 622.34 Mining of Metalliferous Ores**  
Practices      Tools, equipment, machinery  
Includes iron, copper, lead, zinc, tin, mercury, manganese, chromium, antimony, nickel
- .342 Gold and Silver Mining**
- .35 Building Stone Quarrying**  
Includes marble, limestone, granite, sandstone, slate
- .36 Mining of Nonmetalliferous Minerals**  
Includes mining of construction commodities (sand, gravel, gypsum, lime, asbestos); fertilizer materials (phosphate rock, potash salt, nitrates); chemical raw materials (sulfur, pyrite, lime, fluorspar, barite, salt, magnesite, brucite, dolomite); ceramic raw materials (clay, feldspar, flint, glass sand); refractory materials (bauxite, silica, chromite); abrasive materials (pumice, garnet, corundum, emery); mica, talc, boron, lithium, strontium materials
- .38 Mining of Ornamental and Precious Stones**  
Includes gems
- .4 Mine Ventilation, Air Conditioning, Lighting**  
Methods      Equipment  
Includes mine gases, methods of detection
- .5 Mine Drainage**  
Methods      Equipment      Costs  
Removal of water from mines by drain tunnels and ditches; pumping
- .6 Transportation and Hoisting**  
Methods      Equipment  
Transportation of ore, waste, timber, men and supplies on surface and underground; hoisting from one level to another  
Includes loading, unloading, haulage systems, transference between two points

622.7

**Ore Dressing**

Methods      Equipment

Separation and saving valuable minerals from valueless material of an ore; concentration into smaller bulk and weight. Is variously termed concentration, washing, separating or milling

Includes comminution (breaking, grinding, crushing); concentration by gravity, heavy fluid, flotation, amalgamation and magnetic methods; milling plant design

*For Preparation and treatment of coal, see 662.623; Metallurgical treatment of ores, including reduction and refinement, 669*

.78

It is recommended that **Coal Washing** be classified in 662.623

.8

**Mine Dangers and Their Prevention**

Includes fires, fall of rock and ore

.81

**Explosions**

Causes      Occurrence

.86

**Accident Prevention and Relief**

Includes safety measures (signal systems, inspection and investigation of conditions, safety apparatus); organization for rescue and relief, first aid

623

**MILITARY ENGINEERING**

Military construction (fortifications, cantonments and depots, roads, bridges, pipe lines, railroads); design and use of weapons used in warfare; surveying, mapping, and procurement, storage and issue of engineering supplies

*For Maneuvers, strategy, tactics, see 355; Engineer Corps, 356.94*

.1

**Fortification**

Strengthening defensive positions, places or areas by construction of military works

Includes permanent fortifications and field or temporary fortifications

- 
- 623.2      Offensive Engineering Operations**  
Includes demolition of fortifications, mine fields, booby traps, bridges, rail communications, roads, docks; cutting of wire entanglements
- .3          Defensive Engineering Operations**  
Includes mine laying; creation of obstacles and preparation of demolition of communication facilities
- .38        Design and Construction of Defenses Against Bombs and Shells**
- .4          Ordnance**  
Design of weapons, such as guns, small arms; tools and machinery used for war  
Includes naval ordnance (formerly classified in 623.9)  
*For Gunsmithing, see 683; Gunnery, 623.5*
- .41        Artillery**  
Guns of greater caliber than small arms and generally too heavy to be carried by hand  
Includes field, sea coast and antiaircraft, naval guns
- .42        Types of Artillery**  
Includes guns, howitzers, mortars
- .43        Mounts and Carriages      Armored Vehicles**  
Includes tanks, half-tracks, self propelled artillery (tank destroyers), towed artillery
- .44        Small Arms and Other Weapons**  
Includes rifles, rifle grenades, carbines, pistols, machine and submachine guns, side arms (swords, bayonets, trench knives); bazookas  
*For Gunsmithing, see 683*
- .445       Chemical Warfare Weapons**  
Includes flame throwers, mortars for smoke and gas projectiles

623.45

**Ammunition**

Projectiles used with all types of firearms, together with requisite propellants, bursting charges, fuses, cartridge cases and means of ignition

Includes small arms ammunition (cartridges, bullets)

*For Explosive manufacture, see 662.2*

.451

**Projectiles**

Missiles used in modern warfare

Includes bombs (demolition, fragmentation, gas and chemical, incendiary); grenades; shells (explosive, chemical, incendiary, gas, smoke, star); torpedos, rockets, guided missiles

Incendiary bombs was formerly classified in 623.45431, Rockets in 623.45432

*For Gunsmithing, see 683; Chemical and bacteriological warfare, 356.93*

.452

**Explosives**

Chemical compounds used for propelling charges, bursting and demolition charges

Includes nitrocellulose powders, TNT, cordite, melinite, amatol, fulminate

*For Explosive manufacture, see 662.2*

.454

**Detonators**

Includes fuses

It is recommended that Incendiary bombs and Rockets be classified in 623.451

.46

**Artillery Accessories**

Includes sighting and laying apparatus, range finders, telescopes, aiming circles, computers

*For Gunsmithing, see 683*

.5

**Gunnery**

Practical handling of artillery fire

Includes sighting, range finding, firing and mathematical theory

*For Gunsmithing, see 683*

623.53

**Ballistics**

Science which deals with motion of projectiles

Includes interior ballistics (movement of projectile within the bore); ballistic tables, instruments

.54

**Exterior Ballistics**

Movement of projectile from time it leaves muzzle until it comes to rest

Includes trajectory

.6

**Military Engineering Operations**

Protection	Obstruction	Demolition	Construction
Operation	Repair		

Includes temporary and rapid construction, operation and repair for military purposes of roads, railways, harbors, docks, bridges, power and light systems and water supply

For Military architecture, see 725.1; Construction, 690

.7

**Military Adaptations of Peacetime Techniques**

.71

**Military Topography**

Art of military sketching, map making and reading

Includes mosaics, photogrammetry and reading of aerial photographs

.73

**Military Communications**

Includes military use of signal communication, teletype, telephone, telegraph, radio (walkie-talkie)

.74

It is recommended that **Military Aeronautics** be classified in 629.1

.77

**Camouflage Engineering**

.8

**Naval Engineering**

Design, construction, equipment and handling of ships

.81

**Naval Architecture**

Design of ships

Includes calculations and considerations of areas and moments, stability, displacement, resistance and speed, rolling, structural strength, tonnage, steering and maneuvering

For Graphic statics, see 531.2; Strength of materials, 620.11; Fluid mechanics, 532

623.82

**Shipbuilding**

Construction      Maintenance      Repair

Includes construction of model ships of all types

.821

**Historic Ships**

Includes galleys, privateers, clipper ships, early warships

623.822-623.829

**MODERN SHIPBUILDING**

.822

**Sailing Ships**

Includes small sailing craft, racing yachts

.823

**Small Power Craft**

Includes motorboats

.824

**Passenger and Cargo Ships**

Includes passenger liners, cargo ships, bulk carriers (grain, coal), tankers (liquid cargo) for ocean and inland water transport, power yachts

*For Description of liners, see 387.54; Merchant marine, 387.5*

.825

**Warships**

Includes battleships, aircraft carriers, cruisers, destroyers, submarines, motor torpedo boats (PT), patrol craft, landing craft (LST, LCC, LCM)

*For Number, disposition, see 359.31*

.828

**Special Purpose Ships**

Includes trawlers, dredgers, icebreakers, fireboats

.829

**Other**

Includes hand propelled craft (canoes, lifeboats); towed craft (barges, scows)

.83

**Shipbuilding Facilities**

Includes design and construction of model tanks and basins for experiment, slips and launching ways, drydocks, mold-lofts

623.84

**Building the Hull**

Use of wood, steel alloys; construction of body of ship (shell plating, framing decks and bulkheads)

Includes joinery, riveting, welding, sheet metal work for shipbuilders (loftsmen, ship fitters, shipwrights)

.85

**Electrical, Mechanical and Chemical Accessory Systems**

.852

**Marine Electricity**

Includes equipment, installation

It is recommended that Masts and Gear be classified in 623.86

*For Electrical engineering, see 621.3*

.853

**Marine Heating, Ventilating and Refrigeration**

*For Heating and ventilating engineering, see 697; Refrigeration engineering, 621.56*

.854

**Marine Sanitation Systems**

Includes water distillation, fire detection and protective systems

*For Public health, see 614*

.86

**Equipment and Outfit**

Includes rigging (rope, masts, booms, yards, sails, cordage); gear (arrangement of machinery for working pumps, rudder, anchor, cargo); nautical instruments, wireless equipment, signal lights, life-saving equipment

Gear and Masts was formerly classified in 623.85

.87

**Marine Engineering**

Invention	Design	Building	Installation	Op-
eration	Repair			

Study of marine propulsion machinery and its auxiliaries

*For Theory of resistance, see 532.5; Design involving calculation of resistance, 623.81*

- 
- 623.872 Marine Engines**  
Includes steam engines (reciprocating and turbines), Internal combustion engines (gas, marine, Diesel)  
Marine engines was formerly classified in 621.12  
For Steam engineering, see 621.1; Diesel engineering, 621.436
- .873 Marine Engine Auxiliaries**  
Includes marine piping, condensers, blowers, pumps, boilers, gears, propellers and propulsion shafting
- .874 Marine Fuels**
- .88 Seamanship**  
Art and science by which all vessels are handled  
Includes ship handling (steering, small boat handling, towing, rescue at sea, formation); marlinspike seamanship (care, handling, knotting, splicing and use of wire and fiber rope); Rules of Road; use of ground tackle
- .89 Navigation**  
Art and science of determining position of vessels at any time and conducting them from one position to another  
Includes problems of position, distance and direction  
For Celestial navigation or nautical astronomy, see 527
- .892 Geo-navigation**  
Includes piloting or conduct of vessels in channels, harbors and along coasts where landmarks and aids to navigation are available for fixing position; dead reckoning; methods of establishing distance covered and point reached by compass, observation, log reading
- .893 Electronic Navigation**  
Navigation by radar, loran, Decca, Console
- .894 Aids to Navigation**  
Includes lighthouses, lightships, buoys (silent, sound, underwater sound signals); government charts and publications, e.g. Light Lists, Sailing Directions, Navigational Tables, Tide and Current Tables

- 623.9 It is recommended that **Armor Protection of Warships** be classified with **Warship Construction**, 623.825; **Naval Ordnance with Ordnance**, 623.4

## 624 STRUCTURAL ENGINEERING

Arrangement and proportioning of parts or elements of a structure so that its function may be achieved with safety and economy

Includes bridge, building, foundation, underpinning engineering

*For Design of structures for beauty, see 720; Construction of buildings, 690; Dam engineering, 627.8; Port engineering, 627.3*

### .1 General Principles of Structural Engineering

### .15 Earthwork and Foundation Engineering

Includes excavating, shoring, pile foundations

### .151 Mechanics of Engineering Soils

Identification and classification      Site investigation

Includes engineering properties of soils (shear strength, moisture: density relationship, permeability, compressibility); earth pressure, including stability of slopes and foundations

### .152 Tunneling

*For Specific purpose tunnels, see subject, e.g. Railroad tunnels, 625.13*

### .16 Retaining Walls, Embankment Engineering

Includes abutments

### .17 Theory of Structure

Includes statically indeterminate structures

*For Graphic statics, see 531.2*

624.171

**Stress Analysis**

Determination of magnitudes and forces which must be resisted by parts or materials of structures

Includes determination of loads which arise from weight of construction, use of structure, such natural forces as wind pressure, earthquake, weight of snow and ice; impact, lateral forces and reactions (shear, bending moment)

*.172 Statically indeterminate*

.177

**Design of Structural Elements**

Determination of materials to be used, shape and size of individual members in order to provide safety

Includes restrained and rigid beams, girders, columns, arches, slabs, trusses, frames and structural fastenings and connections (bolts, rivets, pins, electric arc welding)

.18

**Systems of Structural Engineering**

Includes timber, masonry (brick, cement, concrete, reinforced concrete), iron and steel construction

*19 R.C.*

.2

**Girder Bridges**

Includes comprehensive treatment of all types of bridges; floor systems

*For Girder design, see 624.177; Railroad bridges, 625.13*

.3

**Trussed Bridges**

Includes cantilever bridges

*For Truss design, see 624.177*

.5

**Suspension Bridges**

.6

**Arch Bridges**

*For Arch design, see 624.177; Historic arch forms, 729.3*

.7

**Compound Structures**

Includes plate girder and suspension, trussed arch bridges

.8

**Movable Bridges**

Includes drawbridges, swing, lift, pontoon bridges

## 625

**TRANSPORTATION ENGINEERING**

Design      Construction      Maintenance      Operation

*For Transportation administration, regulation, finance, facilities, services, see 385-388; Architecture of transportation buildings, 725.3; Channels of communication in city planning, 711.7*

**.1 Railroad Engineering**

Design      Construction      Maintenance

Includes standard gage and special types of railroads, e.g. narrow gage, elevated, underground, cable, street

Electric traction was formerly classified in 621.33

*For Railroad transportation, see 385.1*

**.11 Railroad Surveying**

Includes reconnaissance, preliminary, locating surveys; grades, curves

**.12 Roadbed**

Includes railroad earthwork, e.g. grading, drainage, cuts and fills

**.13 Auxiliary Structures**

Includes railroad tunnels, railroad bridges

**.14 Railroad Tracks**

Design, construction, maintenance of tracks

**.16 Track Accessories**

Includes signals, switches, turnouts

**.19 Model Railroads**

Includes model trains

**.2 Rolling Stock**

Design      Construction      Maintenance

**.22 Cars**

Includes carbuilding (formerly classified in 699)

- 
- 625.25      **Accessory Equipment**  
             Includes brakes, couplings
- .26          **Locomotives**  
             Includes steam locomotives (formerly classified in 621.13);  
             Electric locomotives (formerly classified in 621.334); Diesel  
             locomotives
- .27          **Railroading**  
             Train operation
- .7           **Highway Engineering**  
             Design      Construction (materials, equipment, processes)  
             Maintenance  
             Includes pavements (formerly classified in 625.8)  
             For Street cleaning and snow removal, see 628.4
- .79          **Traffic Engineering**  
             Operation of highway systems      Traffic planning  
             Includes traffic characteristics; control devices, e.g. traffic  
             signals and signs
- .8           It is recommended that **Pavements** be classified in 625.7
- 626          It is recommended that **SHIP CANALS** and **LOCKS** be  
classified in 627.13; **IRRIGATION CANALS**, in 627.5
- 627          **HYDRAULIC ENGINEERING**  
             Materials      Apparatus      Processes  
             Water control, e.g. regulation of and protection against its  
             natural action, its artificial conveyance for useful purposes,  
             mechanical utilization of its force  
             Includes hydraulic models, dredging  
             For Water-supply engineering, see 628.1
- .1           **Inland Waterway Engineering**  
             Improvement of inland waterways for transportation  
             For Inland waterway transportation, see 386
- .12          **River Engineering**

- 
- 627.13      **Canal Engineering**  
Construction of ship canals (formerly classified in 626.9)  
Includes locks (formerly classified in 626.4)
- .2      **Harbor Engineering**  
Improvement of harbors to keep them open and safe  
Includes breakwaters
- .3      **Port Engineering**  
Design and construction of port facilities, e.g. docks, piers, wharves  
*For Aids to navigation, e.g. lighthouses, buoys, see 623.894*
- .4      **Flood Control Engineering**  
Preventive and protective control of floods  
Includes improvement of channels to lower flood heights; construction of flood control reservoirs, levees, river walls
- .5      **Reclamation Engineering**  
Reclamation of arid, marshy, or other waste land by construction of drainage and irrigation systems  
Includes irrigation canals (formerly classified in 626.8)  
*For Agricultural drainage and irrigation, see 631.6-.7*
- .8      **Dam Engineering**  
Design and construction of dams  
Includes sluices, spillways, weirs
- 628      **SANITARY ENGINEERING**  
Design, construction, operation of all works contributing to public health  
*For Public health measures for sanitation and control of environment, see 614.7*
- .1      **Water-supply Engineering**  
Waterworks or water-supply plants; procurement, storage, distribution, consumption of water
- .16      **Water Purification**  
Aeration, coagulation and sedimentation, filtration, disinfection of raw waters for removal of iron, color, taste, odor, hardness, turbidity

**628.3 Sewage Disposal**

Includes sewage disposal plants, sewage collection, sewage treatment by dilution, screening, tank and secondary treatment; disposal of liquid effluent and sludge

**.4 Municipal Sanitation**

Street cleaning; collection of municipal wastes, e.g. garbage, ashes, street sweepings, dead animals, rubbish; refuse disposal by incineration, burying, reduction  
Includes snow removal

**.5 Industrial Sanitation**

Trade waste utilization, treatment, disposal  
Includes industrial plant sanitation; treatment of air pollution from effluvium and smoke; stream pollution from trade wastes

*For Waste recovery and utilization in specific manufactures, see manufactures, e.g. Waste liquor recovery in pulp manufacture, 676.1*

**.8** It is recommended that **Heating, Ventilating and Air Conditioning Engineering** be classified in 697

**.9** It is recommended that **Illumination Engineering** be classified in 621.32

**629 OTHER BRANCHES OF ENGINEERING**

Includes comprehensive material on automotive engineering (aeronautical, motor vehicle)

629.1-629.18

*In order to shorten the base number for aeronautics, 3 has been dropped from 629.13, the number used in previous editions*

**.1 Aeronautics**

Includes military aeronautics

*For Air transportation including economics, business, and finance of air transport, see 387.7; Vocational guidance in aeronautics, 371.425*

- 
- 629.107 Study and Teaching**  
 Includes aeronautical research and experimentation, laboratories and wind tunnels; education and training aeronautics; engineering colleges, technical institutes  
*For Training in specific fields of aeronautics, see specific number, e.g. Flight training, 629.126; Courses of study and curricula designed for elementary and secondary schools, 375*
- .109 History**  
 Includes broad studies of air policy, accounts of flights and flight records  
*For Accounts of flights by balloon or airship, see 629.132*
- .12 Basic Considerations**
- .123 Aerodynamics of Flight**
- .125 Air Navigation**  
 Includes astronomy for air pilots (celestial and electronic navigation; aids, aerial maps, charts, almanacs)  
*It is recommended that Aviation medicine be classified in 616.98; Commercial airways and aerial routes, 387.72*  
*For Navigation instruments; see 629.15*
- .126 Piloting of Airplanes Flying**  
 Includes flight training, instrument flying  
*For Fighter pilot training, see 358.43*
- .13 Aircraft**
- .131 Aircraft Models and Model Making**
- .132 Lighter than Air**  

Development	Description	Design	Construction

                  Development      Description      Identification  
                  Includes transport, military, personal and research types  
                  of aircraft; seaplanes, flying boats, amphibians  
                  *For Guided missiles, see 623.451*
- .1333      **Gliders      Soaring Planes      Soaring Flight**
- .1335      **Rotating Wing Types**  
                  Autogiro      Helicopter
- .1339      **Other Heavier-than-air Aircraft**
- .14      **Airplane Design and Construction**  
                  Includes performance, performance calculations, testing,  
                  comfortization (heating, ventilating), interior design
- .141      **Stress Analysis and Structures**
- .142      **Aircraft Production and Maintenance**  
                  Includes materials, drafting room practice, riveting, sheet  
                  metal work, welding
- .143      **Parts and Details**  
                  Wings, fuselages, control surfaces  
                  Includes electric and hydraulic equipment and landing  
                  gear
- .1435      **Aircraft Power Plants**  
                  Includes general, reciprocating, and compound engines
- .14353      **Jet and Rocket Engines, Gas Turbines**  
                  Rockets and interplanetary travel
- .1436      **Propellers**
- .144      **Protective and Safety Devices**
- .15      **Aircraft Instruments**  
                  Includes flight, navigation, engine instruments  
                  *For Meteorological instruments, see 551.591*

- 
- 629.16      **Airports      Airdromes      Seadromes**  
                  Location      Design      Construction  
                  Includes landing aids and communications equipment  
                  Where interest in airports lies chiefly in communication planning, class in 711.7; if in architecture, 725.3  
                  For Airport administration and regulation, see 387.73
- .18      **Uses      Operating Problems**  
                  Includes use of aircraft for crop dusting, pipe line patrol, forest patrol, prospecting, and sky writing; technical and engineering aspects of operation of airplanes for commercial air transport, e.g. airplane weight and balance problems, cargo loading, refuelling in flight, cruise control for efficiency, noise, ice prevention and removal  
                  For Air sports, see 797.5; Aerial photography, 778.3; Photogrammetry, 526.98
- .2      **Motor Vehicle Engineering**  
                  Includes registration, title, taxes, licenses, inspection, financial management; model making  
                  For Insurance, see 368.57; Form divisions 01-09, p. iv
- .22      **Motor Vehicles**  
                  Description of passenger automobiles (private, taxicabs, buses); trucks, tractors; handbooks and manuals for specific makes of cars  
                  For Automobiles characterized by type of motor, e.g. electric automobiles, see 629.25; Design and construction, 629.23-.27; Operation, 629.28
- .226      **Trailers**  
                  Description      Construction
- .227      **Bicycles and Motorcycles**  
                  Description      Operation      Repair
- .23      **Motor Vehicle Production**  
                  Includes automotive materials; production methods, equipment, plant especially used in automobile production; testing of automobiles  
                  For Testing of materials, see 620.112

- 
- 629.24      Design and Construction of Automobiles**  
Includes running gear (frame, springs, axles, wheels); transmission (clutch, change speed gear, drive shaft with universal joints, differential); control system (steering device, throttle and spark control, hand levers, foot pedals, brake system)
- .25      Automobile Power Plants**  
Includes steam, electric and internal combustion (gasoline, Diesel) engines and their parts (cylinders, pistons, bearings, valves, manifolds)  
*For Repair, see 629.287*
- .253      Fuel and Fuel System**  
Includes carburetor
- .254      Ignition System**
- .255      Lubrication System**
- .256      Cooling System**
- .26      Automobile Body Work**  
Includes trimming, finishing
- .27      Automobile Accessories**  
Includes lights, signals
- .28      Operation of Motor Vehicles**  
Includes safe driving; operation of passenger automobiles, motor trucks, tractors  
*For Training and testing of drivers, see 629.207; Automobiling, 796.7*
- .287      Maintenance and Repair of Motor Vehicles**  
Includes greasing, lubrication, repair of all parts; service and repair manuals of specific make cars

## 630 AGRICULTURE

*For Rural sociology, see 301.35; For divisions .1–.9, p. lv; exception .2 follows:*

### 630.24      **Agricultural Chemistry**

*For Specific applications, see subject, e.g. Soil chemistry, 631.41*

## 631      **FARM MANAGEMENT**

*For Application of following to specific products, see product, e.g. Management of truck garden farm, 635; Animal husbandry, 636–639*

### .1      **Business Management of Farms**

Techniques

Includes problems of selection (location, means of communication, value), rental (share system), layout, types of farm

*For Land economics, see 333; Economic theories and statistics of agricultural production, 338.1*

### .16      **Financial Management of Farms**

Accounting      Bookkeeping

*Where interest lies chiefly in Accounting, class in 657.5*

### .18      **Marketing of Farm Products**

*For Marketing specific products, see product, e.g. Melons, 635.6; Agricultural markets, prices, 338.1*

### .2      **Farm Buildings**

*Where interest lies chiefly in Architecture, class in 720; e.g. Farm houses, 728.6; Outbuildings, 728.9*

## 631.3–632 SOIL AND CROP MANAGEMENT

*For Specific crop management, see crop, e.g.*

*Wheat production in U. S., 633.1*

### .3      **Farm Machinery and Equipment**

Operation      Maintenance      Catalogs

---

**631.37 Power and Power Machinery on the Farm**

Sources of power    Engines    Tractors

**.4 Pedology**

Study of soils

Includes analysis, experimentation, surveys and classification of soils of specific localities

**.41 Chemical Composition****.411 Soil Mineralogy****.43 Physical Properties**

Includes colloidal, organic matter; moisture

**.45 Erosion Control**

Wind erosion    Water erosion

Includes contour and strip planting, terracing, control of gullies with soil holding plants, crop rotation, grassed channel ways to carry off water, cover crops for seasonal practices, use of crop residues and mulches as methods of conservation, tree strips

*For Economic theory, legislation, and public policy of conservation of agricultural land, see 333.76; Irrigation, 631.7; Fertilizers, 631.8*

**.46 Biological Processes**

Includes nitrification and inoculation (formerly classified in 631.8472); microbiology of soils

**.5 Crop Production**

Tillage (preparation and working the soil)    Propagation (increase of new plants from existing plants by planting, grafting, cuttings, layering)    Growing (pruning, sheltered growing)    Harvesting    Storage

*For Fertilizers, see 631.8; Irrigation, 631.7; Specific crop production, the crop, e.g. Corn and corn growing, 633.1; Power and power machinery, 631.37*

- 
- 631.52      **Breeding**  
                Regulation and inspection      Catalogs      Seed industry  
                Crossing      Hybridizing  
                Origin of new plants (new species and new varieties)
- .58      **Special Methods**  
                Includes soil management (crop rotation and fallowing); dry  
                land farming; soilless culture (variously called hydroponics,  
                tank, chemical, water culture)
- .6      **Drainage**  
                Draining of swampy or marshy ground by simple ditches and  
                drains  
                *For Engineering construction, see 627-628; Economic as-*  
                *pects, legislation, and public policy of drainage, 333.72;*  
                *Reclamation which includes drainage and irrigation as major*  
                *engineering or national economic problems, 628 or 333.72*
- .7      **Irrigation**  
                Distribution and storage of water by simple ditches or irriga-  
                tion canals, wells or reservoirs  
                *For Engineering construction, see 627-628; Economic as-*  
                *pects, legislation, and public policy, 333.72; Reclamation*  
                *which includes drainage and irrigation as major engineering*  
                *or national economic problems, 627 or 333.72*
- .8      **Fertilizers and Manures**  
                Source      Production and manufacture      Analysis      Use  
                Control (legislation and inspection)  
                Includes commercial fertilizers (formerly classified in 668.6)
- .82      **Minor Elements**  
                Includes calcium (lime), sulfur (from gypsum), magne-  
                sium, manganese, iron, boron, copper, zinc
- .83      **Potash Fertilizer Materials**  
                Includes muriate of potash (potassium chloride), sulfate  
                of potash, Kainit or manure salt, wood ashes, seaweed

**631.84 Nitrogenous Fertilizer Materials**

Includes nitrate of soda, sulfate of ammonia, dried blood, tankage, fish, muck, peat, humus, the synthetics (ammonium nitrate, cyanamid, calcium nitrate, urea and ammonia liquors)

It is recommended that **Soil inoculation and nitrification** be classified in 631.46

**.85 Phosphoric Fertilizer Materials**

Includes rock phosphates, superphosphates or acid phosphates, basic slag, bone meal

**.86 Manures**

Includes horse, cow, hog, poultry, sheep manures, guano (formerly classified in 631.854)

**.87 Vegetable Manures**

Includes green manures (rye, clover, vetch, cow peas which are plowed under while still green), compost (decomposed or refuse materials, e.g. leaves, vegetable, peat moss)

## **632 INJURIOUS FACTORS IN CROP PRODUCTION**

Origin	Dissemination	Effects	Control
--------	---------------	---------	---------

Includes diseases, pests and blights

*For Injurious factors in animal husbandry, see 636*

**.1 Elements**

Includes extremes of heat, cold; hail, wind, floods, drought

**.2 Galls****.3 Bacteria**

Includes bacterial blights (fire blight, wilt, black rot)

*For Systematic classification and discussion of bacteria, see 589.9*

**.4 Fungi**

Includes rusts, smuts, bunts, mildews, molds, rots

*For Systematic classification and discussion of fungi, see 589.2; Fungicides, 632.95*

632.5

**Injurious Plants**

Includes injurious parasitic plants, e.g. mistletoe, dodder

.58

**Weeds**

Includes bindweed, mesquite, prickly pear, crab grass

.6

**Injurious Animals**

Includes birds, rodents

.7

**Injurious Insects**

Includes grasshoppers, locusts, crickets, plant lice, scale insects, beetles, weevils, maggots, flies, midges, fleas, moths, caterpillars, ants, wasps

*For Insecticides, see 632.95; Systematic classification and discussion of insects, 595.7*

.8

**Other Injurious Factors**

Includes virus infections

.9

**Control**

Includes inspection and regulation by government; quarantine, spraying, fumigating; by natural enemies; biological control

.95

**Preparations**

Includes fungicides, insecticides, rodenticides, herbicides, bactericides, pesticides, DDT

**633-635 PRODUCTION OF SPECIFIC CROPS**

<i>Business management</i>	<i>Propagation</i>	<i>Varieties</i>
<i>Growing</i>	<i>Yield</i>	<i>Storage</i>
		<i>Marketing</i>

*For Crop production in general, see 631.5; Economic theories of agricultural production, e.g. Overproduction of wheat, 338.17*

633

**FIELD CROPS**

Plants grown in fields under an extensive system of culture

Includes forage crops when considered inclusively (pasture grasses, cereals and legumes grown for hay, pasture or silage; and root crops used for feeding livestock)

- 
- 633.1 Cereals or Grain Crops**  
Grass grown for its edible grain  
Includes wheat, oats, barley, rye, corn, grain sorghum, grain flax, buckwheat, rice, seed producing millets
- .2 Pasture Grasses**  
Grasses upon which animals graze or pasture  
Includes blue grass and the hay grasses (redtop, orchard grass, timothy)
- .3 Pasture Legumes**  
Includes alfalfa, clover, sweet clover and lespedeza
- .4 Root Crops**  
Plants whose principal value is underground part which is used instead of hay  
Includes true roots (sugar beets, turnips, rutabagas, stock beets) and tubers (sweet potatoes)  
*For Potatoes, carrots, parsnips and sweet potatoes used as vegetables, see 635.1 and .2*
- .5 Fiber Crops**  
Plants grown primarily for textile or other industrial uses  
Includes cotton, hemp, flax
- .6 Sugar Crops**  
Plants selected and developed for their sugar  
Includes sugar cane, sugar beet, sorghum  
*For Sugar beets used for fodder, see 633.4; Sorghum as cereal, 633.1*
- .7 Alkaloidal Crops**  
Plants grown for use as stimulants  
Includes tobacco, tea, coffee, cacao  
*For Manufacture of tea, coffee, cocoa, see 663.9; of tobacco products, 679.2*
- .8 Miscellaneous Field Crops**  
Includes plants under extensive culture for use as flavoring; as source of oil, dye  
*For Herbs grown intensively in gardens, see 635.7*

633.88

**Medicinal Plants**

Includes ginseng, quinine, digitalis

634

**FRUIT CULTURE**Propagation  
Marketing

Varieties

Growing

Yield

Storage

Includes small fruits, nuts

May be divided alphabetically by name of fruit instead of numerically as follows:

*For Diseases and control, see 632*

.1

**Apple Family Fruits**

Includes pear, crabapple, quince

.2

**Peach Family Fruits**

Includes plum, cherry, apricot

.3

**Citrus Family Fruits**

Includes orange, grapefruit, lime, lemon

.4

**Other Tropical Fruits**

Includes guava, papaya, mango

.5

**Nuts**

Includes walnut, butternut, hickory nut, pecan, chestnut, hazel nut, almond

.6

**Palm Family and Miscellaneous Fruits**

Includes coconut, date, olive, avocado

.7

**Small Bush or Herblike Fruits**

Includes currant, blackberry, raspberry, blueberry, cranberry, strawberry, pineapple, banana

.8

**Grapes**

Table, wine, raisin

.9

**Forestry**

Art and science of managing forests and converting the product to greatest economic and industrial service

*For Form divisions 01-09, see p. lv*

634.92

**Forest Economics**

Includes physical influence of forests upon soil, water resources; their social influence upon man

.925

**Forest Policy**

Public forests      Private forests

Principles which govern the administration of the forest for its best permanent use

Includes formulation of laws and policies; conservation of water, wild life, timber for future use; forage for livestock; esthetic and spiritual values; facilities for recreation

*For Forests as part of natural resources conservation problem, see 333.75*

.927

**Statistics of Forest Resources**

Forest resources includes forest land area together with growing stock or timber capital it carries

Includes statistics of amount and value of production; distribution, consumption of timber; forest industries

.928

**Forest and Forest Industries Management**

Personnel      Business management (accounting, budgets and accounts)      Preparation of plans      Finance (valuation, insurance, taxation)      Mensuration (determining volume of timber stands, growth and yield)

.94

**Forest Ecology or Silvics**

Reaction of individual trees and tree groups to environment  
Includes site factors (light, soil, moisture, climate)

*For Action of forests on environment, see 634.92*

.95

**Silviculture**

Establishment, development, care and reproduction of stands of timber

Includes silvicultural systems of reproduction (selection, seed tree, clear cutting, shelterwood and coppice); improvement cutting and thinning

634.956

**Forestation**

Establishment of forest stands

Includes seeds and seedage, planting or reforestation, nursery practice

.96

**Forest Protection**

Includes methods of protecting forests from fire; climatic influences, pests, trespass, grazing

.97

**Taxonomic Forestry**

Application of forestry principles to individual tree species

.972

**Deciduous Trees**

Includes oak, maple, poplar, chestnut, beech, birch, linden, elm

.975

**Coniferous Trees**

Includes pine, spruce, hemlock, fir, cypress, cedar, larch, sequoia

.98

**Forest Utilization**

Most profitable use of forest products

Includes logs and logging and rough uses to which wood is put (cross ties, poles, piling, posts, mine timbers), wood identification, structure, tests, properties

*For Lumbering, see 674; Chemical utilization of wood and wood distillation, 668.7; Charcoal, 662.65; Wood pulp, 676.12; Wood using industries (cooperage, veneer, excelsior), 674.8; Engineering properties, 620.12*

.986

**Saps**

Production of naval stores, latex, maple sap, natural gums and resins

*For Manufacture or utilization of latex into rubber, see 678.5; Use of gums and resins in plastics, 668.4; Planting and growing of trees, 634.95*

.99

**Other Uses of Forests**

Includes grazing and pasture use, farm woodlands

635 HORTICULTURE

Business management    Propagation    Varieties    Growing  
or culture    Diseases and control    Storage    Marketing

Plants usually grown on a smaller scale than field crops; for food, ornament, home use, or commercial market

Includes gardening, truck gardening, home gardening, vegetable gardens, flower gardens

May be arranged alphabetically by name of vegetable instead of numerically as follows:

*For Landscape gardening (design, planning, descriptions of gardens), see 712; Vegetables grown extensively as field crops or for pasture or fodder, 633*

**.1 Edible Roots**

Includes beets, turnips, carrots, parsnips, radishes

**.2 Edible Tubers and Bulbs**

Includes potatoes, onions

**.3 Edible Leaves, Flowers, Stems**

Includes asparagus, artichokes, cabbage, Brussels sprouts

**.4 Greens**

Includes spinach, chard, rhubarb

**.5 Salads**

Includes lettuce, celery, water cress

**.6 Edible Seeds and Fruits**

Includes melons, squash, cucumbers, tomatoes, beans, peas, corn

**.7 Condiment and Sweet Herbs**

Includes mint, dill, anise, caraway, parsley

**.8 Mushrooms**

Includes truffles

635.9

**Flower Gardening or Floriculture**

Flowers and ornamental plants grown for home use or commercial market

Includes management of florist business, greenhouses, nurseries; flower shows, culture of special kinds of gardens, e.g. rock, water, tropical

*For Description, planning, and use of flowers to achieve specific purpose in landscape design, see 712.62; Systematic classification and discussion of flowers, 583-589*

.93

**Individual Plants**

Propagation    Breeding    Growing    Diseases and control  
Harvesting    Marketing (packing, shipping)

Includes specific flowers, e.g. roses, orchids, asters, geraniums, ferns, grass

.931

**Annuals and Biennials**

.932

**Perennials**

.96

**Plants for Home Use**

Includes house plants, window gardens, miniature gardens use and arrangement of cut flowers

.97

**Ornamental Shrubs, Vines, Trees**

Includes climbers

.977

**Ornamental Trees**

Includes culture of trees for shade, city streets and ornamentation

*For Use in landscape planning, see 715; Fruit tree culture, 634; Forest stands of trees, 634.9; Systematic classification and description of trees, 582.16*

636

**ANIMAL HUSBANDRY**

Management    Breeding    Care    Feeding    Training  
Judging    Diseases and control

Includes birds, fish, bees, and animals as pets

*For Scientific classification and description, see 590*

**635 HORTICULTURE**

Includes culture of trees for shade, city streets and ornamentation

*For Use in landscape planning, see 715; Fruit tree culture, 634; Forest stands of trees, 634.9; Systematic classification and description of trees, 582.16*

636

**ANIMAL HUSBANDRY**

Management      Breeding      Care      Feeding      Training  
Judging      Diseases and control

Includes birds, fish, bees, and animals as pets

*For Scientific classification and description, see 590*

.08

**Techniques of Livestock Production**

- 
- 636.081 Business Management**  
Includes problems of selection of stock, finance, management of stock farms, ranches, ranges  
*For Ranges as problem of land use, see 333.74*
- .082 Stock Breeding**  
Includes inbreeding, crossbreeding, artificial insemination, control of sex and reproduction
- .083 Care of Stock**  
Includes protection from predatory animals, extremes of climate; grooming, cleanliness, care of harness  
*For Architecture of stables, see 728.9; Prevention and treatment of disease, 636.089; Food, 636.085*
- .085 Nutrition**  
Composition      Experimentation      Nutritive value  
Adulteration legislation  
Includes fodder, silage, commercial preparations and individual foods, e.g. hay, oats, corn (formerly classified in .086), garden crops, animal and mineral food (formerly classified in .087)
- .086** It is recommended that **Hay, Oats, Corn** be classified in .085
- .087** It is recommended that **Garden Crops, Animal and Mineral Food** be classified in .085
- .089 Veterinary Medicine**  
Veterinary medicine was formerly classified in 619
- .0891 Anatomy**  
Includes histology, embryology  
*For Comparative anatomy, see 591.4*
- .0892** It is recommended that **Physiology** be classified in 591.1

636.0894

**Public Health and Preventive Medicine**

Includes laws relating to practice of veterinary medicine (veterinary jurisprudence); control and eradication of infectious livestock diseases (formerly classified in 614.9)

*For Control of health hazards in milk and milk production, see 614.3*

.0895

**Therapeutics**

Treatment of disease

Includes pharmacology, posology

*For Treatment of specific diseases, see disease*

.0896

**Internal and Clinical Disease**

Etiology (cause)	Pathology (nature)	Treatment
------------------	--------------------	-----------

Includes diseases of special organs (lungs, liver, kidney); parasitic diseases; diseases due to specific infection or virus, e.g. tuberculosis, anthrax, foot and mouth disease, rinderpest, malaria

*For Diseases of specific animals, see animal*

             Includes beef breeds (Shorthorns, Hereford, Aberdeen Angus); dairy breeds (Jersey, Guernsey, Ayrshire); dual purpose breeds (Devon, English longhorns)
- .23      **German, Dutch, Swiss Cattle**  
             Includes beef breeds; dairy breeds (Holstein, Frisian) dual purpose breeds
- .28      **American Cattle**  
             Includes beef breeds (Texas longhorns); dairy breeds (Holderness)
- .29      **Allied Animals**  
             Includes domesticated reindeer, buffalo, camel
- .3      **Sheep, Goat Husbandry**  
             Sheep farm management      Grazing management      Preparation and marketing  
             Includes English, Spanish breeds; Merinos, Karakul sheep  
             *For Scientific description and classification, see 599.73*
- .39      **Goat Husbandry**  
             Includes milk goats and goats produced for wool
- .4      **Swine Husbandry**  
             Production of swine for meat, shortening  
             *For Scientific description and classification, see 599.73*
- .5      **Poultry Husbandry**  
             Production of poultry and eggs, marketing  
             Includes Leghorns, Rhode Island Reds, Bantams  
             *For Scientific description and classification, see 598.2*

- 636.59 Other Fowl**  
Includes turkey, guinea, pheasant, pigeon, duck, goose, quail and other game birds
- .6 Aviculture**  
Production of birds useful for plumage; pets  
Includes canary, finch, parrot  
*For Scientific description and classification of birds, see 598.2*
- .7 Dogs**  
Selection      Breeding      Care      Feeding      Training  
Diseases and control  
*For Scientific description and classification of dogs, see 599.744*
- .71 Breeds**  
Includes setter, wolfhound, terrier  
*For Emphasis upon use of dog, see .72-.76*
- .72 Working Dogs**
- .74 Watch and Herd Dogs**  
Includes Seeing eye dogs
- .75 Hunting Dogs**
- .76 Pet Dogs**
- .77 Pictures and Illustrations of Dogs**  
*For Painting of dogs, see 758*
- .78** It is recommended that **Essays, Stories of Dogs** be classified in 800
- .8 Cats**
- .87 Pictures and Illustrations of Cats**  
*For Painting of cats, see 758; Scientific description and classification of cats, 599.744*
- .88** It is recommended that **Essays, Stories of Cats** be classified in 800

- 636.9 Other Animal Production**  
Includes mink, fox, rabbit and other animals raised for fur (fur farming); hamster, rats and mice for scientific experiments
- 637 DAIRY INDUSTRY**  
Management    Production    Analysis    Testing    Marketing
- .1 Milk and Cream Industry**
- .11 Business Management**  
Includes accounting, prices
- .12 Production**  
Includes dairy practices, analysis and testing
- .13 Care of Milk**  
Includes sanitation in handling; apparatus and supplies; preservation by chilling, heating, pasteurizing; transportation
- .14 Utilization**  
Includes dry, condensed, fermented and evaporated milk  
*For Ice cream industry, see 664.15*
- .17 Other Milk**  
Includes goat milk
- .18 Milk Substitutes**
- .2 Butter Industry**  
Management    Production    Analysis    Testing    Marketing  
*For Butter substitutes, see 664.3*
- .3 Cheese Industry**  
Management    Production    Analysis    Testing    Vari-  
etics    Marketing
- 638 BEE, SILKWORM CULTURE**
- .1 Beekeeping or Apiculture**
- .11 Management**  
Includes finances, selection of stock

- 638.12      **Bees**  
             Includes anatomy, physiology, habits, varieties  
             *For Scientific description and classification of bees, see 595.799*
- .13      **Food**
- .14      **Hive Management**  
             Includes handling beehives (breeding, swarming control), diseases
- .16      **Honey Production**  
             Composition      Preparation      Varieties      Marketing
- .2      **Silkworm Culture or Sericulture**
- 639      **HUNTING      FISHING INDUSTRIES**  
             Includes sponge and coral fisheries  
             *For Hunting and fishing as sport, see 799; Conservation of wild life, 333.78*
- .1      **Hunting Industries**  
             Trapping animals for food and fur  
             *For Hunting as sport, see 799.2; Fur farming, 636.9; Conservation of wild life, 333.78*
- .2      **Fishing, Sealing, Whaling Industries**  
             *For Fishing as sport, see 799.1; Conservation of wild life, 333.78*
- .21      **Fresh Water Fisheries**  
             Fisheries are considered both as fishing industry and places where fish may be caught  
             *For Specific fishery, see 639.27; Preservation of fish, 664.9*
- .22      **Salt Water Fisheries**  
             *For Specific fishery, see 639.27*
- .27      **Individual Fisheries**  
             Includes salmon, herring, halibut, cod  
             *For Scientific description and classification of fish, see 597*
- .28      **Whaling**

- 
- 639.29            **Sealing**
- .3            **Fish Culture**  
                  Management    Breeding    Care    Diseases and control  
                  Includes hatcheries, stocking of fresh water and salt water
- .37           **Individual Fish Culture**  
                  Includes goldfish, frogs
- .4            **Shell Fisheries**  
                  Management    Culture    Diseases and control
- .41           **Oysters and Clams**
- .5            **Lobster Fisheries**  
                  Includes crabs and other crustaceans

## 640 HOME ECONOMICS

Art and science of homemaking      Activities in field of home economics

### 641 FOOD

#### .01 Epicurism

Includes pleasure of eating; esthetics of cookery, epicures, gourmets

#### .1 Nutrition and Dietetics

Applied nutrition

Includes nutrients required to meet body needs, their proportion in various foods, application of principles of nutrition in diet control

*For Laboratory techniques and methods of chemical analysis, see 543.1; Dietotherapy, 615.85*

#### .3 Food Selection and Buying

Quality, cost, and other factors in buying food

#### .4 Home Preservation of Food

*For Commercial methods of food preservation, see 664.8*

#### .5 Food Preparation

Includes cook books, general recipes, and specific directions

#### .56 Special Cookery

Cookery for children and invalids, vegetarian recipes, religious food observances, wartime cookery

#### .57 Quantity Cookery

Hotel and restaurant cookery, army and navy cookery, ship-board cookery

#### .578 Outdoor Cookery

#### .58 Cooking with Special Apparatus and Utensils

Includes pressure cookery, casserole cookery

#### .59 National Cookery

Recipes for dishes characteristic of special regions

- 
- 641.6      **Preparation of Specific Foodstuffs**  
            Includes herb cookery, breadmaking, wine cookery  
            *For Commercial baking, see 664.75*
- .8      **Composite Dishes**  
            *For Beverages, see 663*
- .81     **Sauces, Relishes, Appetizers**
- .83     **Salads**
- .84     **Sandwiches**
- .85     **Confectionery**  
            Candies, sweets, bonbons  
            *For Commercial manufacture of confectionery, see 664.15*
- .86     **Ice Cream**  
            Includes ices, sherbets, puddings  
            *For Commercial manufacture of ice cream, see 664.15*
- 642      **DINING AND ENTERTAINING**
- .1      **Menus**  
            Meal planning
- .4      **Entertaining**  
            Refreshments for luncheons, dinners, receptions, buffet sup-  
            pers, banquets, teas
- .47     **Catering**
- .5      **Table Systems**  
            Table d'hôte, à la carte, and other systems of serving large  
            numbers
- .6      **Table Service**  
            Setting the table, carving, serving, changing courses
- .7      **Table Furnishings**  
            Linen, china, silver, crystal

**643 HOME PLANNING**

Location and arrangement of the home for convenient and economic administration

*For Domestic architecture, see 728; Building, 690; Interior decoration, 747*

**.3 Kitchen**

Planning for convenience: location, arrangement, equipment

**.4 Dining Room****.5 Other Special Rooms**

Bathroom, laundry

**.6 Household Appliances**

Electrical appliances

**.7 Household Repair**

644 It is recommended that **HOUSEHOLD HEATING** and **VENTILATION** be classified in 697; **LIGHTING** in 621.32

645 It is recommended that **HOUSE FURNISHING** be classified in **INTERIOR DECORATION**, 747

**646 CLOTHING AND PERSONAL APPEARANCE**

*For Costume, see 391; Apparel manufacturing, dress design, fashion modeling, 687*

**.01 Fashions****.2 Needlework**

Sewing      Mending      Darning      Knitting      Crocheting  
Tatting      Embroidery

**.3 Clothing Selection and Buying**

Guides to quality, workmanship

**.4 Clothing Construction**

Directions to amateurs for cutting and fitting, remodeling, pattern making for various types of clothing and accessories for men, women, and children

*For Ready-made clothing and tailoring, see 687.1*

- 647.97      **Tourist Accommodation Management**  
Includes tourist and trailer camps, tourist homes, motor courts

648      **HOUSEHOLD SANITATION**

- .1      **Home Laundering**  
Home processes, equipment, supplies  
*For Home processes of dry cleaning, see 646.6; Commercial laundering, 667.13*
- .5      **House Cleaning**  
Sweeping, dusting, polishing, dishwashing
- .7      **Household Pests**  
Control and eradication

649      **HOME CARE OF CHILDREN AND HOME NURSING**

- .1      **Child Care**  
Guides for parents on care and training of infants and children, their growth and development, management  
*For Child psychology, see 136.7*
- .8      **Home Nursing**  
Home care of the sick, invalids, and infirm  
*For Pediatrics, see 618.9; Geriatrics, 618.97*

## 650 BUSINESS AND BUSINESS METHODS

*For Form divisions .1-.9, see p. lv*

### 651 OFFICE MANAGEMENT

Principles      Methods

Includes all types of offices

*For Typewriting, see 652.3; Shorthand, 653; Accounting, 657; Business management, 658*

#### .02 Handbooks of Secretarial Practice

*For Commercial correspondence, see 651.7*

#### .1 Office Planning

Location      Layout      Physical factors: lighting, heating, air conditioning

*For Architecture of office buildings, see 725.2*

#### .2 Office Equipment

Furniture      Fixtures      Furnishings

#### .26 Appliances

Communicating equipment      Dictating and recording machines      Adding and calculating machines      Billing and bookkeeping machines      Statistical equipment and other mechanical or electronic devices for sorting and tabulating, e.g. Hollerith, I.B.M.

*For Typewriter, see 652.3; Vari-Typer, 652.3; Duplicating equipment, 652.4; Shorthand machines, 653.3*

#### .3 Office Organization

Branches      Departments

It is recommended that Personnel management of office employees be classified in 658.3; Vocational guidance information in 371.425

#### .4 Office Administration

Office efficiency

Includes executive control

- 
- 651.5      **Office Files**  
        Form      Procedure      Treatment: filing, indexing, and preservation
- .6      **Special Material**  
                Includes printed form sample files
- .7      **Commercial Correspondence**  
                Letters      Minutes      Reports  
                Includes business English and style
- 652      **WRITING**
- .1      **Handwriting**  
                For *Methods of teaching handwriting in elementary schools*,  
                see 372.51
- .3      **Typewriting**  
                Includes typewriter, Vari-Typer  
                For Vari-Typer in composition, see 655.28
- .4      **Duplicating**  
                Includes equipment, e.g. Mimeograph, Multigraph; stencil work
- .8      **Cryptography**  
                Includes ciphers, codes  
                For *Telegraphic codes*, see 621.382
- 653      **SHORTHAND**  
                For *Dictating and recording machines*, see 651.26
- .1      **Principles and Theories of Shorthand**  
                Legibility, reading, brevity, writing, speed, simplicity, remembering, applications, usefulness, and other aspects
- .2      **Abbreviation Systems**  
                Abbreviation systems using common characters only, omitting silent letters, vowels, e.g. notehand, brief longhand
- .3      **Machine Shorthand**  
                Machines imprinting characters on paper, e.g. Stenotype, Stenograph, Dictatype

**653.4 Shorthand Systems**

Cutter numbers may be used to arrange systems alphabetically, e.g. Gregg shorthand, 653.4 G819 Manuals, readers, speed tests may be kept together within each system by using lower case initials following Cutter number, e.g. Gregg shorthand reader, 653.4 G819r If desirable, 653.4 may be divided like 420-499 to classify shorthand systems before applying Cutter number, e.g. Gregg shorthand in French, 653.44 G819

654 It is recommended that **COMMUNICATION** be classified in 384; **ELECTRIC COMMUNICATION ENGINEERING** in 621.38

**655 GRAPHIC ARTS INDUSTRIES**

Printing Production (copyright, publishing and selling products of literary and artistic expression)

Includes management and operation of printing plants

For Production of prints produced in limited edition, by hand by the original artist, see 760-767; Book illustration, 741.6; Form divisions .01-.08, p. lv; .09 is not used

655.1-655.3 **PRINTING INDUSTRY**  
*History Principles Processes*

**.1 Printing**

Invention of printing from movable type

**.2 Type Composition Typography**

Includes proofreading

It is recommended that **Electrotyping** and **Stereotyping** be classified in 655.3

**.24 Type Faces**

Design Styles

Includes specimen books

**.25 Typography**

Art of designing the printed page

655.28

**Composition**

Typesetting by hand or machine    Linotype    Intertype  
Monotype    Composition by photography, typewriter,  
Vari-Typer

.3

**Processes**

Letterpress    Lithography and offset lithography    Gravure  
Silk screen

Includes printing from metal type; electrotypes or stereotypes (formerly classified in 655.22); from flat stone, zinc or other surfaces; or from etched or engraved steel or copper plates

.32

**Photomechanical Techniques**

Plate making by zinc or copper photoengraving (cuts, halftones)    Photo offset    Photogravure    Photogelatin or collotype    Process color printing

Photoengraving was formerly classified in 777; Photolithography (photo offset), 775; Photogelatin, 774

.4

**Book Production**

Includes history and art of book making; history of publishing houses and presses; of book stores

History of book making was formerly classified in 002  
For *Printing*, see 655.1-655.3

.45

**Binding**

Formerly classified in 686

.5

**Publishing and Bookselling**

Includes author-publisher relationships, pricing and marketing by publisher, subscription publishing, book clubs

.56

**Bookselling**

Organization    Management    Operation

Includes retail book shops, auctions, secondhand book shops, the out-of-print market

655.6

**Copyright**

History      Law      Practice

Protection of original literary, artistic or musical expression  
Includes books, periodicals, newspapers, lectures, sermons,  
drama, music, motion pictures, design, architecture, draw-  
ings, maps, photographs

.63

**International Copyright**

656

It is recommended that **TRANSPORTATION** be classi-  
fied in 385-388

657

**ACCOUNTING**

Principles      Procedures      Aids      Forms, e.g. card, loose  
sheet, machine and punched card

*For Managerial use of accounts and statements, see 658.15*

.2

**Bookkeeping**

Single entry, double entry, debit and credit, posting, balancing,  
adjusting and closing

.3

**Accounts and Statements**

Adjustment accounts, profit and loss, balance sheet, deprecia-  
tion, good will, liquidation, realization

.4

**Cost Accounting**

Factory and distribution cost finding      Standard costs

.5

**Accounting Systems**

Private, financial, commercial, industrial, governmental

Where interest in an accounting system lies chiefly in its  
relation to subject, class in subject, e.g. Farm accounting,  
631.16

.6

**Auditing and Public Accounting**

Internal and public auditing      CPA practice      Tax ac-  
counting

Includes fraud detection

---

**658 BUSINESS MANAGEMENT**

Policies      Methods      Operations

*For Labor and labor problems, see 331; Office management, 651; Accounting, 657; Advertising, publicity and public relations, 659.1*

**.01 Theory      Industrial Efficiency**

**.1 Establishing a Business**

Preliminary planning      Form of ownership, e.g. proprietorship, partnership, corporation

*For Entrepreneurship, see 338.7*

**.14 Finance**

Provision of capital

**.15 Financial Management**

Managerial use of devices that serve as guides to successful business operation, e.g. profit and loss statement, balance sheet, budget, cost records

**.16 Internal Organization**

Military      Line and staff      Functional

**.2 Plant**

Geographical location      Local site      Layout      Equipment  
Facilities      Physical factors, e.g. lighting, heating, air conditioning

*For Engineering aspects of plant establishment, see 621.7; Construction, 690; Architecture, 725.2 and .4; Office arrangement and equipment, 651.1-.2; Industrial city planning, 711.45; Industrial center planning, 711.55*

**.3 Personnel Management**

Includes personnel department; office employees (formerly classified in 651.34)

**.31 Employment Practices**

**.311 Selection of Workers**

Employment agencies      Employee applications      In-  
terviews      Tests      Selection      Placement

*For Labor supply and demand, see 331.11*

658.312	<b>Personnel Maintenance</b>	Follow-up	Promotion	Transfer	
.313	<b>Termination of Service</b>	Lay-off	Discharge	Retirement	Exit interviews
	<i>For Unemployment, see 331.13</i>				
.315	<b>Employer-employee Cooperation</b>	Employee representation in management			Adjustment of individual grievances
		Suggestion systems			
.32	<b>Salary Administration</b>	Methods of compensation			
		Job analysis (formerly classified in 658.511), classification, evaluation			Merit rating
		Use of incentives	Compensation plans		Payroll administration
.38	<b>Conditions of Employment</b>				
.381	<b>Work Schedules</b>	Includes hours, vacations, absenteeism			
.382	<b>Employee Welfare</b>	Includes health and safety programs, plant conveniences			
.386	<b>Employee Training</b>	Includes job instruction, executive and foremanship training, manuals			
.5	<b>Factory Management and Production</b>				
.51	<b>Production Control</b>	Routing			
		Scheduling		Dispatching	Simplification and standardization of products and materials
.511	It is recommended that <b>Job Analysis</b> be classified in 658.32

- .8      **Distribution**
- .801      It is recommended that **Psychology of Salesmanship** be  
              classified in 658.85
- .81      **Sales Organization**  
              Includes organization and operation of sales department
- .83      **Market Research and Analysis**  
              Consumer, distributor, media, product, package research
- .84      **Trade Channels**
- .85      **Salesmanship**  
              Includes psychology (formerly classified in 658.801) and  
              techniques of selling
- .851      **Salesmanship in Special Businesses** (formerly classi-  
              fied in 658.89)
- .86      **Wholesale Trade**

- .12      **Packaging and Labeling**  
Use of means of identification (trade marks and names, letterheads, labels, slogans) and containers and wrappings as a means of advertising
- .13      **Media and Techniques of Advertising**  
Includes copy writing, layout, advertising typography, use of color in advertising, copy testing  
*For Commercial art, see 741.67; Printing techniques, 655.3*
- .132      **Newspaper and Magazine Advertising**  
Includes rates and circulation, space selection, classified ads
- .133      **Direct Advertising**  
Includes circulars, letters, folders, catalogs, broadsides, blotters, calendars, company publications for dealers, customers and prospects; mailing lists

659.134

**Outdoor and Transportation Advertising**

Includes billboards, signs, car cards and posters

*For Design and drawing of posters, see 741.67*

.14

**Audio-visual Advertising**

Includes use of radio, television, motion pictures in advertising

.15

**Display Advertising**

Includes window and show case display; shows (fashion, motor)

## 660-670 MANUFACTURES

Originally 660 was intended for processes that were primarily chemical; 670 for those that were mechanical and physical. However, the growing use of chemical processes has so modified the character of 670 as to leave little distinction between 660 and 670. For Manufactures not included in 660 and 670, see 680

### 660 CHEMICAL TECHNOLOGY INDUSTRIAL CHEMISTRY

Includes materials of chemical technology; raw materials, waste materials, and their utilization

*For Salvage of waste materials, see 679; form divisions .1-9, p. iv, exceptions .28 and .29 follow:*

660.28

#### Chemical Engineering

Plant Practices Equipment

Includes industrial stoichiometry; chemical engineering calculations, unit operations, absorption and extraction, adsorption, crushing and grinding, distillation, drying, humidification, dehumidification, evaporation, fluid flow, filtration, heat transfer

Unit chemical reactions: alkylation, fermentation, hydrogenation, oxidation, reduction

.29

#### Industrial Electrochemistry

*For Specific application of electrochemistry, see material, e.g. Utilization of electric energy in production of industrial chemicals, 661; Electroplating, 671.73*

661

### INDUSTRIAL CHEMICALS

Production Properties Tests Utilization

Includes chemicals used as raw materials or as agents in manufacture of chemicals and other types of products; industrial reagents

*For Chemicals manufactured for specific use, see specific number, e.g. Detergents, 668.1; Coal and coal tar chemicals, 662.628*

**661.2      Acids      Alkalies      Salts**  
 Acids: Sulphuric, hydrochloric, nitric, hydrofluoric, phosphoric  
 Alkalies (formerly classified in 661.3): caustic soda (sodium hydroxide), caustic potash (potassium hydroxide) ammonium hydroxide  
 Salts (formerly classified in 661.4-.6-.7): chlorides, nitrates, nitrites, fluorides, phosphates, silicates, cyanides, sulfates

**.3**      It is recommended that **Alkalies** be classified in **661.2**

**.4**      It is recommended that **Salts** be classified in **661.2**

**.6**      It is recommended that **Sulfates** and **Nitrates** be classified in **661.2**

**.7**      It is recommended that **Cyanides** be classified in **661.2**

**.8**      **Organic Compounds**

Alcohols, aldehydes, esters, ethers, ketones, organic acids  
 Includes solvents

*For Coal tar solvents, see 662.628*

**.9**      **Compressed and Liquefied Industrial Gases**

Manufacture      Utilization

Industrial gases: Acetylene, chlorine, fluorine, hydrogen, hydrogen sulfide, helium, argon, neon, krypton, xenon, nitrogen, oxygen, sulfur dioxide, carbon dioxide, solid carbon dioxide, "dry ice," ammonia ozone

Includes chemicals in gaseous form, their compression and liquefaction; gas containers, cylinders

*For Technology of natural and manufactured gas, see 665.7; Gaseous fuels, 662.67*

## **662      EXPLOSIVES      FUEL TECHNOLOGY      INDUSTRIAL CARBONS**

**.1**      **Fireworks**

**.2**      **Explosives**

Manufacture      Testing      Properties      Storage      Handling  
 Transportation      Use

*For Applications, see specific subject, e.g. Mining, 622.23; Ammunition, 623.452*

- 
- 662.26      **Deflagrating Explosives      Burning Explosives      Pro-**  
                 **pellants**  
                 Includes black powder, gunpowder (formerly classified in  
                 662.3), nitro-cellulose, smokeless powder
- .27      **High Explosives      Detonating Compositions**  
                 Includes ammonium nitrate, ammonium picrate, chlorate,  
                 dynamite, lead azide, mercury fulminate, nitroglycerin, ni-  
                 trostarch explosives, RDX (cyclonite or hexogen), tetryl,  
                 TNT (trinitrotoluene)
- .28      **Blasting Caps      Detonators      Primers      Fuse**  
                 Fuse was formerly classified in 662.4
- .3      It is recommended that **Gunpowder** be classified in 662.26
- .4      It is recommended that **Fuse** be classified in 662.28
- .6      **Fuel Technology**  
                 Includes solid, liquid, gaseous fuels
- .62      **Coal Technology**
- .622      **Analysis      Properties and Testing**  
                 Includes classification, chemical and physical properties,  
                 composition, constitution, structure, hardness; tests and  
                 testing methods
- .623      **Preparation and Treatment**  
                 Materials, processes, equipment used in cleaning, drying,  
                 grinding, sizing
- .624      **Storage and Transportation**
- .625      **Utilization**  
                 General utilization and development of coal products  
                 Includes coal as fuel; combustion, carbonization, hydro-  
                 genation and liquefaction of coal  
  
                 *For Production of coke from coal, see 662.64; Liquid  
                 fuel produced from coal, 662.66; Gas produced from  
                 coal, 665.77; Chemicals produced from coal, 662.628*

662.627

**Coal Tar**

Distillation      Utilization

Coal tar was formerly classified in 668.7

*For Coal tar products, see specific product, e.g. Coal tar dyes, 667.2*

.628

**Coal and Coal Tar Chemicals**

Includes benzene, toluene, wood preserving oils, solvent naphtha, naphthalene

.64

**Coke**

Production      Properties      Utilization

Coke was formerly classified in 662.7

*For Gashouse coke and petroleum coke, see 662.65*

.65

**Other Solid Fuels**

Includes bagasse, briquettes, charcoal, gashouse coke, petroleum coke, lignite, peat, wood, sawdust

.66

**Liquid Fuels**Materials      Processes      Equipment      Properties  
Tests      Utilization

Production of liquid fuels from coal, farm produce, gas, waste, wood

Includes combustion, rocket fuel

*For Petroleum fuels, see 665.5*

.67

**Gaseous Fuels**

Includes fuel properties of gases, tests for fuel properties; utilization of gases as fuels; combustion of gases

.7

It is recommended that **Coke** be classified in 662.64 and **Charcoal** in 662.65

.9

**Industrial Carbons (Non-Fuels)**

Production      Properties      Application      Utilization

.92

**Graphite**

Includes graphite products, pipe, brushes

*For specific products see specific numbers, e.g. Graphite foundry equipment, 671.22*

- 662.93      Adsorbent Carbons**  
 Includes activated carbons, animal black, bone char, carbon black, charcoals, decolorizing carbons, lampblack  
*For Applications, see specific number, e.g. Application of carbon black in rubber manufactures, 678.23; Industrial diamonds used in machine tools, 621.9*
- 663      BEVERAGES**  
       Materials      Apparatus      Processes      Gaging      Testing  
       Bottling
- 663.1      Fermented Beverages**  
       Liquor fermented from grapes, other fruits, grains
- .2      Wine and Winemaking**  
       Includes grape and other fruit wines, e.g. cider, perry  
       *For Culinary uses of wine, see 641.6*
- .4      Beer and Brewing**  
       Includes beer, ale, porter, stout
- .5      Distilled Beverages**  
       Includes brandy, whiskey, rum, gin, liqueurs, other spirits
- .6      Non-alcoholic Beverages**
- .62      Carbonated Beverages**
- .63      Fruit and Vegetable Juices**
- .8      Cocktails and Other Mixed Drinks**  
       Bartenders' manuals and recipes
- .9      Chocolate and Cocoa Industry      Tea and Coffee Manu-  
       facture**
- 664      FOOD MANUFACTURE AND PROCESSING**  
       Materials      Machinery      Processes      Testing  
       Commercial manufacture or preparation of foods  
       *For Home preparation of food, see 641; Agricultural production of foods, 630; Economic aspects of food manufacture and processing, 338.47; Chemical analysis of food, 543.1; Food adulteration, 614.3*

- 
- 664.1      **Sugar**  
            Sugars and sirups (cane, beet, maple)  
            Includes other sugars, e.g. glucose, dextrose
- .15        **Confectionery**  
            Includes candy, ice cream  
            *For Candy making at home, see 641.85; Ice cream made at home, 641.86*
- .2        **Starch and Pectin**  
            Includes cornstarch, tapioca, arrowroot
- .3        **Edible Fats and Oils**  
            Includes margarine, salad oils, lard  
            *For Butter, see 637.2; Other fats and oils, 665.2-.3*
- .4        **Mineral Foods**  
            Includes salt
- .5        **Flavor Aids**  
            Includes spices, condiments, flavoring extracts, vinegar
- .6        **Leavening Agents and Baking Aids**  
            Includes yeast, baking powder, cream of tartar
- .7        **Cereals and Cereal Flour**
- .72       **Flour Milling**  
            Includes processing of breakfast foods
- .75       **Flour Products**  
            Includes bakeries and bakery products, e.g. bread, crackers, cakes; macaroni, spaghetti, vermicelli  
            *For Baking at home, see 641.6*
- .8        **Food Preservation**  
            Processes and apparatus for commercial preservation of fruits, vegetables, meats, seafoods, concentrated foods, other specialties  
            *For Home preservation of foods, see 641.4*
- .82       **Canning of Foods**
- .83       **Jellying and Preserving**
- .84       **Drying and Dehydration of Foods**

- 
- 664.85      **Frozen Foods**  
             Includes refrigeration, locker storage, cold storage
- .9      **Meat Packing Industry**  
             Includes packing of meat, fish, and poultry; products manufactured from them
- 665      **LUBRICANTS, PETROLEUM TECHNOLOGY**
- .2      **Animal Oils and Fats**
- .3      **Vegetable Oils and Fats**
- .4      **Mineral Oils and Fats**  
             Includes paraffin, ozocerite, asphalt, shale oil
- .5      **Petroleum Technology**  
             Includes petroleum and petroleum products  
             *For Extraction of petroleum, see 622.338*
- .52      **Properties      Analysis and Testing**  
             Includes chemical and physical properties (composition, structure, viscosity); tests and testing methods
- .53      **Refining of Petroleum      Manufacture of Petroleum Products**  
             Materials, processes, equipment used in refining operations (distillation, cracking, chemical treatment, purification, blending)  
             Includes petroleum refineries  
             Light distillates include gasoline and other motor fuels, e.g. aviation, motor, tractor, and Diesel fuels; kerosene, naphthas  
             Heavy distillates and residuums include bunker fuels, gas oil, fuel oil, road oils, waxes
- .54      **Storage and Transportation**  
             Includes distribution, pumping systems, meters
- .55      **Utilization**  
             Includes petroleum as fuel, chemical utilization of petroleum not otherwise classified  
             *For Gas produced from petroleum, see 665.77; Petroleum coke, 662.65*

- 665.7 Natural and Manufactured Gas Technology**  
 Includes methane gas  
*For Extraction of natural gas, see 622.338; Industrial gases, 661.9*
- .72 Properties Analysis and Testing**  
 Includes chemical and physical properties, tests and testing methods
- .73 Treatment**  
 Includes materials, processes, equipment used in bottling, cleaning, compression, conversion, drying, mixing, purification
- .74 Storage and Transportation**  
 Includes transmission and distribution (gas gathering lines, pipe lines, pumping systems, compressors, meters, mains); storage of natural or methane gas in liquid form
- .75 Utilization**  
*For Gashouse coke, see 662.65; Liquid fuels produced from gas, 662.66; Gaseous fuels, 662.67*
- .77 Production of Manufactured Gas**  
 Processes Equipment Plants  
 Includes gas produced from coal (city gas, coal gas, coke oven gas, blast furnace gas, producer gas, water gas, carbureted water gas); gas produced from petroleum (oil gas, refinery gas, reformed refinery gas); liquid gas produced from petroleum (butane, propane, pentane, butene mixtures); gas produced from natural gas (reformed natural gas); liquid gas produced from natural gas (butane, propane, pentane); synthesis gas (gas produced from coal and coke, natural gas, petroleum, alcohol)

## 666 CERAMIC TECHNOLOGY

Manufacture Properties Tests Utilization

### .1 Glass

Constitution Properties Testing Types Applica-  
 tion Products

*For Optical glass, see applications, e.g. Spectacles, 617.7; Telescopes, 522.2; Engineering properties of glass, 620.14*

- 
- 666.2      **Enamels and Enameling**  
            Vitreous enamels      Porcelain enamels      Ceramic coatings  
            Includes enameling of metals and enameled metals
- .3          **Ceramic Whiteware**  
            Includes porcelain (formerly classified in 666.5); stoneware,  
            earthenware and pottery (formerly classified in 666.6); terra  
            cotta  
            *For Collection, identification of fine porcelain, see 738.2;*  
            *Earthenware, 738.3*
- .32        **Clay**  
            Includes preparation, composition, properties  
            Clay was formerly classified in 666.4
- .4          It is recommended that **Clay** be classified in 666.32
- .5          It is recommended that **Porcelain** be classified in 666.3
- .6          It is recommended that **Stoneware** be classified in 666.3
- .7          **Refractories      Structural Clay Products**
- .72        **Refractories**  
            Includes fire-clays, alumina, graphite, zirconia, chrome re-  
            fractories  
            *For Refractories applied to specific use, see specific use,*  
            *e.g. Refractories used in metallurgical furnaces, 669.82*
- .73        **Structural Clay Products**  
            Includes bricks and tiles  
            *For Engineering properties of brick and tile, see 620.14*
- .8          **Artificial Stone**
- .9          **Cements      Limes      Mortars**
- 667        **CLEANING AND BLEACHING      DYEING**  
            Materials      Plant      Processes      Equipment
- .1         **Commercial Process Cleaning and Bleaching**

- 
- 667.12      **Dry Cleaning**  
Includes textiles, garments, rugs, furs, hats, leathers, household articles  
For Home dry cleaning, see 646.6
- .13      **Laundering**  
For Soaps, detergents, wetting agents, see 668.1; Home laundering, 648.1
- .14      **Bleaching Practice**  
Includes wool, silk, cotton, linen
- .2      **Commercial Process Dyeing**  
Manufacture, properties and testing of dyes and their application  
Includes dyes, mordants, intermediates, and developers; applications on fibers, e.g. wool, silk, cotton; textiles, rugs, furs, garments  
For Coloring of furs as part of fur dressing, see 675.3; Home dyeing processes, 646.6
- .3      **Printing of Textiles**
- .4      **Inks**  
Includes writing inks, indelible inks
- .6      **Paints and Pigments**  
For House painting, see 698.1; Fine arts materials and methods of painting, 751
- .7      **Varnishes      Polish      Lacquer**  
For Varnishing, see 698.3
- .8      **Japan      Blacking**
- 668      **OTHER ORGANIC CHEMICAL MATERIALS  
AND PRODUCTS**
- .1      **Surface Active Agents**  
Soaps, detergents, wetting agents, emulsifiers, scouring powders  
Includes abrasives  
For Abrasives used in machine tools, see 621.92
- .2      **Glycerine**
- .3      **Gelatin      Glue and other Adhesives**

---

668.4      **Plastics Industries      Resins      Gums****.41      Techniques**

Includes materials used in manufacture of plastics; apparatus and machinery (presses, molds); processes of manufacture (molding, extrusion, casting, laminating products and applications) properties, testing methods and equipment

*For Techniques of specific plastics, see plastics, e.g.  
Tests of Styron products, 668.423*

**.42      Plastics Made from Synthetic Resins****.422      Condensation Plastics**

Includes phenolics, alkyds, organic nitrogen resins (urea-formaldehyde and melamine-formaldehyde); organic sulfur resins and silicones

Trade names include Bakelite, Durez, Durite, Resinox, Beetle, Plaskon, Melmac, Catalin, Malamine, Cibanite, Dilectene

**.423      Linear Polymer Plastics (Except Fibers)**

Includes polyvinyl alcohols and esters; polyethylene, nylon, polyacrylic, polyolefin, polyaromatic plastics

Trade names include Vinylite, Lucite, Butacite, Plexiglas, Loalin and Styron

*For Fibers (Nylon, Vinyon, Orlon), see 677.47*

**.43      Plastics (Except Fibers) Made from Protein**

Includes casein, soybean and zein plastics

Trade names include Ameroid and Galorn

*For Fibers (Aralac), see 677.47*

**.44      Plastics (Except Filaments and Fibers) Made from Cellulose**

Includes cellulose esters (cellulose nitrate, acetate, propionate, butyrate); cellulose ethers (methyl, ethyl and benzyl cellulose); regenerated cellulose (cellophane)

Trade names include Amerith, Pyralin, Lumarith, Tenite, Kodapak, Celluloid (formerly classified in 679)

*For Fibers (Celanese, Bemberg), see 677.46*

- 668.45      **Plastics Made from Natural Resins**  
Includes vegetable resins (lignin, resin); animal and mineral resins; shellac as a plastic  
Trade names include Lignolite  
For Shellac as varnish, see 667.7
- .47      **Resins and Gums Not Used in Plastics**  
For Resin used as naval store, see 634.986
- .5      **Cosmetics**  
Includes essences, perfumery, essential oils and ethers
- .6      It is recommended that **Fertilizers** be classified with **Agriculture**, 631.8
- .7      **Chemical Utilization of Wood**  
Includes wood distillation  
It is recommended that Coal tar be classified in 662.627  
For Charcoal as fuel, see 662.65; Use in pigments, 667.6
- 669      **METALLURGY**  
Includes general material on alloys, scrap metal; history of metals  
For Collection and classification of scrap metal, see 671.9
- .016      **Metallography**  
Constitution and structure of metals  
Includes analysis and testing, properties  
For Engineering properties of metals, see 620.17-.18
- .018      **Heat Treatment and Hardening of Metals**  
For Surface hardening, see 671.7

## 669.1-669.7 METALLURGY OF INDIVIDUAL METALS

May be divided by using the following subdivisions:

4 Production      Reduction and refining      6 Metallography      Constitution and structure, analysis and testing, properties      8 Heat treatment  
Hardening      e.g. Refining of silver, 669.234; Metallography of copper, 669.36; Heat treatment of aluminum alloys, 669.7228

- .1      **Iron and Steel      Iron Alloys**
- .14      **Production of Iron and Steel      Reduction and Refining**
- .141      **Iron and Iron Alloys**  
Includes pig iron (blast furnace practice); cast iron (furnace practice); wrought iron (puddling and other practices); other kinds of iron (iron powder, sponge iron) other practices
- .142      **Steel and Alloy Steels**  
Includes Bessemer converter practice; open-hearth furnace practice; electric furnace practice; other practices
- .143      **Scrap Iron and Steel**  
Utilization in production      Reduction      Refining  
For Collection of scrap iron and steel, see 672.9
- .16      **Metallography of Iron and Steel**  
Constitution and structure      Analysis and testing  
Properties
- .18      **Heat Treatment and Hardening of Steel**
- .2      **Precious and Rare Metals and Their Alloys**
- .22      **Gold**
- .23      **Silver**
- .24      **Platinum      Platinum Metals**
- .29      **Rare Metals**
- .292      **Rare Earths**

- 
- 669.293      **Thorium, Uranium and Radioactive Elements**  
             Includes actinium, neptunium, plutonium, polonium,  
             radium
- .3      **Copper and Its Alloys**  
             Includes brass, bronze
- .4      **Lead and Its Alloys**
- .5      **Zinc, Cadmium and Their Alloys**
- .6      **Tin and Its Alloys**
- .7      **Other Metals and Their Alloys**  
             Includes mercury, gallium, germanium, arsenic, antimony,  
             scandium, tellurium, zirconium, tantalum, niobium (colum-  
             bium), bismuth, thallium, indium
- .72      **Light Metals and Their Alloys**
- .722      **Aluminum**
- .723      **Magnesium**
- .724      **Beryllium**
- .725      **Alkali Metals and Alkaline Earth Metals**
- .73      **Heavy (Ferro Alloying) Metals and Their Alloys**
- .732      **Titanium, Vanadium, Manganese**
- .733      **Cobalt, Nickel**
- .734      **Chromium, Molybdenum, Wolfram (Tungsten)**
- .8      **Metallurgical Furnaces**  
             Construction      Practice  
             *For Application to special metals, see metals, e.g. cast iron,*  
             *669.141*
- .82      **Refractories**
- .84      **Slags**
- .9      **Assaying**

## 670 MANUFACTURES *continued*

For Scope of 670, see note preceding 660; Form divisions .1–.9,  
p. lv

### 671 METAL MANUFACTURES

Includes fabrication of metal, manufacture of metal products

For Maintenance and operation of mill and shop equipment,  
see 621.7–621.9

.2 Melting and Casting (Foundry Practice)

.22 Foundry Equipment

.23 Molding and Pattern Making

.24 Melting Practice

.25 Casting

Includes sand, die, centrifugal, other methods of casting

.3 Mechanical Working and Forming

.32 Rolling

.33 Forging, Pressing, and Stamping

.34 Extruding and Drawing

.35 Machining and Grinding

.37 Powder Metallurgy

.5 Joining and Cutting

.52 Welding

.521 Electric Welding

Includes arc, resistance welding

.522 Gas Welding

.529 Other Methods of Welding

.53 Flame and Arc Cutting

.56 Soldering and Brazing

.59 Other Methods of Joining

.7 Finishing and Surface Treatment

.72 Buffing and Polishing

- 
- 671.73      **Coating**  
             Includes plating, dipping, spraying  
             For Enameling of metals, see 666.2
- .74      **Cleaning**
- .8      **Applications      Metal Products**  
             For Metal arts, see 739; Handcrafts using metal, 745.5
- .82      **Sheet Metal Products**
- .821      **Pattern Making for Sheet Metal Products**
- .83      **Tubes      Pipes**
- .84      **Wire**
- .9      **Scrap Metal**  
             Collection      Classification  
             For Utilization of scrap metal in production, reduction, re-  
             fining of metals in general, see 669; Application to specific  
             metals, see metals, e.g. Utilization of scrap iron, 669.143
- 672      **IRON AND STEEL      IRON ALLOYS**  
             May be divided like 671, e.g. Rolling of steel, 672.32; Collec-  
             tion of scrap iron and steel, 672.9
- 673      **OTHER METALS AND THEIR ALLOYS**  
             May be divided like 669.2-669.7, e.g. Fabrication of zinc,  
             673.5; Fabrication of aluminum, 673.722; and further subdivi-  
             ded like 671 for specific processes if necessary, e.g. Welding  
             of aluminum, 673.72252  
             For Work in precious metals, see 739.2
- 674      **LUMBER MANUFACTURES**  
             Includes wood products, cork  
             For Logging, rough wood products and specialty wood prod-  
             ucts, see 634.98; Wood identification, 634.98
- .2      **Lumber Production      Sawmill Operations**  
             Includes sawmill, sawmill equipment, sawing of logs into  
             lumber; sawmill products, rough sawed products; rough lum-  
             ber (dimension stock or cut stock, lumber for wood prod-  
             ucts); shingles and shakes, box shooks, fuel wood  
             For Wood used as fuel, see 662.65

- 
- 674.3      Storage of Lumber**  
Includes seasoning of lumber, e.g. air seasoning, kiln drying  
For Preservation of wood, see 691.1
- .4          Working of Lumber**  
Surfacing      Shaping  
Includes woodworking operations and equipment  
For Organization of woodworking shops, see 621.7;  
Woodworking, 684; Wood products, 674.8
- .42        Planing Mill Operations**  
Includes planing mill, resawing and surfacing of lumber;  
planing mill equipment (saws, planers, molding machines)
- .43        Woodworking Plants**  
Secondary woodwork operations: wood turning, shaping,  
finishing  
Includes woodworking equipment (shapers, lathes, sanders,  
grinders)  
For Painting of wood, see 698
- .5          Lumber Grading**  
Includes inspection, specifications
- .8          Wood Products**  
Manufacture      Uses  
For Specific use of products, see use, e.g. Sawdust as fuel,  
662.65; Cabinet making, 684.2; Operations and equip-  
ment, 674.4
- .82        Wooden Cooperage and Containers**  
Includes crates, barrels, boxes
- .83        Veneer      Plywood      Laminated Wood**  
Manufacture and general use
- .84        Excelsior, Wood Flour, Wood Shavings, Sawdust**
- .9          Cork and Cork Products**

## 675 LEATHER AND FUR INDUSTRIES

*For Manufacture of articles made of leather, see 685; Leather craft, 745.5; Fur craftsmanship, 687.1*

### .2 Leather Processing

Materials, apparatus, processes used in tanning, dressing, finishing, testing of hides and skins

### .3 Fur Dressing

Treatment of raw pelts: tanning, coloring, glazing

*For Fur Farming, see 636.9; Fur fiber textiles, 677.3*

## 676 PULP, PAPER AND CELLULOSE

### MANUFACTURE

Materials	Machinery	Processes	Properties	Tests
Wastes				

*For Architecture of pulp and paper mills, see 725.4*

### .1 Pulp Manufacture

Materials: raw and added	Machinery: Jordan, Hollander
Processes: Mechanical and chemical	Properties and testing
Wastes	

### .12 Wood Pulp

Includes mechanical, sulfite, sulfate, soda, semichemical processes

### .13 Rag Pulp

### .14 Other Pulps

Includes straw, jute, hemp, cornstalk, waste paper, reclaimed paper pulps

### .2 Paper Manufacture

Machinery and apparatus	Machine manufacture	Hand
manufacture	Properties and testing	

Includes grades of paper: tissue, wrapping, writing, printing, book, building, boards

### .3 Paper Products

Manufacture of bags, cartons, containers

*For Handcrafts using paper, see 745.5; Bookbinding, 655.45*

**676.4 Cellulose Manufacture**

*For Cellulose used in textile manufacture, see 677.46; Cellulose plastics, 668.44*

**677 TEXTILE AND OTHER FIBER MANUFACTURES**

Fiber content, construction, finish, properties, and manufacturing processes of textile fabrics and other fiber products

*For Fiber crops, see 633.5; Textile dyeing, 667.2; Textile printing, 667.3; Textile handcrafts, 745.52; Apparel manufacturing, 687*

**.1 Linen and Other Bast, Leaf, Wood Fiber Textiles**

Manufacture of linen, burlap, from flax, hemp, jute, ramie, pina, similar fibers

**.2 Cotton and Other Seed Hair Fiber Textiles**

Textile manufacture from cotton, kapok, milkweed fibers

**.3 Wool and Other Hair Fiber Textiles**

Manufacture of textiles from mohair, cashmere, camel's hair, llama, alpaca, vicuña, rabbit's hair

**.4 Silk, Rayon, Man-made Protein Fiber, Resin Fiber Textiles****.41 Silk Textiles**

Manufacture of cultivated, wild or Tussah, silks

**.46 Rayon Textiles**

Rayon manufacture by nitrocellulose, cuprammonium, viscose, acetate, ethyl processes

Trade names include Bemberg, Chardonize, Cordura, Spun-lo, Tenasco, Bublfil, Acele, Celanese, Seraceta, Fortisan, Ethofil

**.47 Man-Made Protein Fiber and Resin Fiber Textiles**

Textile manufacture from man-made protein fibers, e.g. cascien, soybean, peanut, zein

Trade names include Lanital, Tiolan, Polan, Cargan, Casolana, Lactofil, Aralac, Silkool, Ardil, Mazein

Textile manufacture from resin fibers, e.g. polyamide, vinyl, vinylchloride

Trade names include Nylon, Velon, Saran, Vinyon, Orlon

- 
- 677.5      **Mineral and Miscellaneous Fiber Textiles**  
    Manufacture of textiles from asbestos, glass, metal, elastic, paper fibers  
    Trade names include Asbeston, Fiberglas, Reymet, Lastex
- .6      **Special Textiles**  
    Fabrics made by special processes: brocade, velvet, flannel, felt, tapestry, carpeting, lace, knit fabrics, coated or impregnated fabrics, e.g. crease resistant, noninflammable, shrink resistant, waterproof
- .7      **Other Industrial Uses of Fibers**  
    Manufacture of cordage and cables  
    *For Knotting, splicing and use of rope, see 623.88*
- 678      **RUBBER MANUFACTURES AND RUBBER**
- .2      **Manufacturing Processes Using Rubber**  
    Includes use of natural and synthetic rubber  
    *For Preliminary treatment of natural rubber, see 678.62; Production of synthetic rubber, 678.722*
- .22      **Masticating, Mixing, Milling, Plasticizing**
- .23      **Compounding and Compounding Ingredients**  
    Includes use of solvents, antioxidants, accelerators of vulcanization
- .24      **Vulcanizing**
- .27      **Other Processes Using Rubber**  
    Includes molding, coating, extruding, calendering, casting, dipping, spreading, electro-depositing
- .29      **Reclaiming**  
    Utilization of scrap rubber  
    *For Collection of scrap rubber, see 678.8*
- .3      **Natural and Synthetic Rubber Products**  
    Includes tires, tubes, belting, rubber adhesives  
    *For Application, see manufacture to which applied, e.g. Application of rubber in manufacture of coated and impregnated fabrics, 677.6*

- 
- 678.5      **Latex**  
            Natural and synthetic  
            *For Preparation of latex from plants, see 634.986; Production of synthetic latex, 678.722*
- .52      **Manufacturing Processes**  
            Includes preliminary treatment of latex, preservation, concentration  
            May be divided like 678.2  
            *For Coagulation of latex and preparation of crude rubber, see 678.62*
- .53      **Products**  
            Products made directly from latex
- .54      **Properties      Analysis and Testing**  
            Chemical and physical properties of latex and tests for determining such properties
- .6      **Natural Rubber and Its Isomers**  
            *Hevea brasiliensis, ficus elastica, guayule, kok-saghyz, castilloa, mangabeira, balata, gutta-percha*
- .62      **Preliminary Treatment of Natural Rubber**  
            Includes preparation of crude rubber from latex, coagulation, smoking, drying, grading, washing, grinding, packing, storing  
            *For Manufacturing processes using natural rubber, see 678.2; Natural rubber products, 678.3*
- .64      **Properties of Natural Rubber      Analysis and Testing**  
            Chemical and physical properties of natural rubber and tests for determining such properties  
            *For Engineering properties of natural rubber, see 620.19*
- .7      **Elastomers**  
            Synthetic rubber and rubber-like plastics (elasto-plastics)
- .72      **Synthetic Rubber**  
            Trade names include Ameripol, Butaprene, Butyl rubber, Chemigum, GR-I, GR-M, GR-S, Hycar, Neoprene, Perbunan, Silastic, Thiokol

- 
- 678.722      **Production of Synthetic Rubber**  
Raw materials      Intermediates: Monomers, catalysts, modifiers  
Polymerization, coagulation of latex, drying  
For Manufacturing processes using synthetic rubber, see 678.2; Synthetic rubber products, 678.3
- .724      **Properties of Synthetic Rubber      Analysis and Testing**  
Chemical and physical properties of synthetic rubber and tests for determining such properties  
For Engineering properties of synthetic rubber, see 620.19
- .73      **Rubber-like Plastics (Elasto-Plastics)**  
Production      Properties  
Trade names include Butform, Butvar, Geon, Koroseal, Polyisobutylene  
Where interest in rubber-like plastics lies chiefly in its relation to plastics, class in Linear polymer plastics, 668.423
- .8      **Scrap Rubber**  
Collection      Classification  
Includes natural and synthetic rubber  
For Utilization of scrap rubber, see Reclaiming, 678.29
- 679      **OTHER MANUFACTURES**  
It is recommended that Celluloid be classified in 668.44
- .2      **Tobacco Products**  
Includes cigars, cigarettes
- .9      **Waste Materials**  
Includes salvage of wastes not covered elsewhere  
For Salvage of specific material, see material, e.g. Collection of scrap rubber, 678.8

## 680 MANUFACTURES *continued*

Includes comprehensive instruction handbooks for home workshops

*For Handcrafts, see 745.5; Hobbies, 790; Instruction handbooks for specific operation, the subject, e.g. how to make toys, 688.7; Model making, the subject, e.g. Ship models, 623.82; Model railroads, 625.19*

### 681.1 Horology

Construction and repair of time measuring instruments, e.g. clocks, watches, chronometers

Includes makers, history, care, adjustment, cleaning

*For Clocks as decorative furniture and collectors' items, see 749*

### 681.12–681.8 MANUFACTURE OF SPECIAL INSTRUMENTS

*It is recommended that these be classified with their specific subjects, e.g. Electric meters, 621.37; Moving picture apparatus, 771.3; Sound motion picture apparatus, 621.345; Record players, 789.91; Calculating machines, 510.81 or 651.26; Mechanical toys, 688.7; Scientific instruments with use, e.g. Manufacture of surgical instruments, 617.9; Optical instruments with use, e.g. Spectacles, 617.7; Telescopes, 522.2; Business machines, 651–653; Musical instruments, 780, e.g. Piano, 786.2*

### 682 SMALL FORGE WORK

Includes hand forging of tools; iron work, horseshoeing

### 683 GUNSMITHING

Manufacture, repair, makers and history of gun making  
Includes catalogs

*For Ordnance, see 623.4; Gunnery, 623.5*

### .3 Locksmithing

Includes locks and keys; catalogs

684

**WOODWORKING**

Construction of articles from wood

Includes woodworking manuals, tools and machinery

*For Wood handcrafts, e.g. Whittling, see 745.5; Wood carving, 736.4; Carpentry and joinery in construction of buildings, 694; Wood turning, 674.43; Manufacture of veneers and plywood, 674.83*

.1

**Furniture Making**

Includes soft furnishing or upholstered furniture; restoration or refinishing of antiques

*For Period furniture, see 749.2; History, design, collection of furniture, 749*

.2

**Cabinet Making**

Construction of fine woodwork

Includes work with veneers; inlaying

*For Manufacture of veneers, see 674.83*

685

**LEATHER GOODS MANUFACTURE**

Includes saddlery, glove making, manufacture of luggage, handbags

*For Leather processing (tanning, dressing, finishing), see 675*

.3

**Footwear**

Specifications      Manufacture      Repair

686

It is recommended that **BINDING** be classified in 655.45

687

**APPAREL MANUFACTURING**

Includes fashion modeling; accessories, e.g. hosiery, underwear, millinery

*For Home sewing and tailoring, see 646.4; Home millinery, 646.5*

.1

**Commercial Garment Making**

Design      Pattern making and grading      Cutting      Tailoring      Dressmaking

Includes fur craftsmanship

.11

**Men's Apparel**

---

687.12      **Women's Apparel**

688      **SMALL ARTICLE MANUFACTURE**

Includes smoking accessories

.7      **Toy Making**

Includes mechanical toys (formerly classified in 681.15)

## 690 BUILDING CONSTRUCTION

### Erection of buildings

*For Architecture or artistic design of structures, see 720; Structural engineering or analysis and design of structures stressing safety and efficiency, 624; Form divisions .1-.9, p. lv*

## 691 BUILDING CONSTRUCTION MATERIALS

Selection      Deterioration      Preservation

*For Engineering properties and testing of building materials, see 620.11; Types of building construction, the type, e.g. Modern timber construction, 694; Structural engineering use of materials, 624, e.g. Reinforced concrete design, 624.18; Resistant construction, 693.8*

### .1 Timber

### .2 Stone

### .3 Concrete and Reinforced Concrete

### .4 Ceramic or Clay Materials

*Includes brick, tile, adobe*

### .5 Cement

### .6 Glass

*For decorative or architectural use of glass, see 729*

### .7 Iron and Steel

*For Structural design of steel construction, see 624.177*

### .8 Other Metals

*Includes aluminum*

### .9 Other Materials

*Includes plastics, composition shingles, insulating material (Fiberglas, wall board)*

## 692 CONSTRUCTION PRACTICES

*Includes comprehensive material on contracts and specifications*

- 
- 692.2 Building Detail Drawing**  
Includes "How to read plans"
- .3 Specifications**  
Includes building standards  
*For Material including both specifications and contracts, see 692; Specifications for particular type of construction, type of construction, e.g. Specifications for reinforced concrete construction, 693.5*
- .4 Contracts**  
*For Material including both specifications and contracts, see 692*
- .5 Estimates**  
Includes costs
- .6 Supervision**  
Includes building inspection, prevention of accidents during construction
- .9 Building Laws**  
Regulation of construction, alteration, repair, remodeling, moving, use, maintenance, occupancy  
*For Electrical codes, see 621.328; Plumbing codes, 696.9*
- 693 SYSTEMS OF BUILDING CONSTRUCTION**  
Systems      Method or trade      Tools  
Includes comprehensive works which include materials  
*For Materials of building construction, see 691; Structural engineering systems, 624.18; Architectural design, 720*
- .1 Masonry Construction**  
Includes stone masonry, stonecutting, mason's trade
- .2 Brick Masonry**  
Includes bricklaying, adobe construction
- .4 Hollow Tile and Concrete Block Masonry**

- 
- 693.5 Concrete and Reinforced Concrete Masonry**  
Includes framing  
For Structural engineering elements of reinforced concrete,  
see 624.177
- .6 Plaster and Lathwork**  
Includes stucco
- .7 Steel Construction**  
Methods of erection of structural steel parts and supports for  
buildings (riveted, bolted and arc welded construction)  
Includes structural steel framing  
For Elements of design of structural steel construction (the  
major portion of material on steel construction), see  
624.177; Welding, 671.52
- .8 Resistant Construction**
- .82 Fireproof Construction**
- .83 Insulation**  
Includes thermal (heat) and acoustical (sound) insulation
- .84 Pest Resistant Construction**  
Includes termite and rodent resistance
- .85 Shock Resistant Construction**  
Includes earthquake, bomb resistance
- 694 WOOD CONSTRUCTION**  
Includes carpentry and joinery, beginners' manuals, home car-  
pentry
- .2 Framing**  
Walls      Floors      Partitions      Roofs  
Includes use of steel square
- .8 Stairbuilding**  
For Other details of construction, see 695

**695      DETAILS OF BUILDING CONSTRUCTION**

Construction      Repair      Trade

Includes wood, slate, tile, asbestos, metal, asphalt shingles and roll roofing; floors and floor coverings, doors and door frames, windows and window frames

For Stair construction, see 694.8

**696      FITTINGS FOR BUILDING CONSTRUCTION**

Estimates      Supplies      Installation      Inspection      Regulation

Includes comprehensive works on plumbing, heating and ventilation installation

.1      **Plumbing**

.2      **Pipe Fitting**

.9      **Plumbing Legislation**

**697      HEATING, VENTILATING AND AIR  
CONDITIONING ENGINEERING**

Principles      Systems      Installation      Equipment  
Maintenance and repair

Includes domestic heating and ventilation (formerly classified in 644)

Heating and ventilating engineering was formerly classified in 628.8

.1      **Heating Systems and Equipment**

Includes fireplaces, radiators, convectors, district heating

.2      **Radiant and Panel Heating**

Includes stoves, solar heating

.3      **Warm Air Heating**

Gravity systems      Mechanical systems

Includes furnaces and equipment

.4      **Hot Water Heating and Piping**

Includes boilers and accessories

- 697.5      **Steam Heating**  
              Includes piping
- .6          **Use of Fuels for Heating**  
              Includes gas, oil, coal
- .7          **Use of Electricity for Heating**  
              Includes induction heating (radio-frequency), conduction  
              heating (by actual contact)
- .8          **Chimneys and Flues**
- .9          **Ventilating and Air Conditioning**  
              For Refrigeration, see 621.56
- .92        **Ventilating**  
              Includes fans
- .93        **Air Conditioning**  
              Includes air distribution, air cleaning, heat transference,  
              control means for maintaining temperature and humidity  
              For specific application, see subject, e.g. air conditioning  
              of mines, 622.4

## 698      **DECORATION IN BUILDING CONSTRUCTION**

Tools      Materials      Methods

Includes house painting and decorating, paper hanging

For Styles of interior decoration, see 747; Painting, 750

- .1          **House Painting**  
              Exterior and interior  
              Includes mixing and application methods
- .3          **Wood Finishing**  
              Includes staining, polishing, varnishing, waxing, enameling  
              and painting
- .6          **Paper Hanging**

699      It is recommended that CARBUILDING be classified in  
              ~~Other aspects of bldg. e.g. law etc.~~ 625.22

# 700 Arts and Recreation

---

Fine arts      Decorative arts      Sportive arts

*For Form divisions 2-7, see p. iv, adaptations in 1, 4, 8 follow:*

## 701 PHILOSOPHY AND THEORY

Includes psychology, esthetics (generic characteristics of fine arts), appreciation and criticism of the arts

*For Specific field of art, see subject, e.g. Criticism of Renaissance painting, 759.03; Esthetics in general, 101*

## 704 ART ESSAYS, LECTURES, ADDRESSES

*For Literature concerning specific field of art, see subject, e.g. Essays on painting, 750.4; Design in modern life, 745*

### .9 Collected writings on two or more fine arts

*For Collected writings on paintings, see 750; Design, 745; Architecture, 720*

### .94 Representation in art

Albums      Portfolios

Description and study of way in which various subjects are represented in the arts

Includes human figure in art, nature in art, symbolism and other subjects

*For Symbolism in painting, see 750; in sculpture, 730*

### .948 Religious Art

Includes Christian and Non-Christian art

*For Religious painting, see 755*

## 708 GALLERIES, MUSEUMS AND PRIVATE COLLECTIONS

Function . Collection and preparation of exhibition materials  
Exhibitions (Catalogs)      Administration

Specific art galleries, museums and private collections may be arranged alphabetically by city, then by name of gallery

709

**ART HISTORY**

For History of specific field of art, see subject, e.g. History of painting, 759; Sculpture, 730.9

**709.01-709.03 HISTORIC PERIOD OF ART**

*For History of a national art, see 709.1-.9; History of specific class of art, the subject, e.g. History of design, 745.09*

**.01****Primitive and Ancient Art**

Primitive art is artistic expression of primitive peoples and of those who, regardless of chronological period in which they live, are in the same childlike stage of development  
Ancient art includes artistic expression of ancient and classical worlds

*For Prehistoric art, see 571.7*

**.02****Medieval Art**

Includes Byzantine, Romanesque, Gothic art

**.03****Modern Art**

Includes Renaissance art (1420-1600), Baroque art (1600-1720), Rococo (last phase of Baroque), Neo-Classicism (late 18th-early 19th century), 20th century art

**709.1-709.9 NATIONAL ART**

*May be divided like 930-999, e.g. History of French art, 709.44; or 709.1 may be arranged alphabetically by country*

## 710 LANDSCAPE ARCHITECTURE

Control and design of out-of-door surroundings to insure th...  
proper and esthetic adaptation to use

*For Form divisions .1-.9, see p. lv*

### 711 CITY PLANNING

Control and guidance of physical growth and arrangement of  
communities to insure their greater efficiency and attractiveness  
Includes development and redevelopment

*For Comprehensive treatment of economic and social plan-  
ning, see 309.2*

#### .01 Theory

Includes centralization vs. decentralization (formerly classi-  
fied in 711.13)

#### .09 History and Development

Includes planning and plans of specific cities

*For Description of cities, see 913-919*

#### .1 Technical Procedure

Includes professional practice (collection and presentation of  
data, making and presentation of plans, estimation of cost,  
supervision)

#### .13 It is recommended that Centralization vs. Decentraliza- tion be classified in 711.01

#### .17 Administration

It is recommended that Legislation creating and empower-  
ing agencies, public land, right of way, be classified in 333.1

#### .2 It is recommended that National Planning be classified in 309.23

#### .3 It is recommended that Regional Planning be classified in 309.24

#### .4 Design in City Planning

#### .41 Plans Based upon Street Patterns

Gridiron system      Radial type      Organic or studied ir-  
regularity plan

- 
- 711.45 Plans Based upon Function**  
     Capital cities      Port cities      Industrial cities      Residen-  
     tial cities
- .5 Patterns of Land Use in City Planning**  
     For Zoning laws, restrictions as methods of control, see 333.77
- .52 Recreational Facilities**  
     Includes planning of parks, playgrounds and lots, squares  
     and plazas, bathing beaches, athletic fields
- .55 Functional Centers**  
     Includes planning of civic centers, cultural and intellectual  
     centers (formerly classified in .57), commercial and indus-  
     trial centers
- .57 It is recommended that Cultural and Intellectual Cen-  
     ters be classified in 711.55**
- .58 Residential Use**  
     Neighborhood and community planning  
     Includes suburban and rural residential areas, garden cities
- .59 Urban Redevelopment**  
     Includes slums and slum clearance; redevelopment of  
     blighted areas; low cost, low rental housing
- .6 Structural Elements in City Planning**  
     Relation of structures to surroundings      Regulation of  
     height, materials, spacing  
     Includes buildings, bridges, architectural and sculptural ac-  
     cessories (lighting fixtures, advertising and display structures,  
     waste cans, mail boxes)  
     *For Design of structures, see 729; Engineering, 620*
- .7 Channels of Communication in City Planning**  
     Planning for streets, roads, railways, waterways and waterfronts,  
     air transport terminal facilities, parking and underground park-  
     ing facilities, and accessories such as signs  
     Where interest in air transport lies chiefly in aeronautics,  
     class in 629.16  
     *For Transportation engineering, see 625; Architecture, 720;  
     Construction, 690*

- 711.8      Underground Utilities in City Planning**  
Includes planning for water supply, sewage, power transmission  
For Sanitary engineering, see 628; Electric power engineering, 621.31-37
- 712      TYPES OF LANDSCAPE DESIGN**  
For Design of community, see 711, Cemeteries, 718; State and national parks, 719
- .3      Technical Procedure**  
Office practice      Collection of data      Presentation of plans  
Supervision      Costs
- .5      Public Parks**  
Includes squares, commons, exposition and fair grounds, grounds of public buildings  
For Parks and recreational facilities in city planning, see 711.52; State and national parks or reservations, 719; Planting and culture, 630
- .53      It is recommended that Water Features in Public Parks be classified in 714**
- .54      Recreational Facilities in Public Parks**  
Provision and planning of playgrounds, athletic fields, amphitheatres  
For Recreational facilities in city planning, see 711.52
- .6      Estates**  
Property consisting of at least a house and its site, regardless of size  
Includes landscape design of home grounds, apartment grounds, suburban and country estates  
For Planting and culture, see 630
- .62      Gardens**  
Includes design of back yards, penthouse gardens and gardens devoted to special plants, e.g. Shakespearean, old fashioned, rose garden, rock garden  
For Planting and culture, see 635.9; Use of specific trees, shrubs and plants in landscape design, 715-716; Gardens as part of landscaping of whole estate, 712.6

**712.7      Semiprivate and Institutional Grounds**

Includes grounds of country clubs, hotels, institutions (hospitals, universities, churches, industrial plants, railroads, airports)

*For Planting and culture, see 630*

**713      LANDSCAPE CONSTRUCTION AND  
   MAINTENANCE**

It is recommended that **Construction of roads and pavements** be classified in 625.7; **Bridges**, 624.2-.8; **Tunnels**, 624.152; **Cost**, in 712.3

**714-717 ELEMENTS AND MATERIALS  
   of landscape architecture****714      WATER FEATURES IN LANDSCAPE  
   ARCHITECTURE**

Practical and esthetic treatment of bodies of water and their shore lines; use of fountains, pools, cascades  
Includes development and utilization of shore lines as public parks or part of parks (formerly classified in 712.53)

*For Water features in city planning, see specific use, e.g., Recreational use, 711.52; Transportation, 711.7; Sculptural details of fountains, 736.5*

**715      TREES, SHRUBS AND HEDGES IN  
   LANDSCAPE ARCHITECTURE**

Practical and esthetic use of trees, shrubs, and hedges as integral part of landscape design  
Includes flowering trees, shrubs and vines, e.g., magnolia trees, rose bushes and wisteria vines

*For Planting and culture of trees in forests, see 634.95, of shrubs and hedges, 635.97; Diseases of trees, 634.96, of shrubs, 632; Botany, 580*

716      **HERBACEOUS PLANTS OR ANNUALS IN  
             LANDSCAPE ARCHITECTURE**

Practical and esthetic use of flowering plants, mosses, and ferns as integral part of landscape design

*For Planning of gardens, flower and otherwise, see 712.62; Growing of flowers, in gardens, window boxes, penthouses, dishes, 635.96; Botany, 580*

717      **STRUCTURES IN LANDSCAPE  
                                 ARCHITECTURE**

Relationship of buildings, terraces, walls, fences, gates, steps and ornamental accessories (monuments, sundials, seats, fireplaces and garden furniture) to other elements of landscape design

*For Architectural design, see 729; Construction, 690; Grouping of buildings in city planning, 711.5; Structural elements in city planning, 711.6*

718      **PLANNING OF CEMETERIES**

Legislation      Administration      Design

Consideration of roads, paths, bridges, planting, buildings, monuments and accessories in planning cemeteries

*For Mortuary architecture, see 726.8; Monumental sculpture, 736.5; Disposal of dead (Public health, 614.6; Customs, 392)*

719      **PLANNING OF NATURAL LANDSCAPE  
                                 RESERVATIONS**

Planning for preservation of natural scenery, forests and historical features; for water supply safety, and incidentally for recreation of public land

Includes national, state reservations

*For Game preserves, see 333.78; Provision of parks in cities, 711.52; Design of public parks, 712.5; Wild life conservation, 333.78*

## 720 ARCHITECTURE

Art of designing buildings of beauty and utility of form and arrangement, and selection of material to meet requirements

*For Structures in city planning, see 711.6; in landscape architecture, 717; Form divisions .1, .3–.8, p. Iv; exceptions .2, .9 follow:*

720.2

### Outlines, Manuals

Includes technical procedure (professional practice, relations, architectural presentation)

*For Architectural drawing, see 744.4*

.9

### History of Architecture

Development      Critical appraisal

Includes works of individual architects

May be divided like 930–999 or arranged alphabetically by country

*For Periods of architecture extending over more than one country, see 722–724, e.g. Renaissance architecture in Italy and France, 724.1*

721

It is recommended that ARCHITECTURAL CONSTRUCTION REQUIRING EMPLOYMENT OF ENGINEERING PRINCIPLES be classified in 624, e.g. Foundations, 624.15; Arches, 624.177; BUILDING MATERIALS AND CONSTRUCTION, 690–698, e.g. Roof Construction, 694.2; Brick Construction, 693.2 DESIGN OF STRUCTURAL FEATURES, where most of architectural construction material should fall, 729

- .1 Renaissance Architecture
  - Includes Baroque (1500–1700), Rococo (1720–1800)
- .9 Twentieth Century Architecture
  - Includes functional

725-728 TYPES OF ARCHITECTURE  
*Design of new buildings*

*For Construction, see 690; Design of details, 729; Materials, 691*

725 PUBLIC BUILDINGS

1. Government Buildings

International    National    State    County    Municipal

Includes capitols, legislative and judicial buildings, government agencies and offices, post offices, official residences (executive mansions, rulers' palaces, embassies, legations, consulates), customs, military buildings (barracks, forts, armories, arsenals), police and fire stations, refuse plants, incinerators, comfort stations

*For Aqueducts, reservoirs, see 628.1*

.2 Commercial Buildings

Includes stores, office buildings, financial buildings, exchanges, markets, skyscrapers

.3 Transportation and Storage Buildings

Includes railway, bus, marine and air terminals; service facilities, e.g. garages, filling stations

Where interest in air terminals lies chiefly in aeronautics, class in 629.16

*For Planning for transportation facilities, see 711.7*

.35 Warehouse and Storage Buildings

.36 Elevators for Storage of Grain, Ore

.4 Industrial Architecture

Includes factories, mills, shipyards

.5 Hospital Architecture

Includes institutions for handicapped

.6 Prison Architecture

Includes reformatories

- 
- 725.7      **Refreshment and Park Buildings**  
            Includes restaurants, taverns, baths, swimming pools
- .8          **Recreation Buildings**  
            Includes theaters, auditoriums, stadiums, gymnasiums, rinks,  
            race tracks
- .9          **Other Public Buildings**  
            Includes exhibition and fair buildings, memorials
- 726      **ECCLESIASTICAL ARCHITECTURE**  
            Includes non-Christian temples; mosques, minarets, synagogues
- .4          **Parish Halls**
- .5          **Churches**  
            Includes Cathedrals (formerly classified in 726.6)
- .6          It is recommended that **Cathedrals** be classified in 726.5
- .7          **Monastic Architecture**  
            Includes abbeys, priories, nunneries, and accessory structures
- .8          **Mortuary Architecture**  
            Includes mortuary chapels, tombs, crematories, morgues
- .9          **Other Religious Buildings**  
            Includes dwellings and religious association buildings
- 727      **EDUCATIONAL ARCHITECTURE**  
            Includes details of special rooms for both private and public  
            schools  
            For *Gymnasiums*, see 725.8; *Laboratories*, 727.5
- .1          **School Architecture**
- .3          **College and University Architecture**  
            Includes dormitories, commons, unions  
            For *Chapter houses*, see 728.4; *Gymnasiums*, 725.8; *Libraries*,  
            727.8; *Laboratories*, 727.5

- 727.5      **Research Facilities**  
            Includes laboratories, botanical and zoological gardens and  
            houses, observatories
- .6          **Museum Architecture**  
            *For Art galleries, see 727.7*
- .7          **Art Gallery Architecture**
- .8          **Libraries**  
            Includes public and private libraries and details of special  
            rooms

728      **DOMESTIC ARCHITECTURE**

- .1          **Multiple Dwelling Architecture**  
            Includes low rental housing and apartments (formerly classi-  
            fied in 728.2)  
            *For Housing in city planning, see 711.59*
- .2          It is recommended that **Apartment Architecture** be classi-  
            fied in 728.1
- .3          **Urban Residence Architecture**  
            Includes detached, semidetached, prefabricated urban houses
- .4          **Club Architecture**  
            Includes country clubs, political clubs, fraternity houses
- .5          **Hotel Architecture**  
            Includes inns, hostels, motels
- .6          **Rural Architecture**  
            Small dwellings  
            Includes farmhouses, ranch houses, bungalows, cottages  
            *For Country seats, see 728.8*
- .7          **Resort Architecture**  
            Includes seaside, mountain, summer and winter houses, house-  
            boats, hunting lodges  
            *For Resort hotels, see 728.5*

**728.8 Country Seat Architecture**  
*For Small rural residences, see 728.6*

**.9 Accessory Domestic Buildings**  
Includes gatehouses, stables, kennels, poultry houses, garages, barns, silos, dairies, conservatories and other outbuildings  
*For Commercial garages, see 725.3*

**729 ARCHITECTURAL DESIGN AND DECORATION**

Disposition of the elements of a building  
*For Theory of design, see 745; Architectural drawing, 744.4; Interior decoration, 747; Design of types of building, the type, e.g. Small house design, 728.6*

**.1 Elevation**  
Includes design of light and shade, proportion

**.2 Planning**  
Includes consideration of function, size, arrangement of interior, communication, lighting, acoustics

**.3 Design of Details**  
Includes walls, orders of columns, arches, vaults and domes, roofs, towers, gables and pediments, doors and windows, stairs, and ramps  
*For Construction, see 624 and 690*

**.4 Painted Decoration**  
Includes painted ceilings, walls, moldings, panels  
*For Painted decoration which stresses fine art, e.g. Murals, ceilings painted by masters, such as Sistine chapel, see 750; Design, 745*

**.5 Decoration in Relief**  
Carved decoration and ornament, architectural sculpture  
Where interest in Carving lies chiefly in its relation to Sculpture, class in 736.5

- 
- 729.6 It is recommended that **Incrustation of Exteriors and Interiors in Brick, Stone, Marble, Tile** be classified in 690; **Inlay**, 684.2; **Enamel**, 738.4; **Veneering**, 684.2
- .7 It is recommended that **Mosaics** be classified in 738.5
- .8 It is recommended that **Stained Glass Windows** be classified in 748.5
- .9 It is recommended that **Furniture** be classified in 749; **Lighting Fixtures** in 749

## 730 SCULPTURE

Three dimensional art of organizing masses by carving or modeling

*For Form divisions, except .9, see p. lv*

730.9

### History of Sculpture

Development      Critical appraisal of the great schools of sculpture

Includes works of individual sculptors

May be divided like 930-999, or arranged alphabetically by country

*For Periods of sculpture extending over more than one country, see 732-735, e.g. Renaissance sculpture in France and Italy, 735.21*

731

## MATERIALS AND METHODS OF SCULPTURE

Composition      Form      Subject      Preservation and care  
Methods of restoration

Manner or method of execution in all materials used in sculpture except ceramic materials and metals

Includes masks

*For Technique in ceramic sculpture, see 738; in metal sculpture, 739*

## 732-735 PERIODS OF SCULPTURE

*Chronological development of sculpture*

*Unless period extends over more than one country, this scheme should be used only by libraries not using 730.9*

732

## ANCIENT SCULPTURE (3000 B.C.- )

### PRIMITIVE SCULPTURE

Ancient sculpture represented chiefly by remains found in Babylonia, Assyria, Egypt, Persia, China, Japan, India

**732.2      Primitive Sculpture**

Includes not only work of primitive races but also of people whose artistic expression is in the same childlike stage of development regardless of the chronological period in which they live

Where interest in primitive sculpture lies chiefly in its relation to cultural anthropology, class in 572.7

**733      CLASSICAL SCULPTURE (1500 B.C.-476 A.D.)**

Greek, Roman and Etruscan sculpture

**734      MEDIEVAL SCULPTURE**

Includes Byzantine sculpture

**.2      Romanesque and Gothic Sculpture****.5      Eastern Sculpture**

Mohammedan and Buddhistic sculpture at its height in China, Japan, India and Near East

Includes sculpture of Latin America

**.21      Renaissance Sculpture (1400-1799)**

Includes Baroque (1600) and Rococo (1700)

**.22      Classic Period of 19th Century**

Includes Neoclassicism, Romanticism, Realism

**.29      20th Century Sculpture**

## 736-739 DEVELOPMENT

*critical appraisal and collection of sculpture in different media*

## 736 CARVING OF SPECIAL MATERIALS

## .2 Carved or Engraved Gems and Precious Stones

Includes intaglios, cameos, scarabs, jade cutting

*For Properties, description, history of gems, see 553.8; Cutting, setting, designing of gems as jewelry, 739.27; Industrial uses of gems, 621.9*

## .3 Engraved Seals, Stamps, Signets

Includes personal and official seals, seals for special occasions and organizations

## .4 Sculpture in Wood

Development      Critical appraisal

Includes work in the round and in relief; statues, busts, scrollwork

*For Technique of carving in wood, see 731*

## .5 Sculpture in Stone

Development      Critical appraisal

Includes statues, busts, monuments, garden sculpture, architectural sculpture

*Where interest in architectural sculpture lies chiefly in its relation to architecture, class in 729.5*

*For Technique of stone sculpture, see 731*

## .6 Carved Ivory, Bone, Horn

Includes netsukes

## .8 It is recommended that Hallmarks be classified with the material marked, e.g. British Silver Marks, 739.2

## 737 NUMISMATICS

Includes medals, tokens, counters

## .4 Coins

## 738 CERAMIC SCULPTURE

Historic development      Description      Collection

*Includes potters' art and marks*

*For Technology of ceramics, see 666*

- 738.2      **Porcelain      China**  
Includes figurines, vases, tablewares, e.g. Royal Copenhagen, Haviland, Limoges, Spode, Lenox
- .3      **Earthenware**  
Term used interchangeably with pottery, faience, majolica  
Includes figurines, vases, tablewares, e.g. Wedgwood, Delftware, Royal Copenhagen, Faience, Italian Majolica  
Use for material on both porcelain and pottery
- .4      **Enamels**  
Includes cloisonné
- .5      **Mosaics**
- .6      **Ornamental Bricks, Tiles**
- 739      **METAL SCULPTURE**  
Includes repoussé, a process of shaping by beating or hammering; wrought metalwork; metal casting from a mold taken of a model  
*For Metal manufactures, see 671-672*
- .2      **Precious Metals**  
Gold      Silver      Platinum  
Includes religious articles, tableware, vases, marks of silver-smiths and goldsmiths
- .27      **Jewelry**  
Art of the jeweler  
Includes design of settings, cutting and setting of gems and semiprecious stones
- .4      **Iron**  
Ornamental work in iron and steel  
*For Metal manufactures, see 671-672*
- .5      **Bronze and Other Metals**  
Copper      Brass      Pewter      Aluminum  
Includes sculpture in the round and in relief  
May be arranged alphabetically by country
- .7      **Armor**  
Ornamentation of side arms, firearms, as well as suits of armor  
*For Manufacture of arms and armor, see 683*

## 740 DRAWING DECORATIVE ART

*For Form divisions .1-9, see p. lv*

### 741 FREEHAND DRAWING

Art of representing an idea, emotion or object by use of line, tone or color

#### .2 Materials and Methods of Freehand Drawing

How to draw      How to use various media of charcoal, chalk, crayon, pencil, pen, pastels

#### .4 Elements of Freehand Drawing

Line      Proportion      Light and shade      Composition  
Color

*For Perspective, see 742*

#### .5 Cartoons      Caricatures

Materials      Methods      Critical appraisal      Collections

Includes works of cartoonists and caricaturists, drawing for animated cartoons

*For Technical processes involved in producing animated cartoons, see 778.5*

#### .6 Illustration

Illustration is the translation of an author's idea into pictorial form

#### .64 Book Illustration

Includes illustration of book covers and jackets

*For Books which are rarities because of their illustration, see 096*

#### .65 Magazine Illustration

#### .67 Advertising Illustration or Commercial Art

Includes fashion drawing, poster art; greeting card art

*For Layout in advertising, see 659.13*

#### .7 Sketching

Representation of an idea roughly to present its chief features

741.9

**Collections of Drawings**

Drawings of specific artists, schools or periods, places

742

**PERSPECTIVE**

Theory      Principles

*For Other methods of technical drafting, see 744.45*

743

**ANATOMY FOR ARTISTS**

Human      Animal      Plant

Includes "how to draw" both from life and cast

744

**TECHNICAL DRAFTING      INDUSTRIAL  
PRODUCTION ILLUSTRATION**

Process of drawing freehand or with instruments, designed to impart exact and specific information to the reader      Is variously termed drafting, mechanical drawing, engineering drawing, precision drawing

Includes drafting room layout and practice, materials, equipment

Where interest in technical drafting lies chiefly in its relation to a specific subject, class in subject, e.g. Engineering drafting, 620.04; Aircraft drafting and production illustration, 629.142

*For Graphic solutions or geometric construction, see 515*

.4

**Types of Technical Drafting and Industrial Production Illustration**

Engineering drafting (mechanical, civil, mining, chemical, electrical)      Architectural drafting      Map drafting (plat, contour, topographic)

.43

**Conventions**

Special lettering      Shading      Dimensioning

.45

**Methods**

Working drawings and pictorial illustration

Includes orthographic, axonometric (isometric, dimetric, trimetric), oblique projections

*For Perspective, see 742*

744.5

**Duplication of Technical Drawings**

Includes blueprints and blueprint reading

Where interest in blueprint reading lies chiefly in its relation to a specific subject, class in subject, e.g. Aircraft blueprints and blueprint reading, 629.142

**745-749 DECORATIVE ARTS**

745

**DECORATIVE ART AND DESIGN**

Decorative or applied arts utilize various phases of art as a means of ornamentation or enrichment, and generally are more the product of craftsmen than of artists

.2

**Industrial Art**

Structural design of objects, e.g. radios, clocks, lighting fixtures, automobiles, for mass production by machine tools

.3

**Folk Art**

Naïve, non-academic, often untrained artistic expression of simple people in the design of utensils, furniture, portraiture, dress

.4

**Design**

Theories      Principles      Elements of pure and applied design

.44

**Historic Decoration or Ornament**

Includes periods and schools

.5

**Handcrafts**

Productive, creative work done by hand with the aid of simple tools or machines

Includes design and instruction in crafts using wood, leather, metals, plastics, paper, textiles, c.g. wallpaper design, painted textiles, tincraft

.52

**Textile Handcrafts**

It is recommended that Rugs be classified in 746.7

For Laces, tapestry, needlework, see 746

.58

**Basketry**

Raffia, rush, cane handwork

- 
- 745.6      **Decorative Lettering**  
            Alphabets      Monograms      Heraldic design  
            *For Lettering for technical drafting, see 744.43*
- .67      **Manuscript Illumination**  
            *For Manuscripts which are valuable because of illumination,*  
            *see 096*
- .7      **Stencil Decoration**  
            Mechanical means of applying patterns with paint to textiles,  
            furniture  
            *For Silk screen printing, see 655.3*
- 746      **LACES      TAPESTRIES      NEEDLEWORK**  
            Historic development      Design      Identification and collection  
            *For Instruction in home needlework, lace making, see 646.2;*  
            *Machine production, e.g. Production of laces, 677.6*
- .2      **Laces**  
            *For Instruction in home crocheting and tatting, see 646.2*
- .3      **Tapestries**  
            *For Machine production of tapestries, see 677.6*
- .4      **Needle Crafts**  
            *For Instruction in home sewing, smocking, knitting, crocheting,*  
            *quilting, embroidery, see 646.2*
- .44      **Embroidery**  
            Crewelwork      Needle point      Ecclesiastic embroidery  
            Samplers
- .7      **Handmade Rugs**  
            Includes Oriental rugs (formerly classified in 745.52)

## 747 INTERIOR DECORATION

Planning, designing, execution of structural interiors and their furnishings

Includes walls, ceilings, floors and their decorative treatment; consideration of the use of upholstery, draperies, furniture, lighting in designing interiors of homes and other buildings; use of color in planning interiors

House furnishing was formerly classified in 645

*For Factors involved in interior decoration, apart from their role in interior decoration, see subjects, e.g. Tapestries, 746.3; Rugs, 746.7; Furniture, 749; Color, 752; Architecture, 720*

## .2 Period Styles of Interior Decoration

May be arranged alphabetically by country

*For Period styles of architecture, see 722-724; Period styles of furniture, 749.2*

## 748 GLASSWARE

Ornamental and useful glass for table use, mirrors, lighting fixtures, e.g. lamps, candelabra

*For Technical and mass production of glassware, see 666.1*

## .2 Period Styles of Glassware

Historic development	Design	Identification	Collection
----------------------	--------	----------------	------------

Includes Venetian, Bohemian, German, French (Lalique), English (Bristol), Irish (Waterford), American (Stiegel, Wister, Sandwich [Pressed glass], Steuben), Scandinavian (Orrefors)

## .5 Stained Glass

Design	Process of making stained glass windows
--------	---

## .6 Decoration of Glass

Includes intaglio or relief cutting, engraving, etching, sand blasting, spun glass techniques

## 749 FURNITURE AND ACCESSORIES

Historic development      Design      Identification      Collec-  
tion of fine furniture

Includes chairs, beds, tables, desks, chests; decorative forms of  
frames, brackets, consoles; accessories, e.g. fireplace mantels,  
clock cases; general collecting manuals

*For Furniture manufacture, see 684.1; Consideration of fur-  
niture as an integral part of interior decoration, 747*

## .2 Period Styles of Furniture

Includes antiques, reproductions

*For Gothic period furniture of more than one country, see  
749.24; Renaissance period furniture of more than one  
country, 749.25; Baroque, 749.24*

## .21 American Furniture

Early American      Colonial      American Georgian (Sa-  
very)      Federal (Duncan Phyfe)      Modern

Includes Japanese prints by Hiroshige, Hokusai; work of Hol-bein, Dürer, Maillol, Rockwell Kent, Eric Gill, Lynd Ward, Gauguin, Clare Leighton

#### .3 Linoleum Blocks

762 It is recommended that INTAGLIO WORK be classified  
in 765-767

### 763 SURFACE OR FLAT PRINTS

Lithographs

Includes work of Pennell, Daumier, Currier and Ives

### 765-767 INTAGLIO PRINTS

### 765 METAL ENGRAVINGS

Includes work of Hogarth, Brueghel

### 766 AQUATINTS      MEZZOTINTS

767

**ETCHINGS    DRY POINTS**

Includes work of Rembrandt, Goya, Whistler, John Taylor Arms, Benson, Brangwyn

769

**COLLECTIONS OF PRINTS**

Collections which illustrate various processes of print making and of interest from art standpoint

May be arranged by subject, form, locality or artist

*For Collections representing one process, see process, e.g. Engravings of Eric Gill, 765; Illustrations of animals of interest because of subject, not art, see animal, e.g. Dog pictures, 636.77*

## 770 PHOTOGRAPHY

For Form divisions .3–.9, see p. lv; exceptions .1–.2 follow:

### 770.1 Photographic Theory

Theories of physical, mechanical, chemical influences on photographic preparations  
Includes photographic optics

### .2 Photographic Methods

Elementary operations of photographic processes, e.g. exposure, developing, fixing, printing, retouching, finishing, toning  
Includes amateur photography

## 771 PHOTOGRAPHIC MATERIALS

Includes photographic studios, dark rooms, laboratories

### .3 Cameras and Accessories

Cameras (box, folding, reflex, candid, miniature, moving picture, special cameras, e.g. stereo, panoramic, aerial)  
Camera parts and accessories (lenses, shutters, finders, filters, tripods)

### .5 Photographic Chemicals

Preparation and use, from photographic viewpoint, of chemical materials used in photography (support materials; sensitive preparations; photographic baths and mixtures; printing, emulsion, coating materials)

*For Chemical action and influence of light, see Photochemistry, 541.35; Manufacture of photographic compounds, 661.2*

## 772 METALLIC SALT PROCESSES OF PHOTOGRAPHY

Materials      Equipment      Methods

Processes using various metallic salts, e.g. silver, iron, platinum, palladium (Daguerreotype, ferrotype or tintype, platinotype process, ferropussiate process, cyanotype, Kallitype)

## 773 PIGMENT PROCESSES OF PHOTOGRAPHY

Materials      Equipment      Methods

Includes carbon, carbro, gum-bichromate, bromoil, diazo processes

## 774-777

*It is recommended that Photomechanical processes  
be classified in 655.32*

**778 APPLIED PHOTOGRAPHY****.1 Photocopying**

Includes photostats

*For Microphotography, see 778.3; Blueprints, 744.5*

**.2 Photographic Projection**

Includes projectors, projector screens

**.3 Scientific Photography**

Scientific applications of photography, e.g. photomicrography or photography of minute objects by aid of microscope; microphotography or production of photographs of microscopic size; telephotography, radiography, infra-red and ultra-violet photography, aerial photography, high-speed photography, photogrammetry

*For Specific applications, see fields to which applications are made, e.g. Photogrammetric methods in Topographic surveying, 526.98; Biological microphotography, 578*

**.4 Stereoscopic Photography**

Photography of a subject from two different points apart, e.g. width of the eyes

**.5 Cinematography**

Photography of moving pictures

Includes sound films; newsreels; animated cartoons; color movies, e.g. Technicolor, Kinemacolor

*For Moving picture production, see 792.93; Reproduction of sound in moving pictures, 621.345*

778.6

**Panchromatic and Color Photography**

Includes photography of colored objects and natural color photography

Additive processes: Trade names include Autochrome, Film-color, Dufaycolor, Finlay color

Subtractive processes: Trade names include Kodachrome, Ektachrome, Kodacolor, Kotavachrome, Agfacolor, Ansacolor, Printon, Casparcolor

Color prints: Trade names include Tricolor Carbro, Belcolor, Chromatone, Wash-Off Relief, Kodak Dye Transfer, Duxochrome or Colorstil, Pinatype, Jos Pe, Autotype-Dyebro

*For Color moving pictures, see 778.5*

**.7****Photography under Special Conditions**

Outdoor, indoor, submarine, arctic or cold temperature, tropic or hot weather

**.8****Trick Photography**

Includes table-top photography, multiple photographs of the same object, photographs of specters, silhouette photography

**.9****Photography of Special Subjects**

Includes portraits; photography of animals, children, plants, clouds, mountains

779

**COLLECTIONS OF PHOTOGRAPHS**

## 780 MUSIC

Music and literature about music

Includes musicology

Music may be separated from works about music by prefixing M to class number

*For Form divisions .2-.6, .8-.9, see p. lv, .1 and .7 follow:*

- 780.07 Music and Musicians in Relation to Society, the Arts**  
Includes amateurs, the public, patronage, music in the home  
(formerly classified in 780.13)  
*For Copyright of music, see 655.6*
- .071 Musicians**  
Duties      Activities      Professional ethics  
Includes composers, interpreters and performers, e.g.  
bards, minstrels, Meistersingers  
*For Biography of individual musicians, see 927 or 780.92*
- .072 Critics      Musical Criticism**  
It is recommended that Analytical guides (program notes) be classified in 780.15
- .1 Philosophy      Esthetics**
- .13 Value of Music**  
Influence and effect of music in industry, hospitals, character training; musical therapeutics  
It is recommended that **Music in the Home** be classified in 780.07
- .15 Appreciation**  
Includes analytical guides (program notes) too general to class with specific works or composers  
Analytical guides were formerly classified in 780.072
- .7 Study and Teaching**
- .72 Musical Conservatories, Schools, Courses**  
Includes methods of teaching music in general schools  
*For Place of music in curricula, see 375.78; Music in elementary schools, 372.878*

- 
- 780.73      **Concerts      Concert and Recital Programs**  
                  Programs too general to class elsewhere  
                  For Programs of specific type, see type of concert, e.g.  
                  *Chamber music programs, 785.7*
- .77      **Methods of Teaching Music**  
                  Includes dictation, ear training, pitch perception, eye train  
                  ing, music reading, sight reading  
                  For Methods for specific medium, see medium, e.g.  
                  *Teaching violin, 787.1*
- .9      **History of Music**  
                  Includes theories and forms (formerly classified in 781.7)  
                  May be divided like 930-999
- 781      **THEORY AND TECHNIQUE OF MUSIC**  
                  For Nomenclature and terminology, see 780.3
- .1      **Scientific Theories**  
                  Mathematical theory of music      Acoustics in music      Psy-  
                  chology of music      Color and music
- .2      **Principles of Music**
- .22      **Sound from Music Viewpoint**  
                  Pitch, scales, intervals, chords, tonalities
- .24      **Music Notation**  
                  Music writing  
                  Includes systems of notation; neumes, tablature, notation for  
                  blind, reform proposals
- .3      **Harmony      Thorough-bass**  
                  Includes figured bass, keyboard harmony, modulation  
                  For Realization of figured bass at sight, see 781.66
- .4      **Counterpoint**  
                  Includes canon, fugue
- .41      **Melody**
- .5      **Musical Form**  
                  For Specific forms of music, see form under medium, e.g.  
                  *Piano sonatas, M786.4*

---

781.6      **Composition**      **Performance**

## 781.61-781.63 COMPOSITION

**.61      Composition**

Includes vocal and instrumental composition and arranging

**.62      Special Phases**

Rhythm and meter

**.63      Writing for Instruments**

# 800 Literature

---

Classification of literature except that of United States is by language, not by nation. Libraries may separate their national literature from other literature in the language by adding letters or symbols to class numbers, e.g. Chilean literature C860

Literary works of modern authors who write in several languages or whose native language cannot be established, may be classified in the literature of language in which works are written

Fiction is seldom classified but is sometimes distinguished by "F," and arranged alphabetically or Cuttered by author

Small libraries often classify all literature written or translated into English in 820-828, disregarding original language in which it was written

Literature, with the exception of 870 and 880 and specified parts of the 890's, may be divided according to literary form by adding the following numbers to the basic number of the literature

1 poetry	5 oratory
2 drama	6 letters
3 fiction	7 satire
4 essays	8 miscellany

e.g. German poetry, 831; Swedish poetry, 839.71; Irish drama, 891.622

Small libraries and others which consider it important to keep an author's work together, arrange all works in a specific literature alphabetically by author regardless of the form in which it is written, while academic libraries often consider further division of literary form by period necessary. For such libraries, chronological divisions may be found with each literature. However, if the national language is that of two or more nations, the national character of period divisions makes it awkward to expand beyond literary form

*For Form divisions 01-03 and 05-07, see. p. lv, 04, 08 and 09 follow:*

---

804      **ESSAYS    LECTURES    ADDRESSES**

Collections in which literature is the subject

Distinction between following numbers for essays follows:

808.84 Collections of essays from several literatures written originally in different languages

04 (form division) Collections of essays about a literature, e.g. Collections of essays about English drama, 822.04

4 (literary form) Essays written in a particular language, e.g. English essays, 824

              May be divided like 808.1-808.7, e.g. History of fiction, 809.3

## 810 AMERICAN LITERATURE

Includes Canadian literature which may be distinguished from United States literature by adding C to notation. If it seems desirable to separate Canadian literature, English-Canadian may be classified here and French-Canadian in 840. Some libraries do not distinguish between American and English literature, classifying both literatures in 820

May be divided by literary form divisions as given on p. 399, e.g. American satire, 817; and if it seems desirable to divide literary form by period, following table may be used

- .1 Colonial era (1607-1776)
- .2 Post-revolutionary era (1777-1830)
- .3 Middle 19th century (1831-1861)
- .4 Later 19th century (1862-1900)
- .5 20th century (1901- )

e.g. American poetry in later 19th century, 811.4

For Collections of *English* and *American literature*, see 820

## 820 ENGLISH LITERATURE

# Relative Index

## HOW TO USE THIS INDEX

THE Relative Index is a guide to the Tables, not a substitute for them. Never forget this. Always turn to the full Tables before classifying an item.

In referring from the Index to the Tables, note that all class numbers are decimals; i.e. 651.26, Office Appliances comes before 651.3, Office Organization, and both of them come before 652, Writing.

Topics in bold-face type are subdivided in the Tables. This indication makes it unnecessary to repeat obvious subdivisions under each main entry in the Index. The further subdivision may appear directly in the Tables under the number printed in bold face, or may consist of the possibility of dividing like some other portion of the classification: e.g. 016, Subject Bibliographies may be divided like the whole classification; many languages may be divided like 420; many numbers, such as 330.9, Comparative Economic Systems or 549.9, Geographic Distribution of Minerals may be subdivided like 930-999.

To avoid frequent unnecessary repetitions in the Index, certain entries are printed with a dash instead of a complete classification mark. Thus

Grammar	415
(English language)	425
(Other languages)	—5

indicates that the 5 following the dash may be added to the number for any language which may be subdivided.

Entries are arranged in a single alphabetic order, interfiling subject field designations, which in this edition are enclosed in parentheses; inverted headings, which are sometimes but not always distinguished by the comma; and running heads. The alphabetic order is by word, not by letter; e.g. *Education*, *Vocational* precedes *Educational systems*.

---

This Index contains

all subjects specifically named in the Tables, together with their more obvious synonyms, including catch words or phrases, related topics, and generic terms or categories.

It does not include

all names of places or of organizations, or of minerals, plants, animals, etc.; but gives only those which appear in the Tables, plus a further selection of the most common and useful, substantially to the extent that they appear in standard non-technical works of general reference. It is not a biographic dictionary, and gives no names of persons as biographic heads, but only such as appear in connection with some subject like art, literature, or history.
